Understanding Business Structures

Before diving into the specifics of how business owners pay themselves, it is essential to understand the different business structures that exist. The method of compensation can vary significantly based on whether a business is structured as a sole proprietorship, partnership, limited liability company (LLC), or corporation.

Sole Proprietorships

In a sole proprietorship, the owner is personally liable for all debts and obligations of the business. Compensation in this structure is

straightforward: the owner typically takes draws from the business profits. These draws are not technically considered a salary and do not incur payroll taxes, but owners should keep track of these withdrawals for tax purposes.

Partnerships

Similar to sole proprietorships, partners in a partnership share profits and losses according to their partnership agreement. Payments to partners are often made as distributions of profits rather than formal salaries. Each partner's compensation may vary based on their contribution and the terms agreed upon in the partnership contract.

Limited Liability Companies (LLCs)

LLCs can choose to be taxed as a sole proprietorship, partnership, or corporation. Owners, also known as members, can pay themselves through draws, similar to sole proprietorships, or through salaries if the LLC opts for corporate taxation. This flexibility allows LLC owners to structure their compensation to align with their financial and tax strategies.

Corporations

Corporations offer more structured compensation options. Owners, typically referred to as shareholders or employees, can pay themselves a salary and may also receive dividends from profits. Salaries are subject to payroll taxes, while dividends are taxed differently, which can be beneficial for tax planning.

Methods of Paying Yourself

Business owners have several methods to pay themselves, and the choice often depends on the business structure and financial situation. Understanding each method's advantages and disadvantages is crucial for effective financial management.

Salaries

One of the most common ways for business owners to pay themselves is through a salary. This method involves setting a regular pay rate, similar to how

employees are compensated. Salaries provide a consistent income stream and are subject to payroll taxes, which can make tax planning more straightforward.

Draws

For sole proprietorships and some LLCs, taking draws is a common practice. Draws are taken directly from the business profits and do not require payroll processing. However, owners must ensure that the business has sufficient profits to support these draws to avoid cash flow issues.

Distributions

In partnerships and LLCs, owners often take distributions from the business's profits. These distributions can be made at various intervals and are typically based on the partnership agreement or the LLC's operating agreement. It's important to document these distributions accurately for tax purposes.

Dividends

Corporations can pay dividends to their shareholders. Dividends are a way to distribute profits but are only paid when the company has sufficient earnings. Unlike salaries, dividends are not subject to payroll taxes, which can result in tax savings for the owner. However, they are taxed at the shareholder level, which requires careful financial planning.

Tax Implications

Understanding the tax implications of how business owners pay themselves is essential for effective financial management. Each method of compensation carries different tax responsibilities, which can impact the overall financial health of both the owner and the business.

Payroll Taxes

Salaries are subject to payroll taxes, which include Social Security and Medicare taxes. Business owners must withhold these taxes from their pay and remit them to the IRS. This can create a more predictable tax scenario but

may also increase the overall tax burden.

Self-Employment Taxes

Owners who take draws or distributions are typically subject to self-employment taxes, which can be higher than payroll taxes depending on income levels. It is vital for owners to set aside sufficient funds to cover these tax liabilities, as they are calculated based on the total business profit.

Tax Planning Strategies

Effective tax planning strategies can help business owners minimize their tax liabilities. This may include determining the optimal balance between salary and dividends or utilizing retirement accounts to defer taxes. Consulting with a tax professional can provide tailored strategies to enhance tax efficiency.

Determining Your Compensation

Determining how much to pay oneself is a critical decision for business owners. Various factors influence this decision, including business profitability, industry standards, and personal financial needs.

Assessing Business Profitability

Before setting a salary or deciding on draws, business owners should assess their company's profitability. A thorough understanding of cash flow and profit margins will help ensure that the chosen payment method is sustainable.

Industry Standards

Researching industry standards for compensation can provide valuable benchmarks. Understanding what similar businesses pay their owners can guide decision-making and help ensure that compensation is competitive and fair.

Personal Financial Needs

Personal financial needs should also play a role in determining compensation. Owners must evaluate their living expenses and financial goals to ensure that their compensation aligns with their personal financial requirements.

Best Practices for Business Owners

To ensure that the process of paying oneself is effective, business owners should adhere to best practices that promote financial stability and compliance.

- Maintain accurate financial records to track compensation and taxes.
- Consult with financial and tax professionals for tailored advice.
- Regularly review compensation strategies as the business evolves.
- Ensure that compensation methods align with the business structure.
- Plan for tax liabilities by setting aside funds regularly.

Conclusion

Understanding how business owners pay themselves is vital for effective financial management and long-term success. By exploring various compensation methods, tax implications, and best practices, owners can make informed decisions that support their financial health and align with their business goals. Whether through salaries, draws, distributions, or dividends, a well-thought-out compensation strategy can lead to a more stable and prosperous business environment.

how business owners pay themselves: *The Art of the Exit* Jacob Orosz, 2022-11-07 Written by Jacob Orosz, one of the M&A industry's leading authorities and host of the #1 podcast on mergers and acquisitions - M&A Talk. Jacob is president of Morgan & Westfield, a nationwide M&A firm, and author of five books on M&A - *The Art of the Exit*, *A Beginner's Guide to Business Valuation*, *The Exit Strategy Handbook*, *Closing the Deal*, and *Acquired*. Jacob has 20+ years of M&A experience and has valued and sold hundreds of businesses. Less than a third of businesses on the market actually change hands. So what does this mean for you? Think about it — with a significant amount of your wealth tied up in your business, planning your exit is one of the most critical decisions you'll make. *The Art of the Exit* contains winning strategies I've learned from 20 years in the trenches selling businesses. This definitive guide is broken down into 10 simple steps from preparing your business for sale to orchestrating the closing. This handbook contains essential tips for owners of both Main Street and lower middle-market businesses valued at \$500,000 to \$10 million. This size range tends to be a no-man's land for business owners when it comes time to sell. That's because most business brokers work on smaller transactions, while investment banks are accustomed to handling larger transactions. Another challenge for businesses of this size is that the potential purchaser can be either an individual or a corporate buyer such as a competitor, private equity firm, or other company. The problem here is that the marketing strategies, negotiating tactics, and processes can vary significantly depending on the buyer most likely to purchase your business. MY STORY Twenty years ago, when I began helping entrepreneurs sell their businesses, I scoured the market for useful information. In doing so, I discovered that most of the available literature didn't address the real-world problems I encountered. Rather, it was theoretical or directed at large, publicly traded companies. It's difficult finding valuable, actionable information for companies in this size range. This book is loaded with proven strategies on the art and science of selling any business. I walk you through the entire sales process from preparing your business for sale to the closing and reducing risk every step of the way. You'll receive solutions and proven guidance based on my decades of experience helping entrepreneurs sell their businesses for top dollar. The sale of your

business will be one of the most stressful events in your life. Don't go it alone. What's Covered in the Book - Statistics on how long it takes to sell a business - A framework for helping you decide whether to sell your business - Guidance on informing and retaining your employees - Lessons learned for building a highly sought-after business based on dealing with thousands of buyers - Advice on building your deal team - including an attorney, broker, and M&A advisor - A concise breakdown of the most common valuation methods and concepts - A simple yet effective model for increasing the value of your business - Recommendations on financing the sale and minimizing the risk of a default - A synopsis of the four types of buyers, what they're looking for, and their goals - Tips for maintaining confidentiality throughout the process - A detailed analysis of the letter of intent and its key clauses - A prescription for maximizing negotiating leverage - A strategy for maximizing the price and terms - Advice on preparing for and minimizing risk during due diligence - Tips for negotiating the purchase agreement and transaction structure

how business owners pay themselves: Doing Business 2017 World Bank, 2016-10-25 Fourteenth in a series of annual reports comparing business regulation in 190 economies, Doing

Business 2017 measures aspects of regulation affecting 10 areas of everyday business activity: • Starting a business • Dealing with construction permits • Getting electricity • Registering property • Getting credit • Protecting minority investors • Paying taxes • Trading across borders • Enforcing contracts • Resolving insolvency These areas are included in the distance to frontier score and ease of doing business ranking. Doing Business also measures features of labor market regulation, which is not included in these two measures. This year's report introduces major improvements by expanding the paying taxes indicators to cover postfiling processes—tax audits, tax refunds and tax appeals—and presents analysis of pilot data on selling to the government which measures public procurement regulations. Also for the first time this year Doing Business collects data on Somalia, bringing the total number of economies covered to 190. Using the data originally developed by Women, Business and the Law, this year for the first time Doing Business adds a gender component to three indicators—starting a business, registering property, and enforcing contracts—and finds that those economies which limit women's access in these areas have fewer women working in the private sector both as employers and employees. The report updates all indicators as of June 1, 2016, ranks economies on their overall “ease of doing business†”, and analyzes reforms to business regulation †” identifying which economies are strengthening their business environment the most. Doing Business illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced in partnership by the World Bank Group that garners worldwide attention on regulatory barriers to entrepreneurship. More than 137 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground. In addition, the Doing Business data has generated over 2,182 articles in peer-reviewed academic journals since its inception.
