Lewin, 2016-01-05 No case is too small—or too strange—for the Lunghi family detective agency For the Lunghis of Bath, England, detecting is best discussed around the family dinner table; everyone gets a say. The various members of the Lunghi family are old and cantankerous, young and bolshie, responsible, clever, and even artistic. But relentless curiosity is the one quality they all possess. The Lunghi Detective Agency's latest client, pretty, thirty-something Eileen Shayler, suspects that her husband, Jack Shayler, is in terrible trouble. Jack failed to return the bottle of dishwashing liquid to its proper place under the sink. Thus, he could be having an affair. Or he has a gambling problem and owes money to his bookie. When the case suddenly collides with several others, the Lunghis will find themselves knee-deep in an unsolved murder, a mysterious stakeout, and some damning personal secrets.

howard business: The Business of Reading Julian Lovelock, 2022-02-24 In *The Business of Reading*, Julian Lovelock charts the development of the English novel over the past hundred years. Smuggling in titles from Scotland, Ireland and the Caribbean, he focuses on twenty texts written since the end of the First World War, some well-known but others less so, placing them in their historical context. Novelists represented range from D.H. Lawrence, E.M. Forster and Virginia Woolf, through Graham Greene, Kingsley Amis and Iris Murdoch, to such contemporary writers as Ian McEwan, Maggie O'Farrell and Graham Swift. Written in a lucid style that reflects his expertise and enthusiasm, Lovelock's innovative selection, perceptive analysis and lightness of touch will appeal to the general reader, the book club member and the student. He argues that our response as readers is an important part of the creative process, and while he mainly avoids the critical 'isms' that have characterised recent academic debate, he introduces such concepts as intertextuality, metafiction and the role of the often unreliable narrator, showing how an appreciation of the way the language of fiction works can only add to our understanding and enjoyment.

howard business: Radicalized Real Estate Agents and the Rise and Resilience of the Australian Policy for Real Estate Carry John S. F. Wright, 2025-08-21 This is a book about policy change that focusses on a single case study: the rise and resilience of the Australian policy for Real Estate Carry. The text tracks investments of meaning and identity in the Australian policies for Negative Gearing (1987) and the Capital Gains Tax Discount (1999), through which successive federal governments inadvertently created scope for a dangerous and inefficient Real Estate Carry Trade in the housing sector that has proven resilient to reform for a quarter century. Considering that Carry Trades inevitably create the conditions for their own collapse, the historical failure of Australian governments to achieve policy change is a serious issue for the country going forward. As they attempt to make their housing sector more stable, sustainable and equitable, Australian people may need to prepare for potentially dramatic changes to their economic and monetary system. The book also raises important implications for understanding the nature and workings of policy change in Australian politics and beyond. It is a valuable resource for scholars and students of political theory, public policy and Australian politics as well as policy practitioners, third sector groups and political parties interested in Australian and international housing policy.

howard business: A Technical and Business Revolution Elizabeth Hitz, 2017-05-18 This title,

first published in 1986, develops the story of American woollen manufacture reaching far back in time to establish the very traditional nature of the fabrication of woollen cloths. Although traditional techniques changed slowly, particularly in England, circumstances and conditions changed rapidly in the United States during the Napoleonic Wars. Americans had more surplus capital to invest; they had abundant natural resources; and many American merchants and manufacturers sought independence from European goods and services. This title will be of interest to students of economic and American history.
