ottawa the business inn: Into the Heart of Bali Lilly White, 2019-12-09 What a tumultuous mess we are in. Yes, you, me, our world. Most of us on this planet (our home) are confused, muddled, puzzled, mystified, unruly, anarchic, disorderly, and for some, lawless. Where in the name of all that is holy is the heart and soul of who we are as a species? We have been gifted with life on a blue planet that spins and gives us existence and still we are not satisfied or content. We quest for more. More money, more power, more control, more influence, more junk in our trunks, more stuff. We are a mess and have helped make an abyss of darkness on this heaven on earth—our Earth. There is only one Earth and because we have helped destroy it, tree by tree, city by city, person by person we are now looking at how we can find a home on Mars. What the hell? Why not find the tools to clean up this home? How do we do that? There are many systems, tools, traditions, structures and methods. You are reading this book because I have found one that works. Journey with me now , Into The Heart of Bali “.

ottawa the business inn: Steamboat Connections Frank Mackey, 2003-04-16 In *Steamboat Connections* Frank Mackey gives us a narrative account of the first twenty-five years of steam navigation along the St Lawrence and Ottawa Rivers. Relying on a wealth of primary archival sources, Mackey focuses on the development of steamer traffic from 1816 – when the foundations were laid for the first stage-and-steamboat line between Montreal and Upper Canada – to the early 1840s – when locks, canals, innovations, and human daring conquered the rapids on those rivers and allowed for navigation between Montreal and the Great Lakes. He shows how, starting in 1841, small steamers ran the circuit – down the rapids of the St Lawrence to Montreal and then back up to Kingston and other Great Lakes ports via the Ottawa River and the Rideau Canal. Mackey introduces the entrepreneurs who forged this important link between Montreal and the nation's interior and chronicles the course of their industry, correcting previous misinterpretations. He sheds light not only on steamboats but also on the social, commercial, and geographical development that they made possible. He shows that the history of this country, a land with vast expanses and a harsh climate, cannot be fully appreciated without looking at the different modes of transportation that made it possible.

ottawa the business inn: *Small Towns and Big Business* Stephen Halebsky, 2009-01-16 During the 1990s, a new type of controversy began occurring across the United States: controversies over the siting of superstores, also known as big box stores. In these disputes, which often involve Wal-Mart, the world's biggest retailer, local citizens mount organized opposition to the proposed siting of a superstore in their town or neighborhood. Opponents criticize Wal-Mart superstores for putting local independent merchants out of business, siphoning money from the local economy, providing substandard jobs, disrupting residential neighborhoods, contributing to the McDonaldization of society, inducing sprawl, destroying downtowns and Main Streets, and undermining local uniqueness and small town charm. More generally, these David-and-Goliath controversies represent particularly stark examples of the conflict of interests between local communities and large corporations that have become common in contemporary society. *Small Towns and Big Business* uses fieldwork and archival sources to comprehensively examine these controversies and the underlying issues. While Wal-Mart is usually able to site its stores at its preferred locations, in some cases local opponents have been able to thwart its plans. Using detailed case studies of anti-superstore controversies in six small cities in five states, Halebsky employs a comparative-historical approach to construct an explanation of how some of these local social movements managed to prevail against Wal-Mart. This explanation is then extended to provide the basis for a model of the general conditions under which local communities may be able to constrain unwanted corporate action. Thus, this is both a study of social movement outcomes and an investigation of community-corporate conflict. *Small Towns and Big Business* provides insight into the potential of the local state to control large corporations, the inherently problematic nature of corporate retailing, the possibilities for resisting McDonaldization, and the fate of local anti-corporation acti

ottawa the business inn: *Killing Bugs for Business and Beauty* Mark Kuhlberg, 2022-03-31 *Killing Bugs for Business and Beauty* examines the beginning of Canada's aerial war against forest insects and how a tiny handful of officials came to lead the world with a made-in-Canada solution to the problem. Shedding light on a largely forgotten chapter in Canadian environmental history, Mark Kuhlberg explores the theme of nature and its agency. The book highlights the shared impulses that often drove both the harvesters and the preservers of trees, and the acute dangers inherent in allowing emotional appeals instead of logic to drive environmental policy-making. It addresses both inter-governmental and intra-governmental relations, as well as pressure politics and lobbying. Including fascinating tales from Cape Breton Island, Muskoka, and Stanley Park, *Killing Bugs for Business and Beauty* clearly demonstrates how class, region, and commercial interest intersected to determine the location and timing of aerial bombings. At the core of this book about killing bugs is a story, infused with innovation and heroism, of the various conflicts that complicate how we worship

wilderness.
