Rojas, 2020-03-31 This book explores the workplace experiences, opportunities, and challenges that emerge from the nuances of diversity and inclusion dynamics in Latin American and Caribbean countries. review latam business class: Entrepreneurship and Religion Léo-Paul Dana, 2010-01-01 'I wish this book had been around when I tried to teach about entrepreneurship in its social context; life would have been much easier with these informed sources.' - Alistair R. Anderson, Aberdeen Business School, UK This rich and detailed book makes a very timely contribution to extending our understanding of entrepreneurship in its social context. Using selected examples, the respected contributors show how the values developed in religious beliefs and practices shape entrepreneurship. For too long the entrepreneur has been characterized as an isolated, economically driven individual, thus ignoring how enterprise and entrepreneurs are products of their society, their culture and their religion. This innovative book discusses both entrepreneurship and religion, as well as indicating how the synthesis of beliefs and practices combine in entrepreneurial endeavours. It provides a conceptually useful way of framing the individualistic entrepreneur in his or her social and cultural context, demonstrating how entrepreneurial agency operates within and through a variety of religious contexts. Illustrated with original photographs, this captivating book will be warmly welcomed by students and researchers with interests in entrepreneurship, sociology, religion and cultural studies. Government policy-makers in immigration will also find this book an invaluable read.
