pacific coast business times: *Global Awakening* Michael Schacker, 2012-12-14 Shows how we must make deep changes to complete our paradigm shift from the old mechanistic worldview to the new organic worldview • Reveals the distinct stages of paradigm shifts through the ages, including the 18th-century Enlightenment and the critical stage of our current shift • Explains how the new organic worldview began with Goethe and Kant • Offers solutions for each of us to be able to realize and make the deep changes needed for global regeneration In *Global Awakening*, Michael Schacker shows that hidden within our global crises is a positive future for the planet. Sharing his 30 years of intensive research into the history of change as well as the evolution of consciousness and regenerative science, Schacker explains how our current shift from the old mechanistic worldview to a new organic worldview based on biological models follows the same pattern as other paradigm shifts across history, including the 18th-century Enlightenment and the American Revolution. He reveals the creative geniuses who have contributed to the birth of the organic worldview, beginning with Goethe, Kant, and Hahnemann. Exposing the scientific and social forces that drive paradigm shifts, he details the stages every paradigm shift progresses through: the early Enlightenment, the conservative backlash, the intensive phase, and and the transformational phase leading to the Organic Shift. Explaining that we are currently in the throes of the paradigm flip, the critical last phase of our paradigm shift, Schacker shows how the mechanistic worldview is crumbling around us and nothing but a complete transformation in the way we think will keep us from the path of total self-destruction. Providing a map to overcome the allure of the simplistic mechanical model that has spawned countless unsustainable practices and problems--from global warming to intense economic disparities--the author offers concrete solutions showing how each of us can use our talents, skills, and time to make the deep changes needed for global regeneration.

pacific coast business times: *The Great Mistake* Christopher Newfield, 2016-11-15 A powerful, hopeful critique of the unnecessary death spiral of higher education, *The Great Mistake* is essential reading for those who wonder why students have been paying more to get less and for everyone who cares about the role the higher education system plays in improving the lives of average Americans.--Helen Small, author of *The Value of the Humanities* Los Angeles Review of Books

pacific coast business times: *Real Leaders Don't Boss* Ritch K. Eich, 2012-02-22 Forget leadership gimmicks and catch phrases, "instant" leadership manuals and Stalinesque approaches to bottom-line results. Skip the sharp cuts to cope with tough times, too. Real and effective leaders today—from the executive suite to the assembly line—quietly and consistently follow what Dr. Eich has identified as the seven principles of effective leadership. True leaders know how to make ethical judgments in the face of real-world challenges, and recognize what it takes to win loyalty and respect, motivate through passion, develop positive relationships, and enhance open communication. *Real Leaders Don't Boss* is an easy-to-understand, practical guide to leadership in the workplace and in life that can help anyone grasp what it takes to inspire, motivate, and lead. With the help of real-life stories and advice from top leaders, it teaches how, with the right direction and guidance, real leaders quietly stand back and, no matter the economic conditions, observe as others achieve success, which creates their own successes.

pacific coast business times: *California Dreaming* Lawrence J. McQuillan, 2015-05-01 A politically created crisis of epic proportions is brewing in California and elsewhere across the United States. For decades, public pension officials and politicians of both parties have promised their employees increasingly generous retirement benefits—while low-balling the contributions from

government agencies and employees that are needed to cover these promises—presenting our greatest financial challenge since the Great Depression. Pushing the pension liability from today and onto our children and grandchildren leaves them with a depleted future and a potentially bankrupt California. State and local governments will scramble to find funds, forcing them to raise taxes, slash public services, and/or declare bankruptcy. Schools, parks, emergency services, and public-employee retirement benefits will be at risk. Politicians will defer until circumstances force them to reckon with a disaster of their own making. The problem? For far too long, state and local governments have promised their employees increasingly generous retirement benefits—but without ensuring that sufficient funds will be on hand when the pension payments come due. In *California Dreaming*, Lawrence J. McQuillan pulls back the curtains covering this unfunded liability crisis. He describes the true extent of the problem, explains the critical factors that are driving public pension debt sky-high, and exposes the perverse incentives of lawmakers and pension officials that reward them for not fixing the problem and letting it escalate. Finally, he offers the six crucial reforms needed to restore the financial health of California and other threatened jurisdictions. If California Dreaming's roadmap for reform is adopted, the prospects for achieving a thriving, balanced and equitable future are highly favorable in California and any state or municipality facing its own public pension problem. If not, the many opportunities that once made the Golden State seem like a Promised Land will quickly evaporate.

pacific coast business times: *White Collar Crime* Katalin Ligeti, Stanislaw Tosza, 2018-11-29 White collar crime has expanded significantly over the course of the past two decades. Yet, not only as the amount of national and international legislation in the field grown, but it has also endured changes driving it away from the classic criminal law. These trends have been reflected in changes to national legislation, not infrequently prompted by supranational law, for example, in the financial or the environmental sector. New punishing regimes have emerged, such as UN blacklisting, smart sanctions, civil asset forfeiture, financial supervisory powers, compliance law, and anti-money laundering laws. Furthermore, the role of administrative sanctioning law has been growing as well as the role of private actors in the enforcement of punitive sanctions. The aim of this volume is to examine how various national criminal justice systems across Europe deal with the aforementioned challenges. In the first part, it takes a closer look at the following national systems: France, Germany, Poland and Sweden. Furthermore, it compares the European approach with the American one as a source of inspiration for unresolved difficulties and future developments. Further still, the authors explore those challenging issues regarding the field of economic and financial crime, including the Senior Managers Regime, corporate criminal liability, and whistle-blowers' protection. Timely and pertinent, this is an important new work in a fast-moving field.

pacific coast business times: *Tragedy of Fraud: Insider Trading Edition* James Ulvog, 2014-09-03 The fall from Big 4 audit partner to prison inmate. In March 2013, Scott London, CPA, was a partner in the international accounting firm of KPMG. He was in charge of the audit practice for the southwest region with responsibility and authority over 500 accountants. In April 2013, he saw his photograph on the front page of major national newspapers. In this book you will read of his fall from the dream job at the professional peak of his career to a convict residing in a federal penitentiary. There is a long list of additional consequences he pays for his illegal behavior, ranging from losing his CPA license, knowing he will be the subject of case studies for decades, never being able to talk to his former colleagues again, and having his college age daughter listen to her accounting professor discuss her dad's illegal behavior in class.
