dti business person: Corporate Insolvency Law Vanessa Finch, 2002-09-12 Vanessa Finch provides an interesting look at corporate insolvency laws and processes. She adopts an interdisciplinary approach to place two questions at the centre of her discussion. Are current UK laws and procedures efficient, expert, accountable and fair? Are fundamentally different conceptions of insolvency law needed for it to develop in a way that serves corporate and broader social ends? Topics considered in this wide-ranging book include different ways of financing companies, causes of corporate failure and prospects for designing rescue-friendly processes. Also examined are alternative asset distribution of failed companies, allocations of insolvency risks and effects of insolvency on a company's directors and employees. Finch argues that changes of approach are needed if insolvency law is to develop with coherence and purpose. This book will appeal to academics and students at advanced undergraduate and graduate level, and to legal practitioners throughout the common law world.

dti business person: *Behavioural Risks in Corporate Governance* Ngozi Vivian Okoye, 2015-03-05 Recent cases of corporate failures, including the fixing of LIBOR rates and money laundering issues in the banking industry, highlight how behavioural issues on the part of company directors are significant contributory factors in corporate governance and the success or failure of companies. This book examines how personality and behavioural issues have contributed to major corporate failures, and how this risk may be managed. The book examines behavioural risks in corporate governance, and evaluates the extent to which risk management mechanisms have acknowledged various aspects of behaviour. Drawing from cases in the UK, the US and Australia and research in psychology and the behavioural sciences, Ngozi Vivian Okoye argues that current corporate governance mechanisms lack provision for identifying and managing personality risks, and suggests how constituent elements of behaviour should be engaged with when developing preventive mechanisms for corporate failures. Okoye presents a conceptual framework for identifying and managing personality risks, and explores how personality risk may be built into corporate governance regulation. The book will be of great use and interest to researchers and practitioners in business and company law, corporate governance, and critical management studies.

dti business person: Regionalism, Security and Development in Africa Ernest Toochi Aniche, Ikenna Mike Alumona, Inocent Moyo, 2021-04-29 This book charts the history and contemporary landscape of African regionalism, investigating how regional cooperation can be used to help to tackle security and development challenges in Africa. Africa has a long tradition of regional cooperation, with the oldest trade and monetary integration schemes in the developing world, but its colonial period and partition of have caused lasting damage that still be seen in today’s African economies. Contemporary post-colonial African regionalism, deeply rooted in notions of pan-Africanism, has served as a means of collective self-reliance and economic transformation and development. This book starts with the history and theory behind African regionalism before discussing and comparing regional organisations such as the Economic Community of Central African States (ECCAS), the Economic Community of West African States (ECOWAS), the Community of Sahel-Saharan States (CEN-SAD), Southern African Development Community (SADC), the Common Market for Eastern and Southern Africa (COMESA) and the East African Community (EAC). Finally, the book considers how regional integration and cooperation can help to address security and development challenges. This ambitious and broad-ranging book will be a valuable resource for researchers working on African regionalism, security, African integration and development, and comparative regionalism. Policymakers should also consider it a useful guide to the background and contemporary landscape of African regionalism.

dti business person: Bankruptcy, bubbles and bailouts Aeron Davis, 2022-10-18 The Treasury is one of Britain’s oldest, most powerful and secretive institutions, one that has played a central role in shaping the country's economic system. But all too often it has escaped public scrutiny when it comes to investigating the ups and downs of the UK economy. When portrayed, it is usually as a bedrock of government stability in times of crisis, repeatedly rescuing the nation’s finances from the hands of posturing politicians and the combustions of world financial markets. However, there is another side to the story. In between the highs there have been many lows, from botched privatizations to dubious private finance initiatives, from failing to spot the great financial crisis to facilitating ever-growing inequalities. Davis’s book goes behind the scenes to offer an inside history of the Treasury, in the words of the chancellors, advisors and civil servants themselves. It shows the shortcomings as well as the successes, the personalities and the thinking which have shaped Britain’s economy since the mid-1970s. Based on interviews with over fifty key figures, it offers a fascinating, alternative insight on how and why the UK economy came to function as it does today, and why reform is long overdue.

dti business person: Public Employment Services and European Law Mark Freedland FBA, Paul Craig QC FBA, Catherine Jacqueson, Nicola Kountouris, 2007-09-27 How can the EU's community of welfare states adapt their public policies to economic globalization? What happens when the economic and social aims of the EU come into conflict? This book examines the developing legal regimes and regulation of public services in the UK and other European countries. Public services are examined though a case-study of the complex area of public employment services. These are job-placement and vocational training services which aim to maximize employment and minimize unemployment within EU member States' Active Labour Market policies. Employment services are at the centre of a complex web of rules in both hard and soft forms of law deriving from the EU, national public law and from private, and at times contractual, agreements. They also lie at the crossroads of a series of trends in regulation, and priorities have been inspired by an array of conflicting policy rationales. These policy rationales include the establishment of an open and competitive European internal market, the establishment of an efficient welfare state, the scaling down of state administrative machinery, the fulfilment of core public service responsibilities, and the creation of public-private partnerships. Public employment services provide a highly informative and novel case study of the interaction and conflict between the economic and social aims of the EU and between regulation at national and supranational levels, and the changing forms which this regulation has taken.
