nhn business platform: Entrepreneurship in Korea Martin Hemmert, Jae-Jin Kim, 2021-06-28 Entrepreneurship in Korea offers a fresh perspective on entrepreneurship in Korea by combining a historical review of the achievements of Korean entrepreneurs at each stage of economic development with an analysis of the activities of current entrepreneurs who are at the forefront of the new Korean age. It discusses the crucial role of business entrepreneurship in each stage of Korea's transformation from an underdeveloped East Asian backwater to a global manufacturing and technology powerhouse throughout the last 100 years. Furthermore, it provides an up-to-date analysis of contemporary start-up entrepreneurship in Korea and discusses its unique characteristics, strengths and weaknesses. Authors identify specific features of entrepreneurship in Korea, why and how business entrepreneurs have been so successful and effective, how their entrepreneurial styles and activities have changed over time, which challenges Korean start-up entrepreneurs are currently facing, and how these challenges may be addressed.

nhn business platform: *Transnational Convergence of East Asian Pop Culture* Seok-Kyeong Hong, Dal Yong Jin, 2021-03-08 This book observes and analyzes transnational interactions of East Asian pop culture and current cultural practices, comparing them to the production and consumption of Western popular culture and providing a theoretical discussion regarding the specific paradigm of East Asian pop culture. Drawing on innovative theoretical perspectives and grounded empirical research, an international team of authors consider the history of transnational flows within pop culture and then systematically address pop culture, digital technologies, and the media industry. Chapters cover the Hallyu—or Korean Wave—phenomenon, as well as Japanese and Chinese cultural industries. Throughout the book, the authors address the convergence of the once-separated practical, industrial, and business aspects of popular culture under the influence of digital culture. They further coherently synthesize a vast collection of research to examine the specific realities and practices of consumers that exist beyond regional boundaries, shared cultural identities, and historical constructs. This book will be of interest to academic researchers, undergraduates, and graduate students of Asian media, media studies, communication studies, cultural studies, transcultural communication, or sociology.

nhn business platform: Immersive Technology for the Gig Economy: Transformative Business Practices Masłóń-Oracz, Anna, Kansra, Pooja, Arora, Sugandh, Oberoi, Sumit, 2025-06-11 Immersive technology, such as virtual reality (VR), augmented reality (AR), and mixed reality (MR), reshapes the gig economy by enabling transformative business practices that redefine how work is performed, delivered, and experienced. As gig workers rely on digital platforms for employment, immersive tools provide new ways to train, collaborate, and interact with clients across sectors. From virtual onboarding sessions and AR-guided task assistance to freelance marketplaces, these technologies enhance productivity, engagement, and accessibility. By bridging the gap between physical and digital workspaces, immersive technology can improve operational efficiency while expanding opportunities within the evolving landscape of flexible, on-demand labor. Immersive Technology for the Gig Economy: Transformative Business Practices examines the emergence of the gig economy within organizational developments. It highlights new models developed to handle global concerns affecting all businesses, focusing on managing information and resources that benefit entrepreneurs. This book covers topics such as logistics, automation, and sustainable

development, and is a useful resource for business owners, economists, engineers, academicians, researchers, and scientists.

nhn business platform: *Storage Systems* Alexander Thomasian, 2021-10-13 *Storage Systems: Organization, Performance, Coding, Reliability and Their Data Processing* was motivated by the 1988 Redundant Array of Inexpensive/Independent Disks proposal to replace large form factor mainframe disks with an array of commodity disks. Disk loads are balanced by striping data into strips—with one strip per disk— and storage reliability is enhanced via replication or erasure coding, which at best dedicates k strips per stripe to tolerate k disk failures. Flash memories have resulted in a paradigm shift with Solid State Drives (SSDs) replacing Hard Disk Drives (HDDs) for high performance applications. RAID and Flash have resulted in the emergence of new storage companies, namely EMC, NetApp, SanDisk, and Purestorage, and a multibillion-dollar storage market. Key new conferences and publications are reviewed in this book. The goal of the book is to expose students, researchers, and IT professionals to the more important developments in storage systems, while covering the evolution of storage technologies, traditional and novel databases, and novel sources of data. We describe several prototypes: FAWN at CMU, RAMCloud at Stanford, and Lightstore at MIT; Oracle's Exadata, AWS' Aurora, Alibaba's PolarDB, Fungible Data Center; and author's paper designs for cloud storage, namely heterogeneous disk arrays and hierarchical RAID. - Surveys storage technologies and lists sources of data: measurements, text, audio, images, and video - Familiarizes with paradigms to improve performance: caching, prefetching, log-structured file systems, and merge-trees (LSMs) - Describes RAID organizations and analyzes their performance and reliability - Conserves storage via data compression, deduplication, compaction, and secures data via encryption - Specifies implications of storage technologies on performance and power consumption - Exemplifies database parallelism for big data, analytics, deep learning via multicore CPUs, GPUs, FPGAs, and ASICs, e.g., Google's Tensor Processing Units

nhn business platform: *The Routledge Handbook of the Gig Economy* Immanuel Ness, 2022-10-31 Research on the growth of the precarious economy is of significant interest as the economy increasingly becomes dependent on gig work. However, as platform and automated service work has grown, there remains a chasm in understanding the key aspects of digital labour. This handbook presents comprehensive theoretical, empirical, and historical accounts of the political economy of informal work from the late 20th century to the present. It examines the rich and varied analysis and critique of the informalisation of work, focusing on its most significant theories, intellectual traditions, and authors. It highlights the political, social, cultural, and developmental impact of the deterioration of employment in the Global North and Global South, as well as the extreme threat posed to the planet by the growth of contingent work, poverty, and enduring and increasing inequalities produced and reproduced by the reformation of capitalism in the contemporary age of neoliberal capitalism. The period from the 1980s to the present is marked by the expanded extraction of surplus value from workers through the creation of non-standard jobs and the restructuring of work. A central component of the restructuring of work is the extension of gig employment through the development of algorithmic platforms which direct labourers to perform discrete tasks. This is a definitive collection, representing the primary reference work, contributing to our understanding of the subject. The book is written and presented in a clear manner, accessible to scholars and researchers of international political economy, labour economics, and sociology who are eager for new research examining this phenomenon, as well as specialists in the field of labour relations. nhn business platform: South Korea's Webtooniverse and the Digital Comic Revolution

Brian Yecies, , Ae-Gyung Shim, 2021-04-09 This book investigates the meteoric rise of mobile webtoons - also known as webcomics - and the dynamic relationships between serialised content, artists, agencies, platforms and applications, as well as the global readership associated with them. It offers an engaging discussion of webtoons themselves, and what makes this new media form so compelling and attractive to millions upon millions of readers. Why have webtoons taken off, and how do users interact with them? Each of the case studies we explore raises interesting questions for both general readers and scholars of new media about how webtoons have become a modern form of popular culture. The book also addresses larger questions about East Asia's contributions to global popular culture and Asian society in general, as well as South Korea's rapid social and cultural transformation since the 1990s. This is a significant - and understudied - aspect of the new screen ecologies and their role in a new wave of media globalisation.

nhn business platform: Digital Payments and the Cashless Economy Woosik Moon,

2025-08-11 Against the backdrop of high Internet penetration and smartphone use, coupled with the widespread diffusion of credit cards, Korea has been leading the digital payment revolution, transforming itself into a cashless society. Woosik Moon analyses the current and future development of digital payments and methods in Korea, ranging from CBDC, Internet banking, payment cards, and digital wallets to crypto-assets. Moon explores a wide variety of new issues, covering not only digital payments instruments and the digital industry but also the policy actions of the government and the Bank of Korea. He argues that Korea may eliminate coins from circulation through adoption of alternative digital instruments and methods, which is an important transitional stage towards a paper-free cashless society. Offering a comparative perspective to existing studies

of digital payments in US and China, this book will interest researchers and students in the field of monetary economics, financial innovation, and comparative economics.

nhn business platform: *Mobile Marketing Management* Hongbing Hua, 2019-03-18 With the development of mobile internet technology, people's lifestyle and consumer behavior are changing rapidly. Nowadays, the products on the market are updating more and more frequently, and the traditional marketing theory and brand theory fail to get with the mobile internet. So, what's the innovative marketing to take in the new era? Since 2012, China has entered into the mobile era, and became a major country of mobile internet application. The book summarizes the experience of the author accumulated from many trials and errors in management and marketing innovation, so as to form the pattern of management and marketing for the next 30 years. Mobile Marketing Management lays the foundation for the new era with four pillars: service, substance, superuser, space, known as 4S theory for short. In view of the concept of customer-first, it is all about service, and products become productized service concepts. In view of the failure of mass communication, the competition among all services becomes the competition of substance differentiation. Regarding the popularity of self-organization, it becomes a trend to cooperate with people rather than the company to develop the market. In view of the principle of fuzzy market boundary, the enterprises shall optimize their living space and evolve their development space. This book contains numerous case studies along with analysis and creates the discipline of mobile marketing management, providing innovative theories, methods and tools for the marketing of enterprises. Through this book, readers can master the marketing methods of the mobile internet era. They can apply the marketing theory in this book to guide the marketing practice, thus improving marketing efficiency and reducing marketing costs.
