global business today 12th ed: Management and Resilience of African Organizations in Times of Crisis Shani D. Carter, Sara Bensal, 2024-05-16 Businesses in African countries continued to face crises due to COVID-19, supply chain, and climate change. Governments can take steps to increase businesses' resilience by supporting and promoting sustainable development. In turn, businesses can increase their resilience by promoting the resilience of their employees. This book explores the current state of management and resilience in African nations and discusses issues that revolve around its reciprocal impact on global business, government, and society. Featuring select papers from the 4th Annual Current Business Issue in African Countries (CBIAC) Conference held in Agadir, Morocco in 2023, this book focuses on the synergies between climate change, supply chain and sustainable development, particularly post pandemic featuring content from business and NGO leaders, faculty, and students. The impetus of the CBIAC conference was the discussions held at the United Nations Conference on Trade and Development (UNCTAD) held in Nairobi, Kenya in July 2016 and in Bridgetown, Barbados, and Geneva in October. The goal of the conference is to create long-term collaborative relationships between business leaders, faculty, researchers, students, and community members from different African nations.

global business today 12th ed: Corporate Security Surveillance Richard J. Chasdi, 2024-03-05 In a world of globalization and technological change, terrorism continues to pose grave threats not only to more traditional targets such as civilians and government targets, but according to many experts, increasingly to multinational corporations and other international economic enterprises. This book broadens the understanding of the threats posed to the private sector thereby helping business executives in charge of security affairs prepare for new threats and unconventional threats in a continuously evolving world. Chasdi's Terrorist Assault Business Vulnerability Index (TABVI) now provides C-class executives with a way to measure (potential) host country and host country industry vulnerability and thus contributes a critical new standard to help appraise where and when MNCs and other international enterprises should marshal Foreign Direct Investment (FDI) and other resources. In addition, his statistical findings about different country operational environments work to frame TABVI findings and provide in-depth understandings of risk in several different (potential) host countries. While the focus is on traditional terrorist groups and criminal syndicalist organizations that use terrorism in particular developing world host countries, Chasdi's research also informs the business community about the context of political issues of contention defined by terrorist groups and their constituent supporters. Business leaders, government officials at national and local government levels, the academic community, and the media benefit from ideas proposed in this book. Brian M. Jenkins writes a carefully reasoned, comprehensive, and insightful Foreword that

describes the importance of this topic; about Chasdi, he writes, ...I am an admirer of his uniquely imaginative approaches and always rigorous analysis. His work is invariably intellectually challenging and thought provoking. Read on.
