Globetrotting Shopaholics departs from this current discourse by examining both consumption venues and the cultural, political and social reasons why we consume. It elucidates international trends in consumption politics, and how they impact the creation of consumer spaces, which, in this book, takes the form of numerous global loci including Canada's West Edmonton Mall, Japanese theme parks, shopping venues in the Philippines, and expat boutiques in Budapest. Using a wide range of epistemological frameworks including cultural ethnography, historical analysis, literary theory, sociological dissection, anthropological examination, and philosophical ruminations, this collection conveys how material objects and lifestyles are accumulated and represented internationally, and how consumer goods and spaces define who we are as human beings.

Camillo, 2015-06-03 The ongoing progress of globalization has created a new need in multinational and international companies for managers who have the skills and competencies to be rotated anywhere in the world. unfortunately, lack the technical skills in financial analysis to succeed in this role. Now, respected HR management educator Dr. Steven Director addresses this skill gap head-on. Writing from HR's viewpoint, Director covers everything mid-level and senior-level HR professionals need to know to formulate, model, and evaluate their HR initiatives from a financial and business perspective. Drawing on his unsurpassed expertise working with HR executives, he walks through each crucial financial issue associated with strategic talent management, including the quantifiable links between workforces and business value, the cost-benefit analysis of HR and strategic financial initiatives, and specific issues related to total rewards programs. Unlike finance books for non-financial managers, *Financial Analysis for HR Managers* focuses entirely on core HR issues, including: How do you model HR's financial role in corporate strategic initiatives such as the introduction of a new product line? How do you select bonus drivers to send the right signals to managers? How do you design compensation packages that are fully consistent with your goals? How do you identify and manage pension-finance costs and risks that can dramatically impact the long-term financial health of the business?
