paul allen business card: Horrific Humor and the Moment of Droll Grimness in Cinema Cynthia J. Miller, John A. Dowell, 2017-12-06 When evil clowns menace the screen, do we scream or laugh? When zombies converge to tear a victim limb from limb, do we cringe and hide our eyes, or shriek "What??! Play that again!!"? What about those instances when these seemingly opposite reactions happen at once? This is the phenomenon known as sLaughter. *Horrific Humor and the Moment of Droll Grimness in Cinema: Sidesplitting sLaughter* presents the first focused look at the moment in audience reception where screams and laughter collide. John A. Dowell and Cynthia J. Miller bring together twelve essays from an international collection of authors across the disciplines. The volume begins with an examination of the aesthetics and mechanics of the sLaughter moment, then moves closer to look at the impact of its awkward frisson of humor and horror on the individual viewer, and finally, broadens its lens to explore sLaughter's implications for the human condition more generally. The chapters discuss such box office hits such as *A Clockwork Orange* (1971), *Fargo* (1996), *The Dark Knight* (2008), and *The Cabin in the Woods* (2012), as well as cult classics such as *The Toxic Avenger* (1984) and *Dead Snow* (2009). Engaging and thought provoking, *Horrific Humor and the Moment of Droll Grimness in Cinema* will be of great interest to scholars of both humor and horror, as well as to those working in reception studies and fans of cult cinema.

Some scholars have proposed that horror films can be a teaching tool for psychopathology, but for the most part the genre has been underutilized as a learning tool. This book explores the idea of relating horror films to psychiatric ideas as a way of engaging people in learning.

paul allen business card: Extra-Ordinary Men Nicola Rehling, 2010-06-21 *Extra-Ordinary Men* analyzes popular cinematic representations of white heterosexual masculinity as the ordinary form of male identity, one that enjoys considerable economic, social, political, and representational strength. Nicola Rehling argues that while this normative position affords white heterosexual masculinity ideological and political dominance, such ordinariness also engenders the anxiety that it is a depthless, vacuous, and unstable identity. At a time when the neutrality of white heterosexual masculinity has been challenged by identity politics, this insightful volume offers lucid accounts of contemporary theoretical debates on masculinity in popular cinema, and explores the strategies deployed in popular films to reassert white heterosexual male hegemony through detailed readings of films as diverse as *Fight Club*, *Boys Don't Cry*, and *The Matrix*. Accessible to undergraduates, but also of interest to film scholars, the book makes a distinctive contribution to our understanding of

the ways in which popular film helps construct and maintain many unexamined assumptions about masculinity, gender, race, and sexuality.

paul allen business card: Performance Anxiety in Media Culture Steven Bailey, 2016-04-08 *Performance Anxiety in Media Culture* explores the culture of performance anxiety in the media-saturated contemporary world. It uses comparative case studies including film, social media, and popular music to examine the ways that personal concern regarding self-presentation becomes transformed into shared cultural expressions through the use of media technologies. Three initial chapters are dedicated to exploring the work of Erving Goffman, Jacques Lacan, and Jean Baudrillard as critical for a thorough understanding of how implications of a range of recent transformations in the methods for staging social performances are staged and in the ways that they are experienced and interpreted by others. Three subsequent chapters explore diverse case studies in the culture of performance anxiety: the representation of such anxieties in recent French cinema, the appearance of them in the world of fashion-based 'outfit of the day' blogs, and the attempt to refine a more fixed social persona in the nostalgic culture of rockabilly music.

paul allen business card: American Cinema of the 2000s Timothy Corrigan, 2012-04-15 The decade from 2000 to 2009 is framed, at one end, by the traumatic catastrophe of the 9/11 attacks on the World Trade Center and, at the other, by the election of the first African American president of the United States. In between, the United States and the world witnessed the rapid expansion of new media and the Internet, such natural disasters as Hurricane Katrina, political uprisings around the world, and a massive meltdown of world economies. Amid these crises and revolutions, American films responded in multiple ways, sometimes directly reflecting these turbulent times, and sometimes indirectly couching history in traditional genres and stories. In American Cinema of the 2000s, essays from ten top film scholars examine such popular series as the groundbreaking Matrix films and the gripping adventures of former CIA covert operative Jason Bourne; new, offbeat films like Juno; and the resurgence of documentaries like Michael Moore's Fahrenheit 9/11. Each essay demonstrates the complex ways in which American culture and American cinema are bound together in subtle and challenging ways.

paul allen business card: The Case for Meritocracy Michael Faust, 2016-03-30 Human societies have always been ruled by military elites, Mythos elites (religious or royal), or rich elites. They have never been ruled by intellectual elites. Humanity could be saved by knowledge, understanding, reason and logic, but these have always been despised by the average person. Intellectual attributes have never played a decisive role in human affairs. The intelligentsia have always been advisers, and never those occupying the throne and taking the decisions. What would happen to the world if Logos people rather than Mythos people were in charge, if smart people rather than military people were in charge, if people of knowledge ruled rather than people of wealth? The world would be transformed. Humanity would undergo a wondrous metamorphosis. A political system exists that can deliver this New World Order... a world where intelligence becomes the most valued resource. It's called Meritocracy.

Gibbs, Jr., 2016-03-18 Mixing metaphors in speech, writing, and even gesture, is traditionally viewed as a sign of inconsistency in thought and language. Despite the prominence of mixed metaphors, there have been surprisingly few attempts to comprehensively explain why people mix their metaphors so frequently and in the particular ways they do. This volume brings together a distinguished group of linguists, psychologists and computer scientists, who tackle the issue of how and why mixed metaphors arise and what communicative purposes they may serve. These scholars, almost unanimously, argue that mixing metaphors is a natural consequence of common metaphorical thought processes, highlighting important complexities of the metaphorical mind. Mixing Metaphor, for the first time, offers new, critical empirical and theoretical insights on a topic that has long been ignored within interdisciplinary metaphor studies.
