name ideas for t shirt business: The Glitter Plan Pamela Skaist-Levy, Gela Nash-Taylor, Booth Moore, 2015-05-19 Part memoir, part business manual, and 100% juicy—the inside story of Juicy Couture, one of the most iconic brands of our times While working together at a Los Angeles boutique, Pamela Skaist-Levy and Gela Nash-Taylor became fast and furious friends over the impossibility of finding the perfect T-shirt. Following their vision of comfortable, fitted T-shirts, they set up shop in Gela's one-bedroom Hollywood apartment with \$200 and one rule: Whatever they did, they both had to be obsessed by it. The best friends' project became Juicy Couture. Pam and Gela eventually sold their company to Liz Claiborne for \$50 million, but not before they created a whole new genre of casual clothing that came to define California cool. Pamela and Gela built an empire from the ground up, using themselves as models to build their patterns and placing their merchandise by storming into stores and handing out samples. They balanced careful growth with innovative tactics—sending Madonna a tracksuit with her nickname, Madge, embroidered on it—and created a unique, bold, and unconventional business plan that was all their own: the Glitter Plan. Now, Pam and Gela reveal the secrets of Juicy's success: how they learned to find and stick with the

right colleagues and trust their instincts when it became time to move on to their next project. They also share their missteps and hilarious lessons learned—like the time robbers stole one thousand pairs of maternity shortalls, which the partners took as the first sign to get out of the maternity clothing business. Told in the bright, cheery voice that defines Juicy style even today, *The Glitter Plan* shows readers how to transform passion and ideas into business success. Aspiring designers, Juicy fans, and business readers of all stripes will be enthralled by the story of spirit and savvy behind Pam and Gela's multimillion-dollar fashion empire.

name ideas for t shirt business: *Bi-Polar on Benefits* Sandy Knox, 2011-06-01 Description This book is about the reality of coping with Bi-polar Disorder when it has devastated your world. It's about living with Bi-polar on benefits as opposed to, say, Bi-polar on Bollinger, which is all we've seen on TV and in the press, it seems. How many sufferers are there who have lost everything to this burden and face a bleak future? How many sufferers are alone with it, undiagnosed, wrongly diagnosed, untreated, unsupported? Sadly there's a deep-held view that those, particularly single mums, claiming mental ill-health and state benefits are lazy, ignorant parasites who should get a job! Those who genuinely want to be treated, supported and guided back to work and who, long after the episode has passed, are faced with crippling confidence and self-esteem issues, no money and no apparent opportunities, are at the mercy of boredom, frustration, tedium and illness. This book highlights these issues, takes a poke at the Government, addressing problems within the DSS, NHS and private psychiatry. Bi-polar (or manic depression, whichever term you prefer) is hard to put form to, hard to describe and harder still for carers, friends and family to understand. Greater understanding could make the world of difference to the sufferer. This book goes some way to providing, for the carer, a little insight and, for the sufferer, a little comfort maybe, in knowing that there are more in their boat than they might once have thought. About the Author Sandy Knox was born and raised in Whitley Bay, Northumberland. In her early twenties she spent four years working in New York. Back in the UK she lived in Hertfordshire and worked within marketing design, married and had a son. She now lives in West Sussex with her son and two Greyhounds and enjoys, in her own words, 'not a lot'!

name ideas for t shirt business: *The New Builders* Seth Levine, Elizabeth MacBride, 2021-04-26 Despite popular belief to the contrary, entrepreneurship in the United States is dying. It has been since before the Great Recession of 2008, and the negative trend in American entrepreneurship has been accelerated by the Covid pandemic. New firms are being started at a slower rate, are employing fewer workers, and are being formed disproportionately in just a few major cities in the U.S. At the same time, large chains are opening more locations. Companies such as Amazon with their deliver everything and anything are rapidly displacing Main Street businesses. In *The New Builders*, we tell the stories of the next generation of entrepreneurs -- and argue for the future of American entrepreneurship. That future lies in surprising places -- and will in particular rely on the success of women, black and brown entrepreneurs. Our country hasn't yet even recognized the identities of the New Builders, let alone developed strategies to support them. Our misunderstanding is driven by a core misperception. Consider a typical American entrepreneur. Think about the entrepreneur who appears on TV, the business leader making headlines during the pandemic. Think of the type of businesses she or he is building, the college or business school they attended, the place they grew up. The image you probably conjured is that of a young, white male starting a technology business. He's likely in Silicon Valley. Possibly New York or Boston. He's self-confident, versed in the ins and outs of business funding and has an extensive (Ivy League?) network of peers and mentors eager to help his business thrive, grow and make millions, if not billions. You'd think entrepreneurship is thriving, and helping the United States maintain its

economic power. You'd be almost completely wrong. The dominant image of an entrepreneur as a young white man starting a tech business on the coasts isn't correct at all. Today's American entrepreneurs, the people who drive critical parts of our economy, are more likely to be female and non-white. In fact, the number of women-owned businesses has increased 31 times between 1972 and 2018 according to the Kauffman Foundation (in 1972, women-owned businesses accounted for just 4.6% of all firms; in 2018 that figure was 40%). The fastest-growing group of female entrepreneurs are women of color, who are responsible for 64% of new women-owned businesses being created. In a few years, we believe women will make up more than half of the entrepreneurs in America. The age of the average American entrepreneur also belies conventional wisdom: It's 42. The average age of the most successful entrepreneurs -- those in the top .01% in terms of their company's growth in the first five years -- is 45. These are the New Builders. Women, people of color, immigrants and people over 40. We're failing them. And by doing so, we are failing ourselves. In this book, you'll learn: How the definition of business success in America today has grown corporate and around the concepts of growth, size, and consumption. Why and how our collective understanding of entrepreneurship has dangerously narrowed. Once a broad term including people starting businesses of all types, entrepreneurship has come to describe only the brash technology founders on the way to becoming big. Who are the fastest growing groups of entrepreneurs? What are they working on? What drives them? The real engine that drove Silicon Valley's entrepreneurs. The government had a much bigger role than is widely known The extent to which entrepreneurs and small businesses are woven through our history, and the ways we have forgotten women and people of color who owned small businesses in the past. How we're increasingly afraid to fail The role small businesses are playing saving the wilderness, small towns and redlined communities What we can do to turn the decline in entrepreneurship around, especially by supporting the people who are courageously starting small companies today.
