seacoast business funding: Opportunities And Limitations For Biotechnology Innovation in Brazil Luiz A.B. de Castro, Carlos A.L. Neri, Carlos Bloch Junior, Manoel O.de Moraes Filho, 2013-09-02 Brazil has emerged as a significant financial and industrial power in recent times. Brazil is poised to become a significant player in the field of biotechnology, internationally, by taking advantage of circumstances not available in other countries, particularly its native biodiversity. This will, in turn, have an effect on commercial and entrepreneurial opportunities in the region. Topics covered in this text include adjustments that must be made in the regulatory framework to assure the success of business investment. This investment is crucial for training R&D scientists and developing new technologies. The book also covers a debate on transgenic plants which had political ramifications in the region and slowed the adoption rate of genetically modified organisms by almost a decade. The opportunities for commercialization of recombinant DNA technologies in the country are also presented. Opportunities and Limitations For Biotechnology Innovation In Brazil presents a concise overview of the biotechnology industry in Brazil and will be of great interest to a wide range of readers including researchers, biotechnology graduates, as well as both local and international investors.

seacoast business funding: Black Portsmouth Mark Sammons, Valerie Cunningham, 2004 Few people think of a rich Black heritage when they think of New England. In the pioneering book Black Portsmouth, Mark J. Sammons and Valerie Cunningham celebrate it, guiding the reader through

more than three centuries of New England and Portsmouth social, political, economic, and cultural history as well as scores of personal and site-specific stories. Here, we meet such Africans as the likely negro boys and girls from Gambia, who debarked at Portsmouth from a slave ship in 1758, and Prince Whipple, who fought in the American Revolution. We learn about their descendants, including the performer Richard Potter and John Tate of the People's Baptist Church, who overcame the tragedies and challenges of their ancestors' enslavement and subsequent marginalization to build communities and families, found institutions, and contribute to their city, region, state, and nation in many capacities. Individual entries speak to broader issues--the anti-slavery movement, American religion, and foodways, for example. We also learn about the extant historical sites important to Black Portsmouth--including the surprise revelation of an African burial ground in October 2003--as well as the extraordinary efforts being made to preserve remnants of the city's early Black heritage.

seacoast business funding: Myrtle Beach Barbara F. Stokes, 2007 This book shows how a coastal farming region became an internationally renowned tourist destination. A relatively young city, Myrtle Beach has quickly earned an international reputation as a tourism mecca on the South Carolina coast. Stokes provides the first comprehensive history of the community's quick rise to prominence as she maps the development of the Grand Strand's centerpiece in this account of the historical, economic, climatic, and cultural forces that shaped Myrtle Beach. Stokes focuses the core of her work on the period of rapid development from 1900 to 1980. The arrival of the railroad in 1902 began the transformation of Myrtle Beach from an isolated agricultural community into a summer beach resort. While the Great Depression brought economic strife to much of the nation, it presented wealthy industrialist John T. Woodside with the opportunity to expand Myrtle Beach's borders with the purchase of some sixty-five thousand acres. His construction of a golf course and the magnificent Ocean Forest Hotel inaugurated Myrtle Beach's resort culture. As Stokes explains, it was the war effort that had the greatest impact on the development of Myrtle Beach; the region's population and economy both swelled during World War II with the creation of what was called the Myrtle Beach Army Air Force Base. In separate chapters Stokes explores the importance of religious and educational institutions in developing the family-oriented identity of the city, the evolution of family-owned guesthouses into the high-rise hotels and sprawling resorts that now pepper the shoreline, the transformation of leisure activities from hunting and fishing to golf, racing, and watersports, and the efforts of city government to facilitate and encourage growth since incorporation in 1938. Stokes also looks at the history of African Americans in Myrtle Beach and in particular at the importance of Atlantic Beach. And she recounts the tragedy and opportunity Hurricane Hazel brought in October 1954.
