masters of business administration ubc: *Making Managers in Canada, 1945-1995* Jason Russell, 2018-06-14 Management education and training was a key influence on Canadian capital and labour in the post-World War II decades, however it has been the subject of comparatively little academic inquiry. In many ways, historians have frequently learned about management behavior in unionized workplaces by examining labor-management relations. The management experience has thus often been seen through the eyes of rank-and-file workers rather than from the perspective of managers themselves. This book discusses how managers were trained and educated in Canada in the years following the Second World War. *Making Managers in Canada, 1945 - 1995* seeks to shed light on the experience of workers who have not received much attention in business history: managers. This book approaches management training from both institutional and social history perspectives. Drawing from community colleges, universities, and companies in British Columbia, Ontario, and Québec, this book reveals the nature of management education and training in English and French Canada. It integrates institutional analysis, and examines how factors such as gender and social class shaped the development of Canadian management in the post-war years and illustrates the various international influences on Canadian management education.

Why do the citizens of some countries lead a happy, prosperous life while others struggle in terrible want? This book takes the reader through the eventful life journey of one of Singapore's best known economists and educators, Professor Lim Chong Yah. Born in Malacca, the author planted tapioca to feed himself and his family, caught fish in paddy fields and was thrown in jail as a 10-year-old during the war. He fought to win a Commonwealth scholarship to get a decent education, met the love of his life at a Chinese New Year party, became a Professor at two of the best universities in Asia, and went on to write one of the most widely-used economics textbooks of the time, *Elements of Economic Theory*. At 84, Lim Chong Yah is as feisty, indomitable and curious as when he was a small, cheeky boy catching fighting fish in those paddy fields. And he still asks the fundamental question of how each of us can make a difference.

provides business professionals and students with insight into the failure of businesses to prepare leaders for stepping into complex cultural contexts. The Geoleadership Model developed by Dr. Wibbeke is applied to global business situations using cases taken from leading companies such as Google and eBay. The book uses a case study format to present salient issues related to intercultural leadership and then principles of the model are applied to the case in discussion format. The concepts of care, communication, consciousness, change, capability and others are analyzed in relation to how each concept is seen in different parts of the business world. Each chapter concludes with a bottom line example of how each Geoleadership concept directly affects business results. Global Business Leadership also provides instruction about entry into cultural contexts, negotiating, preventing and managing cultural-based local-global conflict, and preparing global leaders to increase intercultural awareness and sensitivity. Dr. Wibbeke founded and managed the leading Internet website (Web of Culture) for cross-cultural information on the Internet and shares such global experiences with other would-be globetrotters.

masters of business administration ubc: Being Chinese Wei Djao, 2003-09 Chinese have traveled the globe for centuries, and today people of Chinese ancestry live all over the world. They are the Huayi or Chinese overseas and can be found not only in the thriving Chinese communities of the United States, Canada, and Southeast, but also in enclaves as far-reaching as Cuba, Zimbabwe, and Peru. In this book, twenty-two Chinese living and working outside of China—ordinary people from all walks of life—tell us something about their lives and about what it means to be Chinese in non-Chinese societies. In these pages we meet a surgeon raised in Singapore but westernized in London who still believes in the value of Chinese medicine, which revitalizes you in ways that Western medicine cannot understand. A member of the Chinese Canadian community who bristles at the insistence that you can't be Chinese unless you speak a Chinese dialect, because Even though I do not have the Chinese language, I think my ability to manifest many things in Chinese culture to others in English is still very important. Individuals all loyal to their countries of citizenship who continue to observe the customs of their ancestral home to varying degrees, whether performing rites in memory of ancestors, practicing fengshui, wearing jade for good luck, or giving out red packets of lucky money for New Year. What emerges from many of these accounts is a selective adherence to Chinese values. One person cites a high regard for elders, for high achievement, and for the sense of togetherness fostered by his culture. Another, the bride in an arranged marriage to a transplanted Chinese man, speaks highly of her relationship: It's the Chinese way to put in the effort and persevere. Several of the stories consider the difference between how Chinese women overseas actually live and the stereotypes of how they ought to live. One writes: Coming from a traditional Chinese family, which placed value on sons and not on daughters, it was necessary for me to assert my own direction in life rather than to follow in the traditional paths of obedience. Bracketing the testimonies are an overview of the history of emigration from China and an assessment of the extent to which the Chinese overseas retain elements of Chinese culture in their lives. In compiling these personal accounts, Wei Djao, who was born in China and now lives near Seattle, undertook a quest that took her not only to many countries but also to the inner landscapes of the heart. *Being Chinese* is a highly personal book that bares the aspirations, despairs, and

triumphs of real people as it makes an insightful and lasting contribution to Chinese diasporic studies.

Beyond this staggering statistic, recent media coverage of "rape chants" at Saint Mary's University, misogynistic Facebook posts from Dalhousie University's dental school, and high-profile incidents of sexual violence at other Canadian universities point to a widespread culture of rape on university campuses and reveal universities' failure to address sexual violence. As university administrations are called to task for their cover-ups and misguided responses, a national conversation has opened about the need to address this pressing social problem. This book takes up the topic of sexual violence on campus and explores its causes and consequences as well as strategies for its elimination. Drawing together original case studies, empirical research, and theoretical writing from scholars and community and campus activists, this interdisciplinary collection charts the costs of campus sexual violence on students and university communities, the efficacy of existing university sexual assault policies and institutional responses, and historical and contemporary forms of activism associated with campus sexual violence.

masters of business administration ubc: Museums and the Paradox of Change Robert R. Janes, 2013-05-29 Museums throughout the world are under increasing pressure in the wake of the 2008/2009 economic recession and the many pressing social and environmental issues that are assuming priority. The major focus of concern in the global museum community is the sustainability of museums in light of these pressures, not to mention falling attendance and the challenges of the digital world. *Museums and the Paradox of Change* provides a detailed account of how a major Canadian museum suffered a 40 percent loss in its operating budget and went on to become the most financially self-sufficient of the ten largest museums in Canada. This book is the most detailed case study of its kind and is indispensable for students and practitioners alike. It is also the most incisive published account of organizational change within a museum, in part because it is honest, open and reflexive. Janes is the first to bring perspectives drawn from complexity science into the discussion of organizational change in museums and he introduces the key concepts of complexity, uncertainty, nonlinearity, emergence, chaos and paradox. This revised and expanded third edition also includes new writing on strengthening museum management, as well as reflections on new opportunities and hazards for museums. It concludes with six ethical responsibilities for museum leaders and managers to consider. Janes provides pragmatic solutions grounded in a theoretical context, and highlights important issues in the management of museums that cannot be ignored.
