

law business research

law business research is an essential aspect of the legal industry, providing firms and legal professionals with the necessary insights to navigate complex regulations, client needs, and market trends effectively. This research encompasses various methodologies, including qualitative and quantitative analyses, that inform strategic decision-making in law firms. Understanding the nuances of law business research can significantly enhance a firm's competitive edge, improve client service, and ensure compliance with ever-evolving legal standards. This article delves into the different types of law business research, the methodologies employed, and the tools that facilitate effective research practices, ultimately guiding legal professionals in utilizing research to bolster their practices.

Understanding Law Business Research

Law business research refers to the systematic investigation and analysis of information relevant to the legal profession and its operations. It involves collecting data on legal precedents, case law, statutes, regulations, and market trends to inform decision-making processes within a law firm. The objective of this research is to enhance the firm's ability to provide informed legal advice, develop effective strategies, and maintain competitiveness in the market.

This research can take various forms, including market analysis, client surveys, legal trend assessments, and competitive intelligence. Each form

serves distinct purposes, such as understanding client needs, identifying potential areas for growth, and staying ahead of competitors in the legal landscape.

Types of Law Business Research

There are several key types of law business research that legal professionals utilize to inform their practice. Understanding these types is crucial for effective research application.

Market Research

Market research involves analyzing the legal market to identify trends, opportunities, and threats. Firms conduct market research to understand the demand for specific legal services and to assess their position relative to competitors. This type of research helps firms tailor their offerings to meet client needs more effectively.

Client Research

Client research focuses on gathering insights about current and potential clients. This includes understanding client demographics, preferences, and satisfaction levels. Through surveys and interviews, firms can gain valuable feedback that informs service improvements and client relationship management.

Competitive Analysis

Competitive analysis entails studying rival firms to understand their strengths, weaknesses, strategies, and market positioning. By examining competitors, law firms can identify best practices, potential threats, and gaps in the market that they can exploit.

Methodologies in Law Business Research

Employing the right methodologies is essential for effective law business research. Different methodologies yield different insights and can be selected based on the research's purpose and scope.

Qualitative Research

Qualitative research involves collecting non-numerical data to understand underlying reasons and motivations. This can include interviews, focus

groups, and case studies. Qualitative insights are invaluable for understanding client sentiments and behaviors, offering depth that quantitative data alone cannot provide.

Quantitative Research

Quantitative research utilizes numerical data and statistical analysis to draw conclusions. This method is often employed in market surveys and demographic studies. By analyzing quantitative data, firms can identify trends and patterns that inform strategic decisions.

Mixed Methods

Mixed methods research combines both qualitative and quantitative approaches, providing a comprehensive view of the research subject. This methodology allows for a more nuanced understanding, as it leverages the strengths of both qualitative insights and quantitative data.

Tools and Technologies for Research

Advancements in technology have significantly enhanced law business research capabilities. Various tools and platforms are available to assist legal professionals in conducting thorough and efficient research.

Legal Research Databases

Legal research databases, such as Westlaw and LexisNexis, provide access to a vast repository of legal documents, case law, and statutes. These platforms are essential for conducting comprehensive legal research and staying updated on legal developments.

Data Analytics Software

Data analytics software enables firms to analyze large datasets to identify trends, patterns, and insights. Tools such as Tableau and Google Analytics can help law firms understand client behavior and market dynamics effectively.

CRM Systems

Customer Relationship Management (CRM) systems are crucial for managing client interactions and gathering client data. These systems help law firms track client preferences, engagement history, and feedback, enhancing service

delivery and client satisfaction.

The Importance of Law Business Research

Law business research plays a pivotal role in shaping a firm's strategic direction and operational efficiency. By conducting thorough research, law firms can:

- Enhance decision-making capabilities based on data-driven insights.
- Identify market opportunities and threats in a timely manner.
- Improve client relationships through tailored services and communication.
- Stay compliant with evolving laws and regulations.
- Optimize marketing strategies to reach potential clients more effectively.

Ultimately, law business research is not just about gathering data; it is about translating that data into actionable insights that drive success.

Challenges in Law Business Research

Despite its importance, law business research is not without challenges. Legal professionals often face several obstacles in conducting effective research.

Information Overload

The vast amount of information available can be overwhelming. Legal professionals must develop skills to filter out irrelevant data and focus on what is most pertinent to their research objectives.

Keeping Up with Changes

The legal landscape is continuously evolving, and keeping up with changes in laws, regulations, and market dynamics can be challenging. Regular training and updates are necessary to ensure that research remains relevant.

Resource Limitations

Many firms, especially smaller ones, may lack the resources to conduct extensive research. Budget constraints can limit access to premium databases and analytics tools, impacting the quality of research.

Future Trends in Law Business Research

The landscape of law business research is continually evolving, influenced by technological advancements and changing market needs. Future trends may include:

Increased Use of AI

Artificial Intelligence (AI) is expected to play a larger role in law business research, automating data collection and analysis processes and providing deeper insights more efficiently.

Emphasis on Data Privacy

As data privacy regulations become more stringent, law firms will need to prioritize compliance in their research practices, ensuring that client data is handled responsibly.

Integration of Blockchain Technology

Blockchain technology may revolutionize how legal documents are stored and verified, enhancing transparency and security in legal research.

Conclusion

Law business research is a critical component of a successful legal practice, enabling firms to make informed decisions, enhance client relationships, and maintain compliance with regulations. By understanding the various types of research, methodologies, and tools available, legal professionals can leverage research to gain a competitive advantage. As the legal landscape continues to evolve, staying abreast of trends and challenges will be vital for firms aiming to thrive in an increasingly complex environment.

Q: What is the primary objective of law business

research?

A: The primary objective of law business research is to gather and analyze information relevant to the legal profession to inform strategic decision-making, enhance client service, and ensure compliance with legal standards.

Q: How can law firms benefit from conducting market research?

A: Law firms can benefit from market research by identifying client needs, understanding market trends, and positioning themselves effectively against competitors, ultimately leading to improved service offerings and increased client satisfaction.

Q: What are some common methodologies used in law business research?

A: Common methodologies include qualitative research, which focuses on understanding client sentiments; quantitative research, which analyzes numerical data; and mixed methods, which combine both approaches for comprehensive insights.

Q: What tools are essential for effective law business research?

A: Essential tools include legal research databases like Westlaw and LexisNexis, data analytics software for trend analysis, and CRM systems for managing client relationships and feedback.

Q: What challenges do legal professionals face in conducting research?

A: Legal professionals face challenges such as information overload, the need to keep up with rapid changes in the legal landscape, and resource limitations that can hinder extensive research efforts.

Q: What future trends are expected to influence law business research?

A: Future trends include increased use of AI for automating research processes, greater emphasis on data privacy compliance, and the potential integration of blockchain technology for enhanced document verification and security.

Q: How does client research contribute to a law firm's success?

A: Client research contributes to a law firm's success by providing insights into client preferences and satisfaction, allowing firms to tailor their services, improve client relationships, and enhance overall service delivery.

Q: Why is competitive analysis important for law firms?

A: Competitive analysis is important for law firms as it helps them understand their rivals' strengths and weaknesses, identify best practices, and uncover market gaps that they can exploit for growth and innovation.

Q: What role does data analytics play in law business research?

A: Data analytics plays a crucial role in law business research by enabling firms to analyze large datasets, identify trends and patterns, and make informed, data-driven decisions that enhance their strategic positioning.

Q: How can AI enhance law business research?

A: AI can enhance law business research by automating data collection and analysis, providing predictive insights, and improving the efficiency of research processes, allowing legal professionals to focus on higher-level strategic tasks.

law business research: Finances in International Arbitration Sherlin Tung, Fabricio Fortese, Crina Baltag, 2019-11-26 Finances in International Arbitration Liber Amicorum Patricia Shaughnessy Edited by Sherlin Tung, Fabricio Fortese & Crina Baltag Costs of arbitration has always been a main concern in international arbitration. It is a topic most often discussed and analyzed. In spite of the recent developments in thirdparty funding regulations as well as other mechanisms made available to users of arbitration to reduce costs, the topic remains a key focus for users of arbitration. As the founder of the world's leading international commercial arbitration Master's programme, Dr Patricia Shaughnessy is a huge advocate of communicating recent and

important developments in international arbitration and has written and spoken extensively on such matters. Over twenty-five renowned practitioners and academics worldwide, who have been influenced by Dr Shaughnessy, explore this much-debated topic on the occasion of her 65th birthday. The contributions in this dedication to Dr Shaughnessy's legacy look at issues such as the following: costs arising out of Third-Party Funding; costs of court proceedings versus arbitration proceedings; fee arrangements with legal counsel; costs of commercial versus investment arbitration; how to deal with in-house costs in international arbitration; impact of tribunal secretaries in international arbitration; cost sanctions in international arbitration; damages in international arbitration. The analysis and views offered by leading scholars and practitioners on current day issues arising out of costs of arbitration will offer readers a unique perspective on various aspects of the finances involved in arbitration. This book will provide insightful thoughts and practical guidance for academics and practitioners in the field of international arbitration.

law business research: Antitrust Analysis of Online Sales Platforms & Copyright

Limitations and Exceptions Bruce Kilpatrick, Pierre Kobel, Pranvera Këllezi, 2018-07-03 This book gathers international and national reports from across the globe on key questions in the field of antitrust and intellectual property. The first part discusses the application of competition law to online sales platforms, which is increasingly a focus for anti-trust authorities around the world. A detailed international report explores which are the major challenges for competition law generated by the growth of online platforms. It provides an excellent comparative study of this complex and challenging subject. The second part of the book gathers contributions from various jurisdictions on the topic "To what extent do current exclusions and limitations to copyright strike a fair balance between the rights of owners and fair use by private individuals and others ? This section presents an international report, which offers an unparalleled comparative analysis of this topic, bringing together common themes and contrasting the various national provisions dealing with exceptions to copyright, amongst other things. The book also includes the resolutions passed by the General Assembly of the International League of Competition Law (LIDC) following a debate on each of these topics, which include proposed solutions and recommendations. The LIDC is a long-standing international association that focuses on the interface between competition law and intellectual property law, including unfair competition issues.

law business research: Catalogue of the Public Documents of the [the Fifty-third] Congress [to the 76th Congress] and of All Departments of the Government of the United States United States. Superintendent of Documents, 1896

law business research: VTAC eGuide 2016 VTAC, 2015-07-15 The VTAC eGuide is the Victorian Tertiary Admissions Centre's annual guide to application for tertiary study, scholarships and special consideration in Victoria, Australia. The eGuide contains course listings and selection criteria for over 1,700 courses at 62 institutions including universities, TAFE institutes and independent tertiary colleges.

law business research: *International Arbitration in the Energy Sector* Maxi Scherer, 2018-02-22 Disputes in the energy and natural resources sector are at the heart of international arbitration. With more arbitrations arising in the international energy sector than in any other sector, it is not surprising that the highest valued awards in the history of arbitration come from energy-related arbitrations. Energy disputes often involve complex and controversial issues relating to security, sovereignty, and public welfare. *International Arbitration in the Energy Sector* puts international energy disputes into a global context, providing broad coverage of different forms and systems of dispute resolution across both renewable and non-renewable sectors. With contributions from leading arbitrators, academics, and industry experts from across the globe, the twenty chapters in the book enable readers to compare the approaches to, and learnings from, energy arbitrations across various legal systems and geographic regions. After outlining the international energy arbitration legal framework in Part I, the text delves into a detailed analysis of the problems which regularly arise in practice. These include, among other things, commercial disputes in Part II (e.g. over the upstream oil sector and long-term gas supply contracts), investor-state disputes in Part III

(e.g. under the Energy Charter Treaty), and public international law disputes in Part IV (e.g. concerning international boundaries and the distribution of natural resources). Alongside recent developments in the international energy sector, attention is given to climate and sustainable development disputes, which raise important questions about enforcing sustainability objectives on individuals, corporations, and states. Backed by analyses of arbitral awards, national court and international tribunal decisions, treaties, and other international legal instruments, as well as current events and news in the energy industry, this text offers a unique contribution to international energy literature and provides insightful commentary on the prevalent issues in the field. It is essential reading for any practitioner or researcher in the energy and natural resources sector.

law business research: Minerals Yearbook Mines Bureau, Geological Survey, Interior Department, 2017-03-06 The region of Europe and Central Eurasia defined in this volume encompasses territory that extends from the Atlantic Coast of Europe to the Pacific Coast of the Russian Federation. It includes the British Isles, Iceland, and Greenland (a self-governing part of the Kingdom of Denmark). Included are mineral commodity outlook tables, plus global overview research for particularly commodities within a specific regions/countries are presented throughout the text. Manufacturers of these metals and commodities, along with trade brokers that may specialize in imports and exports, political scientists, and economists may also be interested in this volume. Students pursuing research on specific metals and mineral commodities for world economy courses may be interested in this volume. Related products: Other print volumes in the Minerals Yearbook series can be found here:

law business research: Financial Assistance by Geographic Area, 1999

law business research: Corporate Governance, Organizational Ethics, and Prevention Strategies Against Financial Crime Hyacinthe Yirlier Somé, Narjess Boubakri, Omrane Guedhami, 2025-03-14 This book examines how corporate ethics, social responsibility, and prevention strategies against financial crime may remedy shortcomings of corporate governance. Corporate governance structures and mechanisms may contribute to enhancing the value of integrity in organizational life. Nonetheless, executives and directors who emphasize a structural and procedural way of thinking often miss the point. Corporate governance structures and mechanisms can favor practices of integrity and righteousness. But those structures and mechanisms have deficiencies since they cannot allow the organization to avoid corporate deviancy and delinquency. The book describes how corporate governance and social responsibility reports and programs may allow executives and directors to deepen the meaning of corporate governance, as it is related to organizational culture. Furthermore, the volume discusses how corporate governance structures and mechanisms (including the board of directors and shareholder activism) might have a significant impact on the way integrity is safeguarded in an organization. The contributions shed light on methods to clarify and extend the implications of corporate governance while taking risk management strategies into account.

law business research: *Diversity of Enforcement Titles in the EU* Vesna Rijavec, Wendy Kennett, Tomaž Keresteš, Tjaša Ivanc, 2023-12-30 This book examines the diversity of enforcement titles in cross-border debt collection, focusing on the types, structure, contents and effects of enforcement titles. It offers a comprehensive overview of judgments, court settlements and authentic instruments from a variety of EU Member States. It primarily employs the comparative legal method to draw conclusions on commonalities and differences, as well as prospects for future approximation of laws. The premise of the research is rooted in the finding that national authorities of EU Member States continue to treat enforcement titles from other Member States with reservations and mistrust despite being committed to the principle of mutual trust. The book identifies the issues of mistrust stemming from the diversity of enforcement titles. The research is

based on a rich database of national reports compiled during the course of several large-scale EU Justice Projects. Divided into five parts, the book offers first some general considerations and presents attempts at a systemisation of enforcement titles. The following parts are then devoted to more specialised approaches toward the different types of enforcement titles. However, the connecting line between all parts of the book are the considerations of cross-border enforcement in the EU (and in a limited manner with third States). Herein, research also addresses critical factors regarding the free movement of judgments in the EU, including those of *lis pendens* and related actions. This book provides a valuable contribution to the Theory of European Civil Procedure. Since it is based on a comparative approach and employs both empirical and doctrinal viewpoints, it should also greatly benefit practitioners involved in cross-border dispute resolution. Overall, the findings should be of interest to a broad audience, including policymakers, judges, practitioners and scholars.

law business research: Extraterritoriality Around the Globe Lucia Leontiev, Manuel José Segovia González, 2025-08-29 Analysing different political and policy drivers of extraterritoriality in various social, cultural, and economic settings, this book assesses the value of politics within the context of the law and practice of extraterritoriality. Extraterritoriality is one of the most complex and multifaceted concepts in international law, shaped by a dynamic interplay of legal, political, and practical factors. This book discusses the challenges of understanding extraterritoriality in the context of evolving international relations, the political forces behind state practices, and why international law matters in a field that, at first glance, may seem primarily national in scope. To address these issues, this book includes 12 case studies that explore extraterritoriality from a national perspective, offering both thematic and geographic breadth. It analyses the political drivers of extraterritoriality among similar countries to assess and prove their value. By examining states' extraterritorial behaviour, the book provides a more nuanced, empirical perspective on extraterritoriality, highlighting emerging trends and offering insights into its role in shaping global, legal, and political landscapes in the 21st century. This book will be of interest to researchers and practitioners in the field of extraterritoriality, law, and politics.

law business research: Trade Secrets and Market Dominance Peicheng Wu, 2025-09-30 This book explores the circumstances where the use of trade secrets may constitute the abuse of market dominance under competition law. Trade secrets have been valuable intangible assets for companies in the modern market. While it is imperative to protect trade secrets, noteworthy is that the exploitation of trade secrets may lead to anti-competitive concerns and may require antitrust intervention. By examining comparative experience from both sides of the Atlantic, this book provides specific suggestions for China's competition authorities to handle anti-monopoly cases concerning trade secrets. This book is of interest for readers in the field of competition law and intellectual property law, particularly for those who are researching on the interaction between antitrust and intellectual property law.

law business research: Fragmentation and the European Patent System Karen Walsh, 2022-08-11 This book provides an in-depth study on current perceptions of, and responses to, fragmentation in the European patent system (EPS). For decades, attempts have been made to address this fragmentation by introducing a unitary patent system. The most recent attempt, the EU unitary patent system, will be the first of its kind. It is expected to significantly change the EPS. However, rather than reducing existing fragmentation, it will likely add to it. Based on an analysis of the current and forthcoming system, the book argues that the inherent nature of fragmentation within the EPS needs to be recognised and suggests that a multifaceted approach is required to respond to it. Uniquely, it draws on work regarding fragmentation outside of the patent and intellectual property regimes, gaining insights from both European law-making and the international legal system. These insights are used to investigate current responses to fragmentation in the EPS. Interpretations of substantive patent law are examined, including claim construction (*Actavis v Eli Lilly*), exceptions to patentability related to uses of human embryos for industrial or commercial purposes (*WARF*, *Brüstle*, *ISCC*), and products resulting from essentially biological processes

(Broccoli and Tomatoes II, G3/19). Attempts towards convergence in these areas have had mixed results and in some instances fragmentation may be necessary. However, similar techniques to those applied in the international legal system to respond to fragmentation are being used in the EPS, and, where this is seen, it has been to good effect. It is argued that these methods should be recognised, structured, and promoted to make our response to fragmentation more effective. Fragmentation and the European Patent System will be of interest to academics, students and practitioners looking for a new perspective on the EPS.

law business research: Social Mobilisation for Climate Change Valentina E. Albanese, Stefano Fanetti, Roberta Minazzi, 2024-11-30 This book is the outcome of an interdisciplinary research process aimed at capturing the complexity of the social mobilisation for climate change. It brings together various academic perspectives to understand the diverse forms of climate activism, challenging traditional notions of agency, space, justice, and legality. The reader will broaden their understanding of the social mobilisation for climate change and its interactions with new digital spaces. This book questions public authorities and big greenhouse gas emitters, individual and generational behaviors, artistic creations, territorial identities, legal systems, and even the idea of democracy. This broad overview results from a collection of concise contributions from scholars with different backgrounds, who employ a variety of tools and methodologies in their analysis, although delivering their findings in an accessible language. It is intended for students, scholars, practitioners, and policymakers in the areas of Climate Change, Digital Activism, Cultural and Legal Geography, Social and Spatial Justice, Human Rights and Environmental Law, Sustainable Cities, and Just Transition.

law business research: Investment Arbitration's Tightrope Paolo Vargiu, 2025-06-03 This book addresses the role of investment arbitrators within the framework of international investment law, a system that tends by design to prioritise the interests of foreign investors, often at the expense of the economic and social policies of the host states. The theoretical foundations of this volume are doctrinal, and the argument presented is aimed at contributing to the scholarly debate on the reform of the system of investment law. Because of this, the book is particularly focussed on the scholarship and is aimed at an audience already familiar with the system of investment arbitration and its case-law. The author explores both the explicit and implicit duties of arbitrators and critically questions certain critiques of investment law that call for arbitrators to interpret bilateral investment treaties and free trade agreements in ways that also protect the host states' interests. While the author argues that challenges to the legitimacy and credibility of the current investment law regime are well-founded, he also argues that arbitrators find themselves constrained by the prevailing legal framework, unable to fully balance the competing interests of foreign investors and host states. The book concludes that achieving greater equality in the investment legal regime necessitates a departure from the existing bilateral investment treaties paradigm and calls for a more just and balanced system of investment treaties. The author argues that, until such a transformation occurs, arbitrators remain compelled to apply the current applicable law, highlighting the insurmountable limitations and tensions within the present system.

law business research: Direct Jurisdiction Anselmo Reyes, Wilson Lui, 2021-08-26 The second thematic volume in the series Studies in Private International Law - Asia looks into direct jurisdiction, that is, the situations in which the courts of 15 key Asian states (Mainland China, Hong Kong, Taiwan, Japan, South Korea, Malaysia, Singapore, Thailand, Vietnam, Cambodia, Myanmar, the Philippines, Indonesia, Sri Lanka, and India) are prepared to hear a case involving cross-border elements. For instance, where parties are habitually resident abroad and a dispute has only some, little or no connection with an Asian state, will the courts of that state accept jurisdiction and hear the case and (if so) on what conditions? More specifically, the book's chapters explore the circumstances in which different Asian states assume or decline jurisdiction not just in commercial matters, but also in other types of action (such as family, consumer and employment disputes). The Introduction defines terminology and identifies similarities in the approaches to direct jurisdiction taken by the 15 Asian states in civil and commercial litigation. Taking its cue from this, the

Conclusion assesses whether there should be a multilateral convention or soft law instrument articulating principles of direct jurisdiction for Asia. The Conclusion also discusses possible trajectories that Asian states may be taking in respect of direct jurisdiction in light of the COVID-19 pandemic and the political tensions currently besetting the world. The book suggests that enacting suitable rules of direct jurisdiction requires an Asian state to strike a delicate balance between affording certainty and protecting its nationals. At heart, direct jurisdiction involves sometimes difficult policy considerations and is not just about drawing up lists of jurisdictional grounds and exceptions to them.

law business research: Latin American Lawyers Rogelio Pérez-Perdomo, 2006-01-06 This book is the first comprehensive history of the intellectual training and social placement of lawyers in Latin America. Pérez-Perdomo examines the Roman legal roots of the Latin American tradition and traces the development of legal education and practice in Latin America from the 16th century to the present. The main themes in the book are the relationship between lawyers and power, the place of lawyers in social stratification, the role of law and lawyers in building nations and maintaining elite power, the role of law schools, and the main intellectual trends in legal thought.

law business research: Reform of Banking Laws and Regulations in Iran Ardeshir Atai, 2021-07-15 Since the 1979 Islamic Revolution, Iran has implemented Sharia-compliant banking and finance which makes it one of the few countries that has adopted Islamic banking. The post-war liberalization and privatization of the economy and subsequent deregulation had paved the ground for emergence of private banks and financial institutions which had been subject to strict government control and ownership of banks. Further reform of the banking sector included authorization for the establishment and operations of foreign-owned banks in Iran and ratification of international treaties for the reciprocal protection and promotion of capital investments. The most recent government reform plan concerning adoption of a comprehensive banking law aims to create a single regulator for the prudential regulation and supervision of banks and financial institutions. The implementation of the aforesaid banking reform will be instrumental for achieving a sound and safe banking system and restoring investor confidence in the Iranian banking and money markets.

law business research: Multi-Tier Approaches to the Resolution of International Disputes Anselmo Reyes, Weixia Gu, 2021-12-16 Provides a comprehensive global survey on multi-tier dispute resolution, examining its trends, its strengths and weaknesses, and the way forward.

law business research: Data Protection in the Internet Dário Moura Vicente, Sofia de Vasconcelos Casimiro, 2019-12-01 This book identifies and explains the different national approaches to data protection – the legal regulation of the collection, storage, transmission and use of information concerning identified or identifiable individuals – and determines the extent to which they could be harmonised in the foreseeable future. In recent years, data protection has become a major concern in many countries, as well as at supranational and international levels. In fact, the emergence of computing technologies that allow lower-cost processing of increasing amounts of information, associated with the advent and exponential use of the Internet and other communication networks and the widespread liberalization of the trans-border flow of information have enabled the large-scale collection and processing of personal data, not only for scientific or commercial uses, but also for political uses. A growing number of governmental and private organizations now possess and use data processing in order to determine, predict and influence individual behavior in all fields of human activity. This inevitably entails new risks, from the perspective of individual privacy, but also other fundamental rights, such as the right not to be discriminated against, fair competition between commercial enterprises and the proper functioning of democratic institutions. These phenomena have not been ignored from a legal point of view: at the national, supranational and international levels, an increasing number of regulatory instruments – including the European Union's General Data Protection Regulation applicable as of 25 May 2018 – have been adopted with the purpose of preventing personal data misuse. Nevertheless, distinct national approaches still prevail in this domain, notably those that separate the comprehensive and detailed protective rules adopted in Europe since the 1995 Directive on the processing of personal

data from the more fragmented and liberal attitude of American courts and legislators in this respect. In a globalized world, in which personal data can instantly circulate and be used simultaneously in communications networks that are ubiquitous by nature, these different national and regional approaches are a major source of legal conflict.

law business research: International Lawyer's Deskbook Lucinda A. Low, Daniel M. Drory, 2003 A reference tool for lawyers facing international legal problems outside their own areas of expertise.
