ferguson business account: The Path to Power Robert A. Caro, 2011-11-23 The Years of Lyndon Johnson is the political biography of our time. No president—no era of American politics—has been so intensively and sharply examined at a time when so many prime witnesses to hitherto untold or misinterpreted facets of a life, a career, and a period of history could still be persuaded to speak. The Path to Power, Book One, reveals in extraordinary detail the genesis of the almost superhuman drive, energy, and urge to power that set LBJ apart. Chronicling the startling early emergence of Johnson's political genius, it follows him from his Texas boyhood through the years of the Depression in the Texas hill Country to the triumph of his congressional debut in New Deal Washington, to his heartbreaking defeat in his first race for the Senate, and his attainment, nonetheless, of the national power for which he hungered. We see in him, from earliest childhood, a fierce, unquenchable necessity to be first, to win, to dominate—coupled with a limitless capacity for hard, unceasing labor in the service of his own ambition. Caro shows us the big, gangling, awkward young Lyndon—raised in one of the country's most desperately poor and isolated areas, his education mediocre at best, his pride stung by his father's slide into failure and financial ruin—lunging for success, moving inexorably toward that ultimate "impossible" goal that he sets for himself years before any friend or enemy suspects what it may be. We watch him, while still at college, instinctively (and ruthlessly) creating the beginnings of the political machine that was to serve him for three decades. We see him employing his extraordinary ability to mesmerize and manipulate powerful older men, to mesmerize (and sometimes almost enslave) useful subordinates. We see him carrying out, before his thirtieth year, his first great political inspiration: tapping-and becoming the political conduit for-the money and influence of the new oil men and contractors who were to grow with him to immense power. We follow, close up, the radical fluctuations of his relationships with the formidable "Mr. Sam" Rayburn (who loved him like a son and whom he betrayed) and with FDR himself. And we follow the dramas of his emotional life-the intensities and complications of his relationships with his family, his contemporaries, his girls; his wooing and winning of the shy Lady Bird; his secret love affair, over many years, with the mistress of one of his most ardent and generous supporters . . . Johnson driving his people to the point of exhausted tears, equally merciless with himself . . . Johnson bullying, cajoling, lying, yet inspiring an amazing loyalty . . . Johnson maneuvering to dethrone the unassailable old Jack Garner (then Vice President of the United States) as the New Deal's "connection" in Texas, and seize the power himself . . . Johnson raging . . . Johnson hugging . . . Johnson bringing light and, indeed, life to the worn Hill Country farmers and their old-at-thirty wives via the district's first electric lines. We see him at once unscrupulous, admirable, treacherous, devoted. And we see the country that bred him: the harshness and "nauseating loneliness" of the rural life; the tragic panorama of the Depression; the sudden glow of hope at the dawn of the Age of Roosevelt. And always, in the foreground, on the move, LBJ. Here is Lyndon Johnson—his Texas, his Washington, his America—in a book that brings

us as close as we have ever been to a true perception of political genius and the American political process.

ferguson business account: *Close Call* J. M. Gregson, 2018-09-01 There's nothing like a murder to shake up a quiet neighborhood in this British procedural that delivers what fans of the genre want (Booklist). Gurney Close, a recently-built development in Gloucestershire, includes three charming houses and bungalows overlooking the river Wye. Moving into these new homes are three married couples and a divorcee, all of whom are eager to get acquainted through a little block party. But the next morning, one of the new neighbors—affable, ordinary Robin Durkin—is found brutally murdered. Apart from his devastated wife, he was surrounded by perfect strangers. Or was he? As Superintendent John Lambert and Detective Sergeant Bert Hook investigate, they discover that each neighbor had ties with the victim. And they're far from perfect. Including Durkin himself. Unearthing Durkin's past exposes a dirty little enclave of blackmail, vengeance, and adultery. But who, among these seemingly friendly faces, knew Durkin's darkest secret—and was driven to murder him to keep it hidden?

ferguson business account: *Drums of War, Drums of Development: The Formation of a Pacific Ruling Class and Industrial Transformation in East and Southeast Asia, 1945-1980* Jim Glassman, 2018-08-13 In *Drums of War, Drums of Development*, Jim Glassman analyses the geopolitical economy of industrial development in East and Southeast Asia during the Vietnam War era, showing how it was shaped by the collaborative planning of US and Asian elites. Challenging both neo-liberal and neo-Weberian accounts of East Asian development, Glassman offers evidence that the growth of industry (the 'East Asian miracle') was deeply affected by the geopolitics of war and military spending (the 'East Asian massacres'). Thus, while Asian industrial development has been presented as providing models for emulation, Glassman cautions that this industrial dynamism was a product of Pacific ruling class manoeuvring which left a contradictory legacy of rapid growth, death, and ongoing challenges for development and democracy.
