Befindet man sich auf dem Flughafen Frankfurt/Main noch auf deutschem Staatsgebiet? In einer Ära ökonomischer Globalisierung, multimedialer Kommunikation und grenzüberschreitender Migration bestehen Städte zunehmend aus transnationalen Räumen, deren kulturelle, ökonomische und soziale Dynamik oft stärker von weit entfernten Orten beeinflusst wird als von ihrer unmittelbaren Umgebung. Welche Eigenschaften haben diese städtischen Orte, an denen sich die Lebenswirklichkeiten verschiedener sozialer und geografischer Räume vermischen? Das Bauhaus Kolleg VI 2004/2005 untersuchte am Beispiel von Berlin, Istanbul, Kolkata und Frankfurt, wie transnationale Beziehungen die Wahrnehmung und das Gesicht der Städte verändern. Dabei wurden Spannungen und Konflikte in der transnational city identifiziert und beispielhafte Strategien entwickelt, um dieser rasanten Entwicklung eine Gestalt zu geben. (VLB).

lufthansa business class lounge: Competition and Investment in Air Transport Ruwantissa Abeyratne, 2015-12-17 This book addresses emerging legal and economic issues in competition and investment in air transport, against the backdrop of the role governments and airlines should play in avoiding protectionism and encouraging innovation and creativity. It evaluates current trends in air transport and the direction the industry is taking in the twenty first century. There are discussions on key aspects of air transport, such as safety assurance and environmental protection, as they are impacted by competition. The rapid evolution of aerospace transport and its effect on competition in

air transport is also examined. A recurring theme of the book is the influence of creative destruction and disruptive innovation on air transport. This is addressed through an in-depth study of the contentious areas of law relating to the abuse of dominant positions and state aid, as reflected in the ongoing claim by the three largest US carriers against Gulf carriers such as Emirates Airlines, Etihad and Qatar Airways. The US carriers claim that Emirates and Etihad – which operate air services into the United States by virtue of an open-skies agreement between the US and The United Arab Emirates – are using generous subsidies given to them by their governments to illegally capture the “legitimate” market belonging to the US carriers. These issues are clarified in the book using analyses of competition law and investment law as they apply to air transport, free-trade-agreement analogies and an open-skies case study.

lufthansa business class lounge: *Journeys to Albania: Land of Besa* Kalman Dubov, 2024-02-18 Although tiny in comparison with other European countries, Albania looms large in

terms of its people, culture and history. Blessed by an abundance of natural resources, together with the resourcefulness of its people, it stands strong in the face of much larger countries that have tried to control it and subjugate its people. In the face of overwhelming odds, Albania stood firm, refusing to be subdued to others despite that dominant country remaining on its soil for centuries.

Descendants from the ancient Illyrians, a relatively unknown group, together with an obscure language unlike any other in Europe, its people are a mystery and a conundrum in the face of larger and more powerful countries. The Ottoman Empire, for example, dominated Albania and the Balkans for five centuries, but were unable to subjugate these people. Albanian embers for independence were nurtured and kept alive until, in the end, it achieved its national aspirations. Its core identity remained unchanged and strong in the face of such challenge. Perhaps the most remarkable aspect of Albanian is the concept of besa, a term denoting a code of honor. Once given to another, whether an Albanian or a stranger, the Albanian would rather forfeit his life than violate this code and promise. It was due to this concept and code that Jews in Albania, were protected and every manner of succor was extended to them. Albania remains the only country in Nazi-occupied Europe when at the end of that world war there was an increase in its Jewish population rather than the reverse. The Nazis considered the Jewish population in Albania to be about 200 persons. In fact, by war's end, 2,000 people emerged, relating tales of the extraordinary courage and heroism extended to them by either Muslim or Christian Albanians. To date the State of Israel's Yad Vashem has recognized 75 Albanians for its prestigious award of Righteous Among the Nations. Ironically, the very same code of honor that protected Jews during World War Two is now used by Albanians to perpetrate criminality across the world. The Albanian Mafia controls a vast international enterprise, overseeing every form of crime. At its basest element, the clannish hallmark of its membership is based on familial connections, with the code of besa given to its leadership and other members. Thereby, all in the clan are considered family for whom the code connects and protects, demanding total unquestioned obedience. Efforts to infiltrate these clans has proven an impossible task because of the interconnected webs of duty and control exerted on all in that organization. Betrayal of the clan is a violation of family and community so that total obedience is a given at all times. Hence, the same nobility of besa is also used negatively, against society and normative social frameworks. In addition, Albania still retains the cultural phenomenon of the 'third sex' where women become 'sworn virgins.' They are released from their traditional feminine role and become a 'man,' doing so by a formal oath given to twelve elders in the community. Afterwards, none may remind this 'man' of a previous life as a woman. Though the number of sworn virgins in Albania is small, it is still present and any woman may assume this transformation despite modernity and its claims of equality. The Albanian diet reflects its Mediterranean culture, using olive oil and an array of vegetables that provides an abundance of health to its people. There is much to learn from this ancient society. I hope this book does justice to the many traditions and culture of this unique people.

lufthansa business class lounge: The Postmaster'S Mistress Ruth Fifield, 2014-09-10 In 1940, when Elena was twenty, she and her family were declared civilian internees by the Italian Fascists. Banished from their home in Genoa, they left behind their work in helping Jews to escape Europe. This well-connected Dutch family of Jewish heritage, who counted Albert Einsteins family amongst their intimates, lost their privileged existence: Elenas reign as an equestrian champion was over and her father was stripped of his beloved shipping business. They found refuge in Florence. Always conscious of the gifts bestowed by Fate and the skills of a wily father, and despite their own hardships, they continued to reach out to hard-pressed civilians suffering under the lash of Fascism and Nazism. The hallmarks of this family were humour, tolerance and adaptability and when the Allied forces arrived in Florence the Van Praags found themselves catapulted into new associations and useful roles. This sociable family attracted men from the British, American and South African forces and thus Elena met and fell in love with her South African captain. Elenas story gives an understanding of, and human face to, the Allied forces Italian Campaign from civilian and military perspectives. Her tender and enduring love affair with her husband led her to a new country after the war. They settled on the south coast of KwaZulu Natal and made an invaluable contribution to

the development of their new community, as so many ex-servicemen, whose steel had been tempered in the fire of the Second World War, were given the opportunity to do. Her biography is a celebration of the triumph of the human spirit over the horrors of dictatorship and war. It is a reminder of the good of which man is capable, but also the evil he so often chooses instead.
