icc business degree: Crimes of Business in International Law Thomas M. Schmidt, 2015-12-31
Die Prävention von Wirtschaftstätigkeit, die zu schwersten Menschenrechtsverletzungen beiträgt, ist für die internationale Gemeinschaft von hoher Bedeutung. Der Verfasser entwirft Wege zur Begründung individueller strafrechtlicher Verantwortlichkeit für das Bereitstellen von Infrastruktur-, Finanz- und sonstigen Mitteln zur Begehung von Verbrechen gemäß dem Römischen Statut des Internationalen Strafgerichtshofs. Das Werk macht dafür grundlegende Beiträge der deutschen Strafrechtswissenschaft fruchtbar und hinterfragt kritisch die Rechtsprechung des Gerichtshofs zu Täterschaft und ziviler Vorgesetztenverantwortlichkeit. Aus menschenrechtlicher Perspektive legt der Autor dar, in welchem Umfang sozial erwünschte wirtschaftliche Betätigung straffrei zu stellen ist. Ein interdisziplinärer Zugriff auf das rechtspolitische Vorhaben einer völkerrechtlichen Unternehmensstrafbarkeit legt den ungelösten Konflikt zwischen konträren Organisationswirklichkeiten als wichtiges Reformhindernis frei.

icc business degree: Global Business Associations Karsten Ronit, 2018-10-26 Global business tends to be perceived as a number of individual but powerful multinational corporations, capable of controlling markets and influencing political decisions; in fact, global business is highly organized through a plethora of associations that bring together competing companies and conflicting national businesses. Indeed, global business associations have a long history and, with accelerated globalization, further opportunities emerge for unified business action. This book fills a significant gap in the current literature, examining the pivotal role of global business associations and providing a concise and accessible overview of their different functions in a range of institutional contexts. Beginning by clarifying the concept of global business associations, the author puts their role into a historical and contemporary context in which their economic, social and political functions are sketched. Their historical origin is outlined, including the proliferation of global associations in the twentieth and twenty-first centuries. He then moves on to explore and analyse the different types of actors, explaining key categories and their place in the organization of global business with chapters on peak associations (e.g. ICC and WEF), industry associations, alliances, as well as clubs and think tanks, and facilitators. Covering the history, current role and future evolution of this dynamic category of associations, this work will be essential reading for students and scholars of international political economy, international relations, international organizations and global governance.

This book examines the current international legal regimes in space law and environmental law in order to ascertain their applicability and efficacy in addressing environmental threats in the space sector. The research suggests mechanisms which could improve environmental protection in the sector and strengthen the environmental element in space law. These mechanisms include a variety of norm-setting strategies used in international environmental management. Special attention is drawn to the potential of environmental impact assessment in the space sector and to dispute resolution procedures. Like other areas of human activities, the space sector should accommodate both economic interests and environmental protection in line with the principle of sustainable development

icc business degree: Arbitration and Mediation in International Business Christian Bühring-Uhle, Lars Kirchhoff, Gabriele Scherer, 2006-01-01 Arbitration and mediation in international business was first published in 1996 and was one of the first comprehensive studies on the practice of international business dispute resolution, covering both international commercial arbitration and the so-called 'alternative' techniques such as mediation. The book also provided an empirical analysis of how both arbitration and mediation are conducted in a crossborder context, along with a normative guide to the relative costs and benefits of these two methods. This second edition is not just an updated version of the first edition but a new book in itself: Benefitting from the contributions of two co-authors, the work has been enhanced by discussions of innovative tools for making settlement negotiations more effective, and by the in-depth analysis of practical

techniques to integrate mediation and arbitration in international business. Also, a comprehensive new empirical survey was conducted in order to capture new trends in this rapidly developing field. The result is a 'must have' resource for anyone having to deal with potential conflict in international business relationships.--Publisher's website.

icc business degree: Business, Human Rights and Transitional Justice Irene Pietropaoli, 2020-05-07 This book considers the efficacy of transitional justice mechanisms in response to corporate human rights abuses. Corporations and other business enterprises often operate in countries affected by conflict or repressive regimes. As such, they may become involved in human rights violations and crimes under international law – either as the main perpetrators or as accomplices by aiding and abetting government actors. Transitional justice mechanisms, such as trials, truth commissions, and reparations, have usually focused on abuses by state authorities or by non-state actors directly connected to the state, such as paramilitary groups. Innovative transitional justice mechanisms have, however, now started to address corporate accountability for human rights abuses and crimes under international law and have attempted to provide redress for victims. This book analyzes this development, assessing how transitional justice can provide remedies for corporate human rights abuses and crimes under international law. Canvassing a broad range of literature relating to international criminal law mechanisms, regional human rights systems, domestic courts, truth and reconciliation commissions, and land restitution programmes, this book evaluates the limitations and potential of each mechanism. Acknowledging the limited extent to which transitional justice has been able to effectively tackle the role of corporations in human rights violations and international crimes, this book nevertheless points the way towards greater engagement with corporate accountability as part of transitional justice. A valuable contribution to the literature on transitional justice and on business and human rights, this book will appeal to scholars, researchers and PhD students in these areas, as well as lawyers and other practitioners working on corporate accountability and transitional justice.
