italian business schools: **Lionello Perera: An Italian Banker and Patron in New York** Diego Mantoan, 2022-09-06 The book presents the long-lost biography of Lionello Perera, principal banker, patron, and philanthropist of the Italian American community in New York at the inception of the twentieth century. Born and raised in Venice, Lionello Perera took over his uncle's financial activity in Wall Street and developed the family business into a stronghold of the Italian American community. His remarkable career led him to become the Vice President of Bank of America in 1928 as an associate of California born Amadeo P. Giannini, while he also was instrumental to the political success of New York mayor Fiorello La Guardia. Recognised as a true founding father of the Italian American community of the East Coast, he supported welfare societies and public hospitals to foster the integration of Italian immigrants. A close friend of star conductor Arturo Toscanini, Lionello Perera and his wife Carolyn Allen Perera turned into influential music patrons for Italian and Jewish musicians. Their unique Art Deco house in the Upper East Side became an epicentre of the New York music world, showcasing the banker's refined art collection that matched the taste of J. Pierpont Morgan and Samuel H. Kress. The book relies on unprecedented archival material rendering justice to the relevance Lionello Perera holds as a contributor to the political, social, and cultural integration of Italians in the USA. It offers an innovative perspective that considers the tight interrelation of Italian Americans of the East Coast with ongoing events in their country of origin. Lionello Perera's life highlights the silent contribution of Italian Americans to change the US banking system and help the integration of Italian immigrants in their new country. Hence, the main audience are students and scholars interested in the history of immigration, banking history, Italian American culture as well as music studies and art history.

italian business schools: **My Twenty Years in Italy** David Scott, 2022-11-02 The author describes how an ignored alarm clock led to meeting the love of his life, and eventually three children. He shares his experiences doing business in the Common Market, communist countries, the Middle East and Africa from 1961 to 1980. This book is based on lengthy Christmas letters widely shared with family and friends annually from 1961 to 1980.

italian business schools: *The Italian Model of Management* Luigi Serio, 2018-04-27 This book is an essential resource for facilitators seeking to help students develop their knowledge of management practice in Italy. It presents a collection of the best case studies and accompanying teaching notes from the Italian Association for Management Development (ASFOR) competition in

2014. The cases are written by teachers across many of the members of ASFOR in Italy, leading business schools, corporate universities and academia. Knowledge gained by professionals often remains implicit and is rarely shared. By grouping together the award-winning case studies in this volume, readers can gain an important insight into how management is conducted in Italy. This collection shines a light on management practices across several industries. The Italian economy differs from others in that it is one in which small and family-run businesses dominate, and the relationship between the private sector and public life is unique. As a result, The Italian Model of Management provides the opportunity for students to enlarge the Anglo-Saxon model and perspective of management, and to offer cross-cultural learning experiences, based on the distinction of a "Made in Italy" competitive advantage. Each case provides an engaging story, plots the strategic development of the organization in question, and is supported by online teaching guidance and teaching notes.

italian business schools: The History and Tradition of Accounting in Italy David Alexander, Stefano Adamo, Roberto Di Pietra, Roberta Fasiello, 2017-07-06 Italian accounting has a long and honourable tradition of theoretical and applied analysis of the accounting and reporting function, perceived and defined much more broadly than in the Anglo-Saxon tradition. The high point of this perhaps, is the creation of what is known as Economia Aziendale (EA). The antecedents, genesis and later developments are presented here in detail by highly knowledgeable specialists in the field. EA takes as a prerequisite the necessity of the business (entity/azienda) to ensure its own long-run survival. This requires that the necessary resources are retained and preserved, so operating capital maintenance, by definition future-oriented, is essential. It requires a focus on the particular business organization, entity-specific and consistent with today's notion of the business model. Entity-specific information relevant to current and future cash flows is a necessary pre-requisite for ensuring long-run survival, which historical cost accounting, or fair value (being market-specific not entity-specific) satisfactorily achieve. Flexibility of valuation and of reporting, always relevant to the specific asset at the specific time in the specific place, is a necessary condition for effective management. This is exactly the focus of EA and its analysis and tradition. Scholars and advanced students of international regulation and accounting, as well as accounting history, will find this an invaluable guide to a vibrant, scholarly tradition of great practical relevance today.

italian business schools: **International Management and Language** Susanne Tietze, 2013-01-11 Globalization processes have resulted in the emergence of business and management networks in which the sharing of knowledge is of crucial importance. Combining two contemporary and important subject areas - namely that of international management and also language and communication in multi-language contexts - the author of this book presents a wealth of ideas, examples and applications taken from international and global contexts, which show that 'language matters' in the pursuit of international business affairs. The book establishes the theoretical core of its main ideas by introducing two orientations (social construction and linguistic relativity) and demonstrates how they can be drawn on to frame and understand the activities of managers. Highly innovative and topical, Susanne Tietze's book will appeal to students of international management and international human resource management as well as those studying intercultural communication. It is also useful for managers and practitioners who work internationally.

italian business schools: *The Italians of New York* Maurizio Molinari, 2012-08-20 An overview of generations of Italians in the Big Apple, weaving together numerous stories from different epochs and different backgrounds. "If you want to learn something about Italian creativity, come to New York. Here, you will find the pride of flying the Italian colors at the Fifth Avenue Columbus Day Parade, the American patriotism of those who perished at Ground Zero, the courage of firefighters and marines on the frontline of the war against terrorism, the babel of dialects at the Arthur Avenue market, portrayals of social change in the writings of Gay Talese, stories of successful business ventures on the TV shows of Maria Bartiromo and Charles Gasparino, political passion in the battles of Mario Cuomo and Rudy Giuliani, creative imagination in the works of Gaetano Pesce, Renzo Piano and Matteo Pericoli, and provocation in the attire of Lady Gaga . . . The Midtown top managers, who

arrived in the past twenty years, operate in the XXI century, while on Fresh Pond Road in Ridgewood the panelle are still prepared according to the Sicilian recipes transmitted from one generation to the next." —From the Introduction

italian business schools: *Management Research* Sabina Siebert, 2017-09-22 Management Research: European Perspectives brings together experts in the field to take stock of European management research and reflect on its distinctiveness. Building on a successful series of papers published in the European Management Journal, this book contains international contributions providing a range of scholarly perspectives on the reality of European management research. The state of management scholarship has recently been a topic of great interest, focusing on such matters as the role of universities versus businesses in shaping research agendas, the so-called 'rigour-relevance' debate, the use of measurements in quality assessment of research outputs, the role of journal rankings, and the merits of the journal review system. Missing, however, is any discussion of what, if anything, constitutes a European approach to management research, how does it differ from other styles used in the rest of the world and why is there a need for such distinctiveness? It has been noted that European management scholars have a lower success rate for publishing theoretical papers than their North American counterparts, which is surprising given that Europe has been the cradle of many generative intellectual traditions. European scholars may be the heirs to those traditions, but they are sometimes criticised for failing to channel this legacy into authoritative theoretical contributions in elite US-based management journals. This book provides insightful contributions to the debate and offers critical reflections on what European-based scholars have to offer the study of management.

italian business schools: *A History of Contemporary Italy* Paul Ginsborg, 2003 From a war-torn and poverty-stricken country, regional and predominantly agrarian, to the success story of recent years, Italy has witnessed the most profound transformation--economic, social and demographic--in its entire history. Yet the other recurrent theme of the period has been the overwhelming need for political reform--and the repeated failure to achieve it. Professor Ginsborg's authoritative work--the first to combine social and political perspectives--is concerned with both the tremendous achievements of contemporary Italy and the continuities of its history that have not been easily set aside.

Maria-Teresa Lepeley, Ernst von Kimakowitz, Roland Bardy, 2017-03-23 Human Centered Management in Executive Education provides a comprehensive insight on innovation in Executive Education with a unique global scope. The book integrates studies and experiences of 32 distinguished scholars from 15 countries who are working in the development of theories and practices to advance the human centered management paradigm, sustainability-based quality standards and continuous improvement in education. The discussion presents a well-balanced outlook that combines and contrasts research and programs from 16 developed and 16 developing countries, and the visions of 10 female and 22 male authors from North America, South America, Europe, Asia, the Middle East and Africa.

italian business schools: Diversity and Inclusion in Italy Simone Pulcher, Stefano Basaglia, Simona Cuomo, Zenia Simonella, 2025-05-05 History, geography, culture, and the legal framework influence the dynamics of inclusion and exclusion in and around organisations. Yet, most academics and practitioners still approach themes of diversity in organisations relying on standardised discourses and practices, often transferred uncritically from the Anglo-Saxon context. Adopting a contextual approach that takes into account the specificities of the Italian context, this book explores a wide array of themes related to diversity and inclusion in organisations and society. Focusing on the Italian context, the book offers new insights into themes already well-established in the diversity debate, such as gender, age and disability. It also provides an opportunity to reflect on categories, organisational forms, and stakeholders rarely associated with diversity, such as social class, family businesses, and trade unions, but also to consider the role of technology and the arts as tools for both inclusion and exclusion. The contributions draw on different disciplines and perspectives and provide insights relevant not only with respect to Italy but also to other national and international contexts. This volume is aimed at both researchers and practitioners who wish to develop a more nuanced and mature understanding of diversity in organisations and society.

Can it be more? What degree of commitment can we reasonably expect of corporations in the struggle to eradicate poverty, promote human rights, halt climate change and reverse ongoing environmental destruction? It is not a question of power; more than half of the world's top 100 economies are corporations, not nation-states. italian business schools: *Catching Up with America* Dominique Barjot, 2002 This book is the outcome of the conference held in Caen (France) in September 1997, in preparation for the International Economic History Congress in Madrid (August 1998). This collection of essays provides, for the first time, a systematic overview of the productivity missions organised in the years following the Second World War, to investigate in situ the production and management techniques adduced to account for the American lead. Bringing together research workers from many countries (Canada, Denmark, France, Germany, Italy, Japan, the Netherlands, Norway, Switzerland, the United Kingdom, the United States), the volume addresses four successive themes. The first one concerns the part played by the United States and that country's action on the international scene. This, in turn, leads to the subsequent query: Did the productivity missions constitute tools for modernisation, or were they devices of domination? The second part considers three national experiences: the United Kingdom, France, and Japan. The third part examines a number of branches: iron and steel, electrical engineering, petrochemicals, and the tyre industry. The final part seeks to assess the impact of the missions. Ultimately, one needs must make a distinction between the rhetoric of productivity, on the one hand, and actual achievements, on the other; the missions were part of a wider process of Americanisation, wherein lies one of the keys to the economic miracles of the post-war era.--Page 4 of cover.
