lego mr business: The Business Idea Soren Hougaard, 2006-03-20 Successful business ideas are not so much about talent as about a systematic approach. The Business Idea encourages new ways of thinking when it comes to entrepreneurship and innovation. Too many ventures originate in the solutions the entrepreneur has to offer and not in the problem the customer needs solved. Business plans done this way can often lead to disappointment. The Business Idea leaves behind this product orientated logic. The book presents new, applicable entrepreneurship methods for developing creative market insight, for identifying windows of opportunity, creating business concepts and entrepreneurial strategies for successful market entry. Entrepreneurship is a complex and risky process compared to almost everything else in business life, so it richly deserves to have its own theoretical and methodological toolbox. The Business Idea provides the tools making it of interest to anyone who works with getting an enterprise off the ground or studies entrepreneurship.

lego mr business: Disruptive Business Mr Alexander Manu, 2012-09-28 Disruptive Business is a provocative and insightful redefinition of innovation as an outcome of human behaviour, a dynamic in constant change requiring the shaping of new responses in business and the economy.

Alexander Manu believes that organizations must treat innovation not as a process to be managed but as an outcome that changes people's lives. In *Disruptive Business* he explains how innovation is the moment when human behaviour is changed by a particular invention, discovery or event. This position challenges the current understanding of innovation, as well as the current ecology in which innovation operates in organizations: its management, methods, tools, language, focus and metrics. The challenge extends to some of the labels currently applied to innovation typologies, such as 'disruptive innovation', seen today as addressing purely the technological side of an invention, rather than the more complex motivational and behavioural side. Alexander Manu considers that a disruption is not manifest in the moment a new technology is introduced. The disruption is the human being and manifest only when human motivation embraces the technology and uses it to modify and improve everyday life. Our acceptance and appropriation of new technologies creates the business disruption. Manu makes the case that successful innovation outcomes are answers to conscious or subconscious goals residing in human motivation, and motivation starts in desire. This position is consistent with the history of innovations that have changed, improved and reshaped human life, and also consistent with their roots and ethos. Humans are a 'perpetually wanting animal', bound to desire, to seek media for a better self and to need innovation. In this dynamic, innovation is the constant and business is the variable. The role of business is to create the tools, objects and services through which people can manifest what they want and who they are. The book provides a new perspective of current behavioural disruptions which are relevant to the continuity of business, as well as a set of practical methodologies for business design, aimed at creating innovation outcomes of value to users.

lego mr business: Insurgence Matthew Tice, 2020-01-16 Insurgence is designed to help business leaders apply new methods to the most important business problem they face in the world today: namely, how to overcome their incumbent mentality to maintain relevance and discover new sources of growth. At the convergence of lean, business model innovation, agile, and design thinking, insurgence is a methodology and business philosophy that will help leaders in incumbent businesses rediscover how to operate like small and nimble insurgents whilst maintaining many of their incumbent advantages. Incumbent businesses, often having enjoyed a long period of relative historical market stability, are increasingly unprepared for nimble insurgents coming on to the field of play and applying different assumptions and business models at speed and scale. These incumbent businesses find that the business models that fuelled their success are no longer robust to the change surrounding their business, and they are becoming increasingly obsolete, weighed down by a high degree of internal focus, inflexible internal controls, and an inability to innovate. Meanwhile, nimble insurgents strike at the heart of these weaknesses by formulating alternative core assumptions, building adaptive business models, and innovating in close proximity to customers and market needs. This book enables business leaders to characterise the difference between incumbents and insurgents, develop new ways of thinking about how to compete in this age of accelerating change, and provide a new framework for strategy and innovation that helps leaders to discover the essence of insurgence for their businesses. It uses rich case studies that illustrate both successful and unsuccessful efforts to help leaders move from theory to action at speed and at scale.
