highland business: *Small business workforce development consortia provide needed services.* , 2001 In each of the four communities we visited, consortia were formed in response to individual community economic and workforce development needs. In some locations, these needs were identified and examined through formal studies on the community's workforce conditions and future economic challenges. For example, in Charlotte, North Carolina, business leaders working with other community organizations sought to identify strategies to continue the business growth of the area while exploring potential weaknesses in the local economy. In these communities, local public and private organizations joined together to address existing and emerging workforce development Issues. Consortia varied somewhat in membership and activities according to their area's needs and resources but were characterized by a strong business focus. Consortia were typically lead by one or two key organizations, such as the chamber of commerce and community college. Other consortia members often included local school districts, workforce investment boards, business and trade associations, and unions. In three of the four locations we visited, officials from consortia organizations had established intermediary entities to help link all consortium organizations and to act as a broker or provider of services.

highland business: In the Shadow of Ben Nevis Ian Sykes, 2016-02-15 In 1959, sixteen-year-old Ian 'Spike' Sykes left school and, after a short period of work at Leeds University, joined the RAF. Already a keen climber, he signed up on the promise of excitement and adventure and was posted to the remote RAF Kinloss Mountain Rescue Team in the north of Scotland. It was the beginning of a journey which would see him involved in some of the most legendary call-outs in Scottish mountain rescue history, including the 1963 New Year tragedy on the Isle of Skye. In the Shadow of Ben Nevis tells Spike's story from growing up in Leeds in the aftermath of the Second World War, to his time with the RAF during the cold war. After leaving the RAF, he remained an active member of the Lochaber Mountain Rescue Team and was involved in the first lower down the north face of Ben Nevis - an epic 1,500-foot descent to rescue stricken climbers in the middle of winter. Following a two-and-a-half-year stint on Antarctica with the British Antarctic Survey, he returned to the Highlands and opened the first Nevisport shop with his close friend Ian 'Suds' Sutherland. Together, they brought Sunday trading to Fort William and were one of a small number of shops to revolutionise outdoor retail in the UK. Later, he was a key player in the development of the Nevis Range ski area. Over many years, and against all odds, the project became a reality and a great success. Recounted within these pages are a great many lively tales of adventures and mishaps, told with immediacy and charm. With a foreword by legendary Scottish mountaineer Hamish MacInnes, a close friend of Spike's, In the Shadow of Ben Nevis is a must-read for anyone with an interest in Scottish mountaineering and mountain rescue.

highland business: Rural Poverty Today Mark Shucksmith, Jayne Glass, Polly Chapman, Jane Atterton, 2023-02-22 Poverty is perceived as an urban problem, yet many in rural Britain also experience hardship. This book explores how and why people in rural areas experience and negotiate poverty and social exclusion. It examines the role of societal processes, individual circumstances, sources of support (markets; state; voluntary organisations; family and friends) and the role of place. It concludes that the UK's welfare system is poorly adapted to rural areas, with the COVID-19 pandemic, Brexit and cutbacks exacerbating pressures. Voluntary organisations increasingly fill gaps in support left by the state. Invaluable to those in policy and practice, the book recommends a combination of person-based and place-based approaches to tackle rural poverty.

highland business: Emigration from Scotland between the wars Marjory Harper, 2017-03-01 Emigration from Scotland has always been very high. However, emigration from Scotland between the wars surpassed all records; more people emigrated than were born, leading to an overall population decline. Why was it so many people left? Marjory Harper, whose knowledge is grounded in a deep understanding of the local records, maps out the many factors which worked together to cause this massive diaspora. After an opening section where the author sets the Scottish experience within the context of the rest of the British Isles, the book then divides the country geographically, starting with the Highlands, then coastal Scotland, and the urban Lowland highlighting in turn the factors that particularly influenced each of these areas. Harper then discusses the organised religious and political movements that encouraged emigration. By interweaving personal stories with statistical evidence Harper brings to life the reality behind the dramatic historical migration.

Rodriguez has assembled a new collection of essays that finally provides the historical context necessary to understand the Latin American military. The articles included here examine a variety of time periods and nations, from the counterinsurgency army of New Spain, to the nineteenth-century War of the Pacific, to the modern relationship between the military and development. The contributors look at the ways in which Latin America's armed forces have changed over time, and how external threats as well as internal rivalries have shaped the military. Together, these essays trace the roots of the military's power and the growth of its political influence.

highland business: *Walking Twin Cities* Holly Day, Sherman Wick, 2013-04-22 Even though they're often lumped together, the Twin Cities are two distinct cities with very different histories. Minneapolis is the Mill City, the City of Lakes, composed mostly of flat prairies. St. Paul is the Capital City, built on rolling hills and high river bluffs. Culturally, the cities have their differences, too. Minneapolis is home to world-renowned theatres and modern art galleries, while St. Paul is the home of many of the state's institutions, from the seat of government to the seat of the Roman Catholic Archdiocese of St. Paul and Minneapolis. Minneapolis is a newer city, which is reflected in the architecture and overall vibe, while St. Paul's older neighborhoods feature some of the most intact Victorian-era houses in the country. Because of their locations on the west and east sides of the Mississippi River, critics say that Minneapolis is more like a modern West Coast city, while St. Paul is akin to a historic East Coast city. Both cities are linked by the Mississippi River--the same force that shaped their origins. St. Paul developed earlier, mostly because it was more easily accessible via the river. Another similarity between the two cities is the foresight by the Victorians who succeeded the cities' founders to invest money into their communities--both cities set aside large tracts of land for public use all along the rivers and lakes. Some of the most beautiful parks were plotted in the early days of the cities. Even today there are big differences between the cities. For example, St. Paulites, gluttons for punishment, host the annual Winter Carnival during the

coldest time of the year. Minneapolitans take the easy way out by celebrating the Aquatennial Festival each summer. Despite having their city festivals at opposite ends of the solstice, Minnesotans love the outdoors. Even with the notoriously fierce winters, Minnesotans statistically spend more time outside than most. Whether you're interested in art, culture, history, or nature, there's a walk in this book designed for your interests. We hope that it serves not only as a guidebook for (re)discovering the Twin Cities, but as a springboard for additional explorations. This book contains 35 walks of varying levels of difficulty, built around the natural, architectural, and historical attractions of Minneapolis and St. Paul. The downtown areas of both cities are explored in depth, as well as many of the neighborhoods, scenic parks, and lakes that are scattered through the area.
