Introduction to the Midwest Business Group on Health

The Midwest Business Group on Health (MBGH) is a not-for-profit coalition that represents employers committed to improving health care quality and controlling costs. Founded in 1980, MBGH brings together companies from various industries to share knowledge, resources, and best practices related to healthcare management. By advocating for policy changes and providing education on health care issues, MBGH empowers employers to make informed health care decisions that benefit their workforce.

As a leader in employer health care initiatives, MBGH conducts research and provides valuable insights that inform member organizations about emerging trends in health care. Their efforts focus on enhancing employee wellness, reducing health care costs, and fostering a collaborative environment for stakeholders in the health care system.

Key Functions of the Midwest Business Group on Health

The Midwest Business Group on Health serves multiple functions that are critical to its mission of improving health care for employers and employees alike. These functions include advocacy, education, research, and resource sharing.

Advocacy

One of the primary functions of MBGH is advocacy. The organization actively engages with policymakers and health care leaders to promote legislation that supports employer interests and improves health care delivery. By representing the collective voice of its members, MBGH works to influence decisions that shape the health care landscape.

Education

MBGH provides educational resources and training sessions to its members on a variety of topics, including health care policy, wellness programs, and cost management strategies. These educational initiatives help employers stay informed about the latest developments in health care, enabling them to implement effective strategies for their organizations.

Research

The organization conducts extensive research to identify best practices and innovative solutions in health care. This research informs members about effective health management strategies and helps them benchmark their performance against industry standards.

Resource Sharing

MBGH facilitates resource sharing among its members, providing a platform for companies to exchange ideas, tools, and experiences. This collaborative approach fosters a community of learning and growth, leading to improved health outcomes for employees.

Impact on Employers and Employees

The impact of the Midwest Business Group on Health on both employers and employees is significant. By promoting a culture of health, MBGH helps organizations improve their workforce's overall well-

being while managing health care costs effectively.

Enhanced Employee Health

Through various wellness initiatives and programs, MBGH encourages employers to prioritize employee health. These initiatives include preventive care programs, mental health resources, and chronic disease management. By investing in employee health, organizations can reduce absenteeism and improve productivity.

Cost Management

MBGH provides valuable insights into cost-effective health care solutions. By utilizing data analytics and benchmarking, employers can identify areas where they can save on health care expenditures. This leads to more sustainable health care spending and improved financial outcomes for companies.

Workplace Culture

By collaborating with MBGH, employers foster a positive workplace culture that values health and well-being. This not only attracts top talent but also enhances employee engagement and retention. A healthy workforce contributes to a more productive and successful organization.

Advocacy and Health Care Reform

Advocacy is at the heart of the Midwest Business Group on Health's mission. The organization plays a crucial role in health care reform by voicing the concerns and needs of employers in the legislative arena.

Policy Engagement

MBGH engages with state and federal policymakers to advocate for health care policies that benefit employers and their employees. By providing data and research findings, MBGH supports evidence-based policy decisions that aim to improve health care access, quality, and affordability.

Collaborative Initiatives

The organization collaborates with other stakeholders, including health care providers, insurers, and consumer advocates, to promote comprehensive health care reform. These partnerships are essential

in creating a more equitable and efficient health care system that addresses the needs of all parties involved.

Strategic Partnerships and Collaborations

Strategic partnerships are a cornerstone of the Midwest Business Group on Health's approach to improving health care. By collaborating with various organizations and stakeholders, MBGH amplifies its impact and extends its reach.

Partnerships with Health Systems

MBGH partners with leading health systems to develop programs and initiatives that enhance care delivery. These partnerships focus on improving health outcomes and ensuring that employees have access to high-quality health care services.

Collaboration with Insurers

Working with insurers, MBGH helps to design health plans that meet the needs of employers and employees. By collaborating on plan design and implementation, MBGH ensures that health care coverage is both accessible and affordable.

Data Analytics in Health Care

Data analytics is a powerful tool that the Midwest Business Group on Health utilizes to drive decision-making and improve health care outcomes. By analyzing data, MBGH can identify trends, assess the effectiveness of programs, and provide actionable insights to its members.

Utilizing Health Data

MBGH leverages health data to inform employers about their workforce's health status, utilization patterns, and cost drivers. This information enables organizations to tailor their health programs and interventions effectively.

Improving Program Effectiveness

Through continuous monitoring and evaluation, MBGH helps employers assess the effectiveness of their health initiatives. By utilizing data analytics, organizations can refine their strategies and ensure

they are achieving desired health outcomes.

Conclusion

The Midwest Business Group on Health is a vital organization that significantly influences health care policy and employer practices in the Midwest. Through its advocacy efforts, educational resources, and collaborative initiatives, MBGH empowers employers to create healthier workplaces. The organization's focus on data analytics and strategic partnerships further enhances its ability to drive meaningful change in the health care system. As businesses continue to navigate the complexities of health care, the role of MBGH will remain essential in fostering a healthier, more efficient health care environment for all.

Q: What is the purpose of the Midwest Business Group on Health?

A: The purpose of the Midwest Business Group on Health is to improve health care quality, manage costs, and advocate for employer interests in the health care system.

Q: How does the Midwest Business Group on Health support employers?

A: MBGH supports employers by providing educational resources, conducting research, and facilitating collaboration among organizations to share best practices in health care management.

Q: What initiatives does the Midwest Business Group on Health promote?

A: MBGH promotes initiatives such as employee wellness programs, chronic disease management, and preventive care strategies to enhance employee health and reduce health care costs.

Q: In what ways does the Midwest Business Group on Health engage with policymakers?

A: MBGH engages with policymakers by advocating for health care policies that benefit employers, providing data and research to support evidence-based legislation.

Q: How does data analytics play a role in the Midwest Business Group on Health's strategies?

A: Data analytics helps MBGH identify health trends, assess program effectiveness, and provide actionable insights to employers for improving health outcomes.

Q: What are the benefits of being a member of the Midwest Business Group on Health?

A: Benefits include access to educational resources, networking opportunities, data-driven insights, and advocacy support that enhances health care management for employers.

Q: How does the Midwest Business Group on Health foster collaboration among its members?

A: MBGH fosters collaboration by providing a platform for members to share resources, exchange ideas, and participate in joint initiatives focused on improving health care.

Q: What role does the Midwest Business Group on Health play in health care reform?

A: MBGH plays a crucial role in health care reform by advocating for policies that improve access, quality, and affordability of health care for employees and employers.

Q: Can small businesses benefit from the Midwest Business Group on Health?

A: Yes, small businesses can benefit from MBGH by accessing resources and support that help them navigate health care challenges and implement effective health programs.

midwest business group on health: Healthcare Governance: A Guide for Effective Boards, Second Edition Errol Biggs, 2011-10-01 Hospital and health system board members face increasing challenges, with healthcare reform and other laws demanding improved accountability and efficiency. This handbook reveals the secrets of effective board structure and function, including responsibilities of board members, term limits, recruiting new members, and working with the CEO. Other aspects of a board's work, including monitoring quality, providing financial oversight, and completing a self-assessment process, are also covered. Sample forms and documents, a glossary of common healthcare terms, and a conflict of interest policy are included. Board members, regardless of their expertise, will find this handbook easy to navigate.

midwest business group on health: Redefining Health Care Michael E. Porter, Elizabeth Olmsted Teisberg, 2006-04-24 The U.S. health care system is in crisis. At stake are the quality of

care for millions of Americans and the financial well-being of individuals and employers squeezed by skyrocketing premiums—not to mention the stability of state and federal government budgets. In *Redefining Health Care*, internationally renowned strategy expert Michael Porter and innovation expert Elizabeth Teisberg reveal the underlying—and largely overlooked—causes of the problem, and provide a powerful prescription for change. The authors argue that competition currently takes place at the wrong level—among health plans, networks, and hospitals—rather than where it matters most, in the diagnosis, treatment, and prevention of specific health conditions. Participants in the system accumulate bargaining power and shift costs in a zero-sum competition, rather than creating value for patients. Based on an exhaustive study of the U.S. health care system, *Redefining Health Care* lays out a breakthrough framework for redefining the way competition in health care delivery takes place—and unleashing stunning improvements in quality and efficiency. With specific recommendations for hospitals, doctors, health plans, employers, and policy makers, this book shows how to move health care toward positive-sum competition that delivers lasting benefits for all.

midwest business group on health: *From Chaos To Care* David Lawrence, 2008-11-06 Kaiser Permanente is the largest nonprofit healthcare system in the world and is a leader in integrated medical care. A team-based approach that draws on the strengths of the healthcare organization as well as on community resources, integrated care is a most cost-efficient healthcare business model. It also gives patients an all-important sense of control over their conditions and provides the kind of care they can navigate and trust. In *From Chaos to Care*, Dr. Lawrence shows how integrated care succeeds on both the organizational and human fronts. A blueprint for change and a manifesto for the implementation of satisfying and cost-effective healthcare for all, *From Chaos to Care* illuminates the path to the future of American medical care.

midwest business group on health: *Making Healthcare Safe* Lucian L. Leape, 2021-05-28 This unique and engaging open access title provides a compelling and ground-breaking account of the patient safety movement in the United States, told from the perspective of one of its most prominent leaders, and arguably the movement's founder, Lucian L. Leape, MD. Covering the growth of the field from the late 1980s to 2015, Dr. Leape details the developments, actors, organizations, research, and policy-making activities that marked the evolution and major advances of patient safety in this time span. In addition, and perhaps most importantly, this book not only comprehensively details how and why human and systems errors too often occur in the process of providing health care, it also promotes an in-depth understanding of the principles and practices of patient safety, including how they were influenced by today's modern safety sciences and systems theory and design. Indeed, the book emphasizes how the growing awareness of systems-design thinking and the self-education and commitment to improving patient safety, by not only Dr. Leape but a wide range of other clinicians and health executives from both the private and public sectors, all converged to drive forward the patient safety movement in the US. *Making Healthcare Safe* is divided into four parts: I. In the Beginning describes the research and theory that defined patient safety and the early initiatives to enhance it. II. Institutional Responses tells the stories of the efforts of the major organizations that began to apply the new concepts and make patient safety a reality. Most of these stories have not been previously told, so this account becomes their histories as well. III. Getting to Work provides in-depth analyses of four key issues that cut across disciplinary lines impacting patient safety which required special attention. IV. Creating a Culture of Safety looks to the future, marshalling the best thinking about what it will take to achieve the safe care we all deserve. Captivatingly written with an "insider's" tone and a major contribution to the clinical literature, this title will be of immense value to health care professionals, to students in a range of academic disciplines, to medical trainees, to health administrators, to policymakers and even to lay readers with an interest in patient safety and in the critical quest to create safe care.

midwest business group on health: *Watchdogs and Whistleblowers* Stephen Brobeck, Robert N. Mayer, 2015-07-20 This book is the most comprehensive and up-to-date source of information about ways in which consumer activism has reshaped the economic and political well-being of citizens in the United States and around the world. This all-encompassing collection of information

about consumer activism and the consumer movement will provide students, public officials, business groups, and other activists with a one-stop source of facts and insights. The contributors explore hundreds of major consumer protections that have significantly enhanced the quality of life and safety for all Americans, showing how these protections were won through the skillful and determined work of leading activists and activist organizations. Many of the stories told here are related by the activists themselves, often for the first time. More than 140 entries offer a comprehensive treatment of the consumer activism of specific organizations, their leaders, and strategies. The book also includes more than 40 entries about consumer movements in Europe, Asia, Africa, and Latin America. A timeline of key events and a listing of the most important books on the subject of consumer activism help provide context for the individual entries as do two introductory essays. Cross references in each entry establish linkages among topics.

midwest business group on health: *Encyclopedia of Health Services Research* Ross M. Mullner, 2009-05-15 Today, as never before, healthcare has the ability to enhance the quality and duration of life. At the same time, healthcare has become so costly that it can easily bankrupt governments and impoverish individuals and families. Health services research is a highly multidisciplinary field, including such areas as health administration, health economics, medical sociology, medicine, , political science, public health, and public policy. The Encyclopedia of Health Services Research is the first single reference source to capture the diversity and complexity of the field. With more than 400 entries, these two volumes investigate the relationship between the factors of cost, quality, and access to healthcare and their impact upon medical outcomes such as death, disability, disease, discomfort, and dissatisfaction with care. Key Features Examines the growing healthcare crisis facing the United States Encompasses the structure, process, and outcomes of healthcare Aims to improve the equity, efficiency, effectiveness, and safety of healthcare by influencing and developing public policies Describes healthcare systems and issues from around the globe Key Themes Access to Care Accreditation, Associations, Foundations, and Research Organizations Biographies of Current and Past Leaders Cost of Care, Economics, Finance, and Payment Mechanisms Disease, Disability, Health, and Health Behavior Government and International Healthcare Organizations Health Insurance Health Professionals and Healthcare Organizations Health Services Research Laws, Regulations, and Ethics Measurement; Data Sources and Coding; and Research Methods Outcomes of Care Policy Issues, Healthcare Reform, and International Comparisons Public Health Quality and Safety of Care Special and Vulnerable Groups The Encyclopedia is designed to be an introduction to the various topics of health services research for an audience including undergraduate students, graduate students, and general readers seeking non-technical descriptions of the field and its practices. It is also useful for healthcare practitioners wishing to stay abreast of the changes and updates in the field.

midwest business group on health: *Medicare* Institute of Medicine, Committee to Design a Strategy for Quality Review and Assurance in Medicare, 1990-02-01 Health care for the elderly American is among our nation's more pressing social issues. Our society wishes to ensure quality

health care for all older people, but there is growing concern about our ability to maintain and improve quality in the face of efforts to contain health care costs. Medicare: A Strategy for Quality Assurance answers the U.S. Congress' call for the Institute of Medicine to design a strategic plan for assessing and assuring the quality of medical care for the elderly. This book presents a proposed strategic plan for improving quality assurance in the Medicare program, along with steps and timetables for implementing the plan by the year 2000 and the 10 recommendations for action by Congress. The book explores quality of care—how it is defined, measured, and improved—and reviews different types of quality problems. Major issues that affect approaches to assessing and assuring quality are examined. Medicare: A Strategy for Quality Assurance will be immediately useful to a wide audience, including policymakers, health administrators, individual providers, specialists in issues of the older American, researchers, educators, and students.

midwest business group on health: Redesigning the Medicare Contract Edward F. Lawlor, 2003-12-06 Recent debates on Medicare reform focus on prescription drug coverage, expanding managed-care choices, or technical issues of payment policy. Despite all the heat generated by these issues, Edward F. Lawlor's new book, Redesigning the Medicare Contract, demonstrates that fundamental questions of purpose and policy design for Medicare have been largely ignored. Challenging conventional ideas, Lawlor suggests that we look at Medicare as a contract between the federal government, the program's beneficiaries, and health care providers. Medicare reform, then, would involve rewriting this contract so that it more successfully serves the interests of both beneficiaries and taxpayers. To do this, Lawlor argues that we must improve the agency of the program—the informational, organizational, and incentive elements that assure Medicare program carries out beneficiary and taxpayer interests in providing the most appropriate, high-quality care possible. The book includes a chapter devoted solely to concepts and applications that give definition to this brand of agency theory. Lawlor's innovative agency approach is matched with lucid explanation of the more comprehensive groundwork in the history and politics of the Medicare program. Lawlor's important and timely book reframes the Medicare debate in a productive manner and effectively analyzes alternatives for reform. Lawlor argues that effective policy design for Medicare requires greater appreciation of the vulnerability of beneficiaries, the complexity of the program itself, its wide geographical variations in services and financing, and the realistic possibilities for government and private sector roles. Tackling difficult problems like end-of-life and high-tech care—and offering sensible solutions—Redesigning the Medicare Contract will interest political scientists, economists, policy analysts, and health care professionals alike.

midwest business group on health: The Economics of Social Insurance and Employee Benefits Richard J. Butler, 2012-12-06 This book is intended for junior and senior undergraduate students, and master level students in human resources, risk management and insurance, industrial relations or public policy. The subject of the book is non-wage benefits paid to workers. Hence, it excludes discussion of needs-based programs such as welfare, food stamps, Supplementary Security Income, and Medicaid. It includes benefits mandated by the government including the major social insurance programs: workers' compensation, unemployment insurance and Social Security benefits. It also includes those benefits voluntarily provided by firms including: group medical care, disability benefits, paid sick time, pension benefits, life insurance, and assorted other fringe benefits. The book is divided into three parts. Part I (chapters 1 through 6) briefly introduces these programs and

discusses some of the insurance and economic concepts that are useful in both evaluating the current programs, and in understanding what changes might mean for future costs and benefits. The next two parts of the book deal respectively with social insurance programs (Part II, chapters 7-10), and other employer provided benefits (Part III, chapters 11-16). Throughout, private sector human resource practice and public sector human resource policy is linked to various benefit models: the human capital model, the passive participant model, the insurance model, the managed care model, and the integrated health benefits model.

midwest business group on health: The Role of Purchasers and Payers in the Clinical Research Enterprise Institute of Medicine, Board on Health Sciences Policy, Clinical Research Roundtable, 2002-06-14 In a workshop organized by the Clinical Research roundtable, representatives from purchaser organizations (employers), payer organizations (health plans and insurance companies), and other stakeholder organizations (voluntary health associations, clinical researchers, research organizations, and the technology community) came together to explore: What do purchasers and payers need from the Clinical Research Enterprise? How have current efforts in clinical research met their needs? What are purchasers, payers, and other stakeholders willing to contribute to the enterprise? This book documents these discussions and summarizes what employers and insurers need from and are willing to contribute to clinical research from both a business and a national health care perspective.

midwest business group on health: Partnerships in Healthcare Anthony L. Suchman, Richard J. Botelho, Patricia Hinton Walker, 1998 In these 28 studies, health-care professionals offer both theoretical and practical approaches to improving the quality of partnership skills practised within the American health-care system. They pursue an alternative approach to working with others - one that is based on procedure and relationship, rather than control - and their researches have implications for health-care systems throughout the developed world, but particularly in western Europe.
