people with business: *It's all Sales - It's people's business* Dick Tol, Wim Bouman, 2009-11 Dick Tol started writing down his experiences because his friend Wim Bouman noticed the benefits that could be derived by others from Dick's experiences. Given Wim's background in Sales it was no surprise that he was able to draw an analogy between Dick's experiences and selling. That is why Wim analysed every story and added useful theoretical background information and relevant tools for those who are interested in Sales and who are also convinced that 'people buy from people'. people with business: *Economic Stealers* Repathi Kishore, 2025-02-01 Did the world give everyone equal opportunities? Did society update itself like technologies? There have been no such continuous updates so far. We are still in the prototype stage. Did humans want racism? Did humans want religion? Did humans want caste, power, and money? Anyway, Humans do have all this. All these components make it easy to stay divided and detached. People should realize what the backbone of society is. Money, racism, caste, power, religion, will these fulfil that place? The current educational system is creating competition between people. It rates people based on competition. The educational system has evolved over the years. It adapted to the political philosophies their country accommodated. The educational authorities lost their purpose. They started creating Unsatisfied workers. Somebody unknown creates most war threats to make people hate their neighboring country. Because of that, most people always curse each other. They feel good about being separated from them. This somebody can't be identified, and they are doing it. They have benefits in it because people are separated. Why is this monetary system a failure? All developments will come after lots of testing and failures. No new things are successful on the first attempt, but a few things are there as exceptions. So, only some attempts will make a systemic return. Failures are significant reasons for failed repayments. So, from here, we can understand only one thing: Failures

are never accepted in the system.
