shows like business proposal: From Small Town to Downtown Lawrence A. Brough, James H. Graebner, 2004-04-06 The Jewett Car Company was born in the heyday of the electric railway boom in the 1890s. The company gained an excellent reputation for its elegant, well-built wooden cars for street railway companies, interurban lines, and rapid transit service. Cities large and small used Jewett cars, including New York, Boston, Chicago, and San Francisco. Many Jewett cars found their way to Indiana and many of the interurban lines employed the graceful, arch-windowed wood interurban that Jewett was famous for. Automobile competition and the problems of competing with much larger car builders, such as J.G. Brill and the St. Louis Car Company, signaled the beginning of the end. The company was offered the opportunity to produce munitions for World War I, but refused. The reason: the major source of finance for Jewett was a German nationalist banker from Wheeling, West Virginia, who refused to have the company do anything to harm Germany. As a direct result of that action, the Jewett Car Company failed.

New York Times chief television critic James Poniewozik offers a "darkly entertaining" (Carlos Lozada, Washington Post) history of mass media from the early 1980s to today, demonstrating how a volcanic, camera-hogging antihero merged with America's most powerful medium to become our forty-fifth president. In charting the seismic evolution of television from a monolithic mass medium into today's fractious confederation of spite-and-insult media subcultures, Poniewozik reveals how Donald Trump took advantage of these historic changes by constantly reinventing himself: from a boastful cartoon zillionaire; to 1990s self-parodic sitcom fixture; to The Apprentice reality-TV star; and finally to Twitter-mad, culture-warring demagogue. Already lauded as a "brilliant and daring" (Annalisa Quinn, NPR) work that defines a generation, Audience of One emerges as a classic in cultural criticism.

shows like business proposal: *Scrum Wars* Allan Levine, 1996-08-08 The image of the scrum -- a beleaguered politician surrounded by jockeying reporters -- is central to our perception of Ottawa. The modern scrum began with the arrival of television, but even in Sir John A. Macdonald's day, a century earlier, reporters in the parliamentary press gallery had waited outside the prime minister's office, pen in hand, hoping for a quote for the next edition. The scrum represents the test of wills, the contest of wits, and the battle for control that have characterized the relationship between Canadian prime ministers and journalists for more than 125 years. *Scrum Wars* chronicles this relationship. It is an anecdotal as well as analytical account, showing how earlier prime ministers like Sir John A. Macdonald and Sir Wilfrid Laurier were able to exercise control over what was written about their administrators, while more recent leaders like John Diefenbaker, Joe Clark, John Turner, and Brian Mulroney often found themselves at the mercy of intense media scrutiny and comment.

shows like business proposal: *Lady Gaga and Popular Music* Martin Iddon, Melanie Marshall, 2014-01-03 This book is a multi-faceted, interdisciplinary examination of the music and figure of Lady Gaga, combining approaches from scholars in cultural studies, art, fashion, and music. It represents one of the first scholarly volumes devoted to Lady Gaga, who has become, over a few short years, central to both popular (and, indeed, populist) as well as more scholarly thought in these areas and who, the contributors argue, is helping to shape—directly and indirectly—thought and culture both in the fields of the scholarly and the everyday. Lady Gaga's output is firmly embedded in a self-consciously intellectual pop culture tradition, and her music videos are intertextually linked to icons of pop culture intelligentsia like Alfred Hitchcock and open to multiple interpretations. In examining her music and figure, this volume contributes both to debates on the status of intertextuality, held in tension with originality, and to debates on the figuring of the sexualized female body, and representations of disability. There is interest in these issues from a wide range of disciplines: popular musicology, film studies, queer studies, women's studies, gender studies, disability studies, popular culture studies, and the burgeoning sub-discipline of aesthetics and philosophy of fashion.

shows like business proposal: *Regional Renaissance* Charles W. Wessner, Thomas R. Howell, 2019-09-14 This book examines ways in which formerly prosperous regions can renew their economy during and after a period of industrial and economic recession. Using New York's Capital Region (i.e., Albany, Troy, Schenectady, etc.) as a case study, the authors show how entrepreneurship, innovation, investment in education, research and political collaboration are critical to achieving regional success. In this way, the book provides other regions and nations with a real-life model for successful economic development. In the past half century, the United States and other nations have seen an economic decline of formerly prosperous regions as a result of new technology and globalization. One of the hardest-hit United States regions is Upstate New York or "the Capital Region"; it experienced a demoralizing hemorrhage of manufacturing companies, jobs and people to other regions and countries. To combat this, the region, with the help of state leaders, mounted a decades-long effort to renew and restore the region's economy with a particular focus on nanotechnology. As a result, New York's Capital Region successfully added thousands of well-paying,

skill-intensive manufacturing jobs. New York's success story serves as a model for economic development for policy makers that includes major public investments in educational institutions and research infrastructure; partnerships between academia, industry and government; and creation of frameworks for intra-regional collaboration by business, government, and academic actors. Featuring recommendations for best practices in regional development policy, this book is appropriate for scholars, students, researchers and policy makers in regional development, innovation, R&D policy, economic development and economic growth.
