fly tap business class: Travelogues and Reflections Laszlo Gyermek, 2015-07-24 This book is about the travels of Laszlo Gyermek, MD, PhD, a retired physician and researcher who has immigrated to the USA from Hungary in 1957 after the defeat of the uprising against the Soviet occupation and oppression of his native country. The source of his travelogues has been the numerous trips he has taken from the United States to more than sixty countries, particularly in the last three decades, which encompass mostly recreational trips/vacations, reflecting the authors wide-ranging interests in geographic and cultural explorations all over the world, but particularly in Europe, where he has established two regional residences: one in Southern France in 1983 and another one in Budapest, Hungary, in 2000. From these bases he originated many of these trips. The book is narrated in a unique, perhaps scattered and unusual, style, considering the many destinations in different time frames, often repeatedly, and covering the common, practical aspects of today's travels into foreign lands: from ticket purchases to challenges during travel-e.g., jet lag and other health problems. There is varied information from many social, economical, educational, and artistic aspects about many European countries first and, in the second half of the book, encountered in several overseas countries on five continents. The last part of the book deals with episodes in selected cities in the United States and abroad, often with a humoristic veneer. In essence, the reader is presented with a lot of material and with analytically aspired, but often critical and subjective, stories. Still, the author believes that the contents are worth going through and pondering about.

fly tap business class: Legacies of the Portuguese Colonial Empire Nuno Domingos, Elsa Peralta, 2023-06-15 Decolonization represented the end of colonial rule, but did not eradicate imperial and colonial categories and mythologies. Situated in the wider context of European colonial legacies, this book looks at the legacies of the Portuguese empire in today's Portugal. Using an interdisciplinary agenda, with contributions from experts in the fields of history, anthropology, literature, and sociology, the several case studies included in the volume look at a wide range of colonial legacies. These include a set of commemorative practices that feed on imperial mythologies, old colonial and racial classifications that condition citizenship rights, and post-imperial modes of

culture consumption. Legacies of the Portuguese Colonial Empire is the first book written so far in English on this topic, enabling the Portuguese case to enter into a broader dialogue with other national experiences relating to the legacies of colonialism and empire in today's Europe.

fly tap business class: Flying Canucks Peter Pigott, 1996-07-25 Flying Canucks tells the fascinating story of aviation in Canada through this collection of 37 biographies of important aviators in our nation's history. As early as 1908, having read the Wright brothers' invention, Alberta farm boys and mechanics in Quebec villages were constructing large kites, attempting to fly them. Within a decade, Canadian air aces, like Bishop and Barker, swept the wartime skies over Frances, piloting deadly machines in mortal combat. Through the 20s, that very Canadian breed of adventurer, the bush pilot, ventured over the desolate tundra, delivering medicine and missionaries, mail and Mounties to remote communities as far as Ellesmere Island and Ungava Bay. Members of the Royal Canadian Air Force fought with distinction during the Second world War. Titles such as The Saviour of London and The Angel of Ceylon seem like wartime hype, but the skill and courage that those pilots displayed half a century ago set them apart still. For the six Canadian airmen who won the Victoria Cross, there were thousands who flew into the meat grinder that was the Allies' strategic air offensive over Europe. This book chronicles the exploits of only a few men and women - but it truly celebrates the spirit and resolve of countless brave Canadians who are proud part of aviation in this country.

Subcommittee on Rural Development, Entrepreneurship, and Trade, 2010 The subcommittee has called this hearing so that members might learn more about coal ash, the small businesses that turn coal ash into useful products and the concerns that these businesses have about the proposed Federal regulations that they believe may have a negative effect on their industry ... The EPA has recently issued two proposals for regulating coal ash. One would regulate coal ash as a solid waste and would provide very limited Federal enforceability and may not provide adequate protection of the environment and human health. The other would list coal ash as a special waste under the Hazardous Waste Subtitle in the Resource Conservation and Recovery Act, Subtitle C. The second option is one that we will focus on ... since it has generated great concerns among small businesses across this country. These businesses, many of which are represented here today, have reason to believe that regulating coal ash under Subtitle C, even as a special waste, will open recycling operations to added litigation and a stigma that will discourage the ... use of the products made with recycled coal ash.--P. 1-2.
