photography business coach: Reflections From a Business Coach Keith Barton, 2008-12 Why would anyone want to coach businessmen and women who may be tired of their corporate careers or may just want to turn their hobby into a business? Why would anyone want to be a coach? I've asked myself these and other questions many times when I left the safe world of being a therapist where the rules of engagement are well prescribed. It's safer in being the expert whose job it is to listen and help reassure folks that they are not losers, that there's meaning in their lives, that all they need is to have a passion for life. The world of coaching is a different arena where coach and client are equal and the coaches job is to ask the right questions to get his or her clients to engage in a plan of action that hopefully will change their lives. My coaching style is non-directive, whereby my executive clients discuss their current project assignments and managerial approaches to staff recruitment, development, and retention. I use the following strategies to optimize executive growth to: Model executive development based on individual and company core values Create a visionary approach to problem-solving Establish accountability structures for change Encourage risk-taking behaviors that foster competition and growth Create new markets for your services and product Thus, coaching involves putting self aside and concentrating on the motivation of your client. The emphasis is on the relationship developed between coach and client where each participates in a process of change that holds the client's agenda using the expertise and experience of the coach. Whereas mentoring involves mirroring for your client what the skill might look like (intention), coaching offers a vision for your client that empowers and holds your client accountable. Success = accountability for change.

photography business coach: *The Art of Selling Portrait Photography* , 2017-04-17 Photographers who provide digital files instead of professionally finished prints and albums are not just missing out on income, they are limiting the ways they can serve their clients and giving up control of the quality of the finished product. This has a ripple effects that can negatively affect the long-term viability of the business. As Christie Mumm shows in this book, failing to sell prints and albums—and to do so effectively—results in clients who save a few dollars but are, overall, less satisfied with the quality of the experience they received. Conversely, clients who are treated to a great in-person sales session and then receive high-end custom products almost always become repeat customers and are far more likely to talk to their friends and family about their experience. Armed with the practical, no-nonsense techniques Mumm sets out, photographers will find it easy to develop a product line and begin hosting fun, engaging in-person sales sessions.

This book offers a step-by-step, practical guide to running a complete career coaching programme: assessing the present; looking at motivation, skills and 'personal brand'; writing the most powerful CV/résumé; getting through a job interview or assessment centre successfully; and negotiating terms for a new job. Career coaching has never been needed more now that jobs for life have disappeared, being made redundant is common, the 'gig economy' is here to stay, and young people often must start in unpaid roles. The principles of career coaching are much the same whether you are a professional executive coach or a volunteer working for a charity whose aim is to get people back into work. But how do you do it most effectively? The focus must be on the whole career coaching cycle and building a holistic understanding of how a client's personal and professional life has influenced the person they are today, who they want to be, and how to set successful goals. Important reading for any coach who wants to understand and improve their career coaching. "This is a must-have resource for all coaches to support clients in career and job transition." Terry H.
