san jose state business major: Academic Fault Lines Patricia J. Gumport, 2019-07-16 How did public higher education become an industry? This unprecedented account reveals how campus leaders and faculty preserved the vitality and core values of public higher education despite changing resources and expectations. American public higher education is in crisis. After decades of public scrutiny over affordability, access, and quality, indictments of the institution as a whole abound. Campus leaders and faculty report a loss of public respect resulting from their alleged unresponsiveness to demands for change. But is this loss of confidence warranted? And how did we get to this point? In *Academic Fault Lines*, Patricia J. Gumport offers a compelling account of the profound shift in societal expectations for what public colleges and universities should be and do. She attributes these new attitudes to the ascendance of industry logic—the notion that higher education must prioritize serving the economy. Arguing that industry logic has had far-reaching effects, Gumport shows how this business-oriented mandate has prompted colleges to restructure for efficiency gains, adopt more corporate forms, develop deeper ties with industry, and mold academic programs in the interest of enhancing students' future employment prospects. She also explains how industry logic gained traction and momentum, altering what constitutes legitimacy for public higher education. Yet Gumport's narrative is by no means defeatist. Drawing on case studies of nine public colleges and universities, as well as more than 200 stakeholder interviews, Gumport's nuanced account conveys the successful efforts of leaders and educators to preserve and even strengthen fundamental public values such as educational access, knowledge advancement regardless of currency, and civic responsibility. Ultimately, *Academic Fault Lines* demonstrates how intrepid faculty and administrators engaged their communities both on and off campus, collaborating and inventing win-win scenarios to further public higher education's expanding legacy of service to all citizens while preserving its centrality to society and the world.

san jose state business major: Pre-Milestone A and Early-Phase Systems Engineering National Research Council, Division on Engineering and Physical Sciences, Air Force Studies Board, Committee on Pre-Milestone A Systems Engineering: A Retrospective Review and Benefits for Future Air Force Systems Acquisition, 2008-03-11 The ability of U.S. military forces to field new weapons systems quickly and to contain their cost growth has declined significantly over the past few decades. There are many causes including increased complexity, funding instability,

bureaucracy, and more diverse user demands, but a view that is gaining more acceptance is that better systems engineering (SE) could help shorten development time. To investigate this assertion in more detail, the US Air Force asked the NRC to examine the role that SE can play during the acquisition life cycle to address root causes of program failure especially during pre-milestone A and early program phases. This book presents an assessment of the relationship between SE and program outcome; an examination of the SE workforce; and an analysis of SE functions and guidelines. The latter includes a definition of the minimum set of SE processes that need to be accounted for during project development.

Weiner, 2021-10-21 The ability to generate sources of revenue continues to be the most important skill for individuals working in the sport industry. Sales and Revenue Generation in Sport Business With HKPropel Access provides a comprehensive overview of the many ways in which sport organizations generate revenues, and it teaches students the practical concepts they will need for success. Going beyond theoretical concepts of sales and sales management, the authors present an applied approach to revenue generation in sport: the PRO method of sales (PROspect, PRObe, PROvide, PROpose, PROtect). Students will learn how this proven five-step process for generating revenue is applicable across all avenues in sport business, including ticket sales, broadcasting and media revenue, sponsorships, corporate giving and foundation revenue, fundraising and development, grant writing, concessions, merchandising, and social media. The text covers how this sales strategy can be applied across the broad industry of sport—from professional sport and intercollegiate and interscholastic athletics to amateur sport and organizations in recreational settings—equipping students for meaningful careers with longer-lasting success within any segment of the sport industry they enter. Throughout the text, themed sidebars provide examples of industry best practices and successful sales strategies. Case studies in each chapter, plus discussion questions, enhance the learning experience. Plus, related online learning activities delivered through HKPropel offer practical interactive scenarios that will better prepare students to enter the sport industry. Organized by function of revenue generation, each section offers a video, an interactive scenario activity that can be assigned by instructors, and sales script templates that may be downloaded and edited for a specific application. Sales and Revenue Generation in Sport Business is designed to give students the practical knowledge they need to understand the sales process and how to successfully apply the PRO method of sales. Armed with this foundational knowledge, they will be better prepared to begin and succeed in a career in sport business. Note: A code for accessing HKPropel is not included with this ebook but may be purchased separately.
