the Pace of India's development depends to a large extent on its ability to implement the latest global manufacturing and the information and communication technologies and increase its competitiveness in the international market. In the developing countries world-wide, in recent times, manufacturing is taking over agriculture which in turn has led to the explosive growth of the service sector, especially in the fields of financial services, information and communication technologies, insurance, education and health. India's service sector has already become the dominant contributor to GDP, accounting for 46 per cent of the total. Based on the information gathered from case studies, fact sheets and a range of self-assessment tools, and the authors' interaction with academicians, bureaucrats, business executives and industrial experts, this book attempts to bring together the best management practices and provides the readers with a toolkit of practical advice. This book projects the hypothesis that no matter what the size or industry sector a company belongs to, there are a few tactics towards successful management which if adopted can phenomenally improve its global competitiveness.

icici business banking: The Unusual Billionaires Saurabh Mukherjea, 2016-08-17 What makes a company truly outstanding? What is the secret sauce of delivering successful results over multiple decades? What is common to Asian Paints, HDFC Bank, Axis Bank, Marico, Berger Paints, Page Industries and Astral Poly? They are Unusual Companies, built by Unusual Billionaires. This book tells the story of these seven companies, handpicked out of 5000 listed on the stock exchange. Built by visionary business leaders, they have delivered outstanding results for a decade and more. How did these companies do it? Why couldn't this be replicated by other companies? What are they doing differently? Saurabh Mukherjea, bestselling author of *Gurus of Chaos*, delivers an exceptional book with lessons to learn from these seven businesses. Mukherjea tells you why focusing on the core business is central to corporate success and how a promoter giving up control to the top management could be a boon. He also explains how investors can generate market-beating investment returns from identifying companies such as these using a simple set of metrics. Packed with these learnings are riveting corporate stories of how Hindustan Unilever made an aggressive bid to buy Harsh Mariwala's business, but had to sell a business to him in a few years, or how Page Industries found an innovative way to stop unionization at their manufacturing units. Other stories include the turnaround of Axis Bank and the boardroom coup that led to its chairman's exit and how Vijay Mallya sold Berger Paints to the Dhingra brothers. This book is mandatory reading for anyone who wants to understand how business is done successfully in India.

icici business banking: Services Marketing C. Bhattacharya, 2009 While most books on marketing and services are readable, very few take the student's viewpoint and set out to answer the question Is it understandable? in the affirmative. This book and its pedagogy has been designed precisely with this in mind: v Design: The book has a consistency of design that is innovative, with aesthetic appeals. v Opening and Closing Cases: Every chapter begins and ends with a case. The cases introduce the primary theme and issues discussed in the chapter and closes with analytical tasks for the students. The cases are original, pertaining to Indian situations, companies and protagonists, helping the Indian students to connect. v Objectives: Every chapter has clear learning expectations, get a glimpse of the chapter context and their respective importance. v End-of-chapter Questions: The questions are many and have been designed carefully to enhance learning for the students. There are elements of research, project work, and academic exercises in them. v Illustrations: The book is generous with pleasing and informative charts, tables and diagrams. v Glossary: The Appendix at the end of the book contains a glossary of services and marketing terminologies. v Marketing models: In addition to the text, the appendix also contains major marketing models mentioned in the text, which are frequently used by the marketers. v How to do cases: The Appendix also contains an useful section for all students a template for case discussion and analysis. There are four parts in the book. Part I takes an overview look at the major differences between services and goods and their characteristics, classifications and different models. It methodically analyses the section on the local, domestic and international conditions and environment factors that have affected services. It also examines the importance of Relationship Marketing in services. Part II examines in-depth the marketing of services. It looks sweepingly and with depth at marketing planning and strategy, service buying behaviour, knowledge management and marketing research in services, and the seven marketing mix variables for services. Part III is about the assessment of service delivery and customer relationship management. Part IV deals exclusively with comprehensive service cases. The cases are in addition to the opening and closing cases. The book lucidly explains the basic concepts of services and marketing and fills a long-standing need of the students for a book on both services and marketing.

icici business banking: Sustainable Excellence Aron Cramer, Zachary Karabell, 2011-09-27 How the world's most influential companies are building business strategies that tackle the biggest global challenges. Today's business landscape is changing in fundamental ways: Natural resources

are growing ever more scarce and expensive. Technology and changing consumer expectations are making transparency a fact of life. The rise of emerging economies creates vast market opportunities for companies--and better living standards for hundreds of millions. In *Sustainable Excellence*, Aron Cramer and Zachary Karabell tell the stories of the companies who are transforming themselves by responding to these paradigm shifts and in the process shaping the future. From their work with these Global 1000 companies, Cramer and Karabell know firsthand how business can successfully grapple with big-picture issues like resource scarcity, supply chain complexities, and the diverse expectations of government and the public. In *Sustainable Excellence*, they tell the story of how Coca-Cola and Greenpeace collaborated on a refrigerator that fights climate change. They show how companies like Best Buy and Nike are transforming the very products they sell to deliver more value to consumers with less waste. They recount how GE and Google created an innovative partnership that is developing smart grids that radically reduce energy use. And they show how business leaders like Starbucks' founder and CEO Howard Schultz put sustainable excellence at the center of his company's business strategy. Through these and other fascinating stories, *Sustainable Excellence* makes the case for a different way of doing business--one that will define both business success and economic vitality in the 21st century.

icici business banking: Supercorp Rosabeth Moss Kanter, 2010-10-01 Throughout her extraordinary career, Professor Rosabeth Moss Kanter has always pushed the boundaries through her high-level field research, and her breakthrough ideas with practical applications for a broad audience. One of the world's bestselling business thinkers, her work on leadership and change management has influenced the most enlightened and successful executives and entrepreneurs. *Supercorp*, based on a three-year worldwide research program, provides the answer to a question crucial to both business and society more broadly: as a company grows, how can it avoid becoming a lumbering, corrupt giant? Companies such as IBM, Procter & Gamble, Mexican-based Cemex and Japanese-based Omron provide the models that businesses small and large can use to stay on track, outstrip the competition, and attract and motivate the new generation of talent. And, Professor Kanter provides the evidence of the powerful synergy between the financial success shareholders want and social conscience - it is only these 'vanguard companies' that are big but human, efficient but innovative, global but local, that will succeed in the future.

icici business banking: Business Czarinas S N Chary, 2015-04-30 *Business Czarinas* features some of the most successful businesswomen in India. Each of their stories is greatly inspiring: their journey to the top; the troubles and obstacles on the way; the opportunities they made the most of; the values they hold dear and the lessons they learnt. Management consultant S.N. Chary interviews nine remarkable women leaders, giving us insight into their work and life. In *Business Czarinas* these women tell us how they fought-at times for space, in a male-dominated environment-against all odds, with courage and strength. Candid, enlightening and full of practical, first-hand wisdom, these powerful stories make this book essential reading for both men and women.

icici business banking: Winning in Emerging Markets Tarun Khanna, Krishna G. Palepu, 2010
About the Book : - The best way to select emerging markets to exploit is to evaluate their size or growth potential, right? Not according to Tarun Khanna and Krishna Palepu. In *Winning in Emerging Markets*, these leading scholars on the subject present a decidedly different framework for making this crucial choice. The authors argue that the primary exploitable characteristic of emerging markets is the lack of institutions (credit card systems, intellectual property adjudication, data research firms) that facilitate efficient business operations. While such institutional voids present challenges, they also provide major opportunities for multinationals and local contenders. Khanna and Palepu provide a playbook for assessing emerging markets potential and for crafting strategies for succeeding in those markets. They explain how to: Spot institutional voids in developing economies, including in product, labour, and capital markets, as well as social and political systems Identify opportunities to fill those voids, for example, by building or improving

market institutions yourself Exploit those opportunities through a rigorous five-phase process, including studying the market over time and acquiring new capabilities Packed with vivid examples and practical toolkits, Winning in Emerging Markets is a crucial resource for any company seeking to define and execute business strategy in developing economies. About the Authors : - Tarun Khanna is the Jorge Paulo Lemann Professor at Harvard Business School and the author of Billions of Entrepreneurs: How China and India Are Reshaping Their Future and Yours. Krishna Palepu is the Ross Graham Walker Professor of Business Administration and senior associate dean for international development at the Harvard Business School.

icici business banking: HDFC Bank 2.0 Tamal Bandyopadhyay, 2019-01-01 FOREWORD BY

NANDAN NILEKANI "Tamal combines his financial knowledge, eye for detail, and an excellent storytelling style to create a vivid portrait of India's most valued bank and its path to the future." NANDAN NILEKANI, Co-founder and Chairman of Infosys and Founding Chairman of UIDAI (Aadhaar) "Tamal has enthusiastically documented the epiphany that HDFC Bank's leadership had in starting out on their digital journey. India is set for seismic changes to day-to-day banking over the next few years and banks who don't commit to fully re-engineering their practice around becoming a

technology company that delivers real-time, contextual banking experiences will wither on the vine. HDFC Bank has made a solid start on this journey, but the final chapter has not yet been written.”

BRETT KING, Founder, Moven and bestselling author of *Bank 4.0* The seeds of change were sown in September 2014, when HDFC Bank MD Aditya Puri went to Silicon Valley to meet the brightest tech minds in the world. By the time he got back, he knew exactly what needed to be done. It was time for a revolution. Instead of waiting to be disrupted by fintech companies, HDFC Bank went all out to disrupt itself, recasting its role and scope on a scale that has never been attempted before. In one of the biggest transformations ever undertaken in any business, HDFC Bank wants to become a platform facilitating a financial experience. Tamal Bandyopadhyay chronicles HDFC Bank’s own digital disruption exercise through the very people who drove it, narrating a story that’s as compelling as unique in India’s financial system. With his keen eye for detail, deep knowledge of banking and unparalleled storytelling ability, Bandyopadhyay recounts the journey of India’s most valued lender from a life cycle bank to a lifestyle bank. TAMAL BANDYOPADHYAY is a bestselling author, award-winning columnist and a keen observer of the Indian banking sector for over two decades.

icici business banking: Banking on Equality Supriti Bezbaruah, 2015-03-24 It may well be surprising to say that the world should look to India as a model of gender equality. India’s banking sector proves the exception, with several women reaching the highest positions in India’s top banks, including the country’s largest bank. Based on interviews and surveys of bank employees in India’s National Capital Region, this book looks at what lies behind the media rhetoric and provides a systematic analysis of patterns of, and responses to, gender inequality in the banking sector in India. The book uncovers how gender discrimination still persists in the banking sector, albeit in covert forms. Through a comparison of nationalized, Indian private and foreign banks, the book demonstrates how the impact of laws, local cultural norms and gendered workplace practices are mediated through different organizational forms in these different types of banks to create varied experiences of gender inequality. The book is one of the first books to provide a thorough, in-depth analysis of women’s employment in the Indian banking sector, currently an under-researched area.

icici business banking: More and Better Jobs in South Asia The World Bank, 2011-12-20 South Asia has created nearly 800,000 jobs per month during the last decade. Robust economic growth in large parts of the region has created better jobs -- those that pay higher wages for wage workers and reduce poverty for the self-employed, the largest segment of the region s employed. Going forward, South Asia faces the enormous challenge of absorbing 1 to 1.2 million entrants to the labor force every month for the next two decades at rising levels of productivity. This calls for an agenda that cuts across sectors and includes improving the reliability of electricity supply for firms in both urban and rural settings, dealing decisively with issues of governance and corruption, making access to land easier for urban informal firms and strengthening transport links between rural firms and their markets. It requires improving nutrition in early childhood to avoid cognitive impairment, intensifying the focus on quality of learning in education systems, equipping workers with the skills that employers demand, and reorienting labor market regulations and programs to protect workers rather than jobs. The continuance of high economic growth to help improve job quality is not assured. But the region s demography can provide a favorable tailwind. The growth of workers exceeds that of dependents in much of the region. The resources saved from having fewer dependents can be shifted to high-priority investments in physical and human capital accumulation necessary to create productive jobs in countries with an enabling policy framework. But the demographic window of opportunity is open for only the next three decades, a fact which lends urgency to the reform agenda. This book will be of interest to policy makers, their advisers, researchers and students of economics who seek solutions, not only to the challenge of creating more and better jobs in South Asia but globally as well. It is the first title in South Asia Development Matters, a new series that will serve as a vehicle for in-depth synthesis of economic and policy analysis on key development topics for South Asia.
