michigan business leaders: It'll Be Fun You'll See Guy J. Jackson, 2024-07-26 Yeah, so, no one's really precisely sure what to make of all this. The promotional blurbs here and herein are from people more eloquent than this person right now writing this, so the blurbs are actually where you want to look for an approximate spin on this book's supposed contents, a supposed collection of supposed short stories. But is it really a collection, per se...? Are they really short stories...? A.F. Harrold once pointed out that technically speaking the short stories of Guy J. Jackson aren't always quantifiable as "short stories", and sometimes they are just "things". Whereas Gwyneth Herbert, if we recall semi-correctly, once advised to simply drink Jackson's stories out of a diamond-studded high heel with someone you prefer while lingering in lucidity on a country road at dusk. But at least it's been firmly postulated, by experts the world over, that if one consumes these so-called "short stories" of Jackson's at the rate of one "story" per day, with skipped days being acceptable, one will feel infinitesimally better about, and ever-so-slightly more able to handle, the fundamental inanities of living Life itself.

michigan business leaders: Educational Partnerships and the State: The Paradoxes of Governing Schools, Children, and Families B. Franklin, M. Bloch, T. Popkewitz, 2003-12-18

Educational Partnerships and the State is a compelling collection of essays by an international group of scholars that provides a critical exploration of the role of partnerships in contemporary educational reform. Their focus is on the expanding role that collaboration between the public and private sector has come to play in the governing of schools, children, and families in response to an array of worldwide economic and social changes. The contributors to this volume highlight the new relationship between civil society and the state through partnerships and what that linkage has come to mean for an array of educational issues including academic achievement, school governance, school parent-relationships, teacher education, the construction of family and community involvement, and the discourses of reform as practices that order participation and action.

michigan business leaders: *Eco-Hustle!* Bruce E. Johansen, 2015-04-14 How many of our efforts to save the environment are effective? Learn how our system is simply masking the symptoms of global warming. Climate change is more than just a buzzword. It is a reality that society and industry have failed to deal with effectively. Greenwashing, a term that author Bruce E. Johansen defines as the environmental sleight of hand performed by technology and advertising, has us convinced that certain green practices are sustainable. In his book, Johansen examines the sanctioned activities and practices commonly touted as environmentally responsible and points out their failings. He explains why the global climate change problem is more urgent than many people think, and provides real-world examples of companies that are taking measures with genuine benefits to the environment. Presenting information relevant to every inhabitant of earth and that environmentalists, climate scientists, and students and educators in environmental studies will find essential reading, this book brings questions about legislation and economics to the forefront and asks whether today's system can support a true effort at sustainable living. It presents honest—and what some readers may find surprising—answers to inquiries into what is really good for the environment, such as why corn ethanol may be worse for the atmosphere than oil and why coal capture and sequestration may be the worst green idea yet.

michigan business leaders: Higher Education Outcomes Assessment for the Twenty-First Century Peter Hernon, Robert E. Dugan, Candy Schwartz, 2013-05-09 This book discusses recent trends in outcomes assessment, examines how state governments are reshaping the national discussion with higher education, and explains how libraries must respond to these changes. Higher Education Outcomes Assessment for the Twenty-first Century focuses on recent developments in outcomes assessment, especially from the perspectives of the federal government and state governments, as well as foundations concerned about the state of higher education. The authors identify the significant changes that these stakeholders call for—information that academic librarians and anyone following outcomes assessment need to be aware of—and interpret the discussions to identify implications for libraries. Building upon the foundation of knowledge presented in the previous two Libraries Unlimited Outcomes Assessment in Higher Education titles, this book provides readers with up-to-date coverage of topics such as the emerging metrics used to define student and institutional success; the increased importance of accountability and the need to compare and assess the performance of programs and institutions rather than individual courses; and the shift in prioritizing student outcomes over student learning outcomes. The authors also spotlight the critical need for libraries to fit their role within the national discussion and suggest ways in which library managers and directors can play a role in redirecting the discussion to their benefit.

michigan business leaders: The Allure of Order Jal Mehta, 2015 In *The Allure of Order*, Mehta recounts a century of attempts at revitalizing public education, and puts forward a truly new agenda to reach this elusive goal. Over and over again, outsiders have been fascinated by the promise of scientific management and have attempted to apply principles of rational administration from above. What we want, Mehta argues, is the opposite approach which characterizes top-performing educational nations: attract strong candidates into teaching, develop relevant and usable knowledge, train teachers extensively in that knowledge, and support these efforts through a strong welfare state.

Trust in a variety of institutions, including governmental and business, is at an all-time low. In order to strengthen society from its foundations, we need to rebuild trust. Research shows that leaders are critical to building trust in organizations, and that trust in leadership is significantly related to a number of attitudes, behaviors and performance outcomes. This new book, with its emphasis on the critical role of leadership in trust-building as well as the novel perspective on the trust circle of leadership, will be of interest to all students and researchers studying leadership, management and organizational behavior.
