korean air a330 business class: Full Upright and Locked Position: The Insider's Guide to Air Travel Mark Gerchick, 2013-06-10 Sit back, relax, and enjoy the flight, our pilots still intone. But who are they kidding? Former FAA chief counsel and senior aviation policy official Mark Gerchick unravels the unseen forces and little-known facts that have reshaped our air travel experience since September 11, 2001. With wry humor and unique insight, Gerchick takes us past the jargon, technicalities, and all-is-well platitudes to expose the new normal of air travel: from the packed planes and myriad hassles of everyday flying to the alchemy of air fares, the airlines' endless nickel-and-dime, and the elusive hope of escape from steerage. We find out what pilots do in the cockpit, what's really worth worrying about when it comes to airline safety, and why we get sick on planes. Meanwhile, Gerchick ponders the jarring disconnect between our quaint expectations of service with a smile and the grim reality of cramped seats, no-free-lunch, and watch-yer-knees. With sympathy for both fliers and airlines, Gerchick shows how the new business-all-business airline industry has finally learned to make money, even in the face of crushing fuel costs, and get millions of travelers where they're going every day safely and quickly. From his singular vantage point as former aviation regulator and policymaker, Gerchick gives us a straightforward insider's view of how hard it is for government to improve the traveler's lot by explaining the vagaries of consumer protection rules as well as the political realities and the economic forces at work. While Gerchick offers reasons to hope for a better future in air travel, he presents an unvarnished look at what we can expect—good and bad—when we take to the skies. Some of it will reassure you, some will make you cringe, but all will open your eyes to what it means to fly today.

korean air a330 business class: 21st Century Airlines Nawal K. Taneja, 2017-09-08 In 21st Century Airlines: Connecting the Dots, Nawal Taneja addresses the challenges and opportunities facing the airline industry as it tries to innovate and create products and services that are radically different by 'connecting the dots' at four key levels: recognizing the implications of global events, improving cross-functional collaboration within the organization, working more closely with the travel chain, and providing much higher engagements with connectors within the social networks. The book synthesizes insights gained from the experience of non-traditional businesses, such as Uber, that have no physical assets and that focus on scalability through platforms, as well as traditional businesses, such as Mercedes-Benz, that are transitioning from operators of physical assets to adapt to the on-demand and sharing economies. These insights show pragmatically that digitizing airline businesses would require digital mind-sets, digital technologies, digital strategies, and digital workplaces to explore new frontiers in value for both customers and airlines. Moreover, forward-thinking airlines need to consider working with bimodal organizational structures, in which one group optimizes current business models (network, fleet, and schedule planning, as well as revenue management) while a second group explores innovative ways to add digital features to physical products to provide a consistent experience throughout the journey. The book is written for all senior-level practitioners of airlines and related businesses worldwide, as well as senior-level government policymakers.
