singapore a350 business class seats: Buying the Big Jets Paul Clark, 2017-07-14 Selecting the right aircraft for an airline operation is a vastly complex process, involving a multitude of skills and considerable knowledge of the business. Buying the Big Jets has been published since 2001 to provide expert guidance to all those involved in aircraft selection strategies. This third edition brings the picture fully up to date, representing the latest developments in aircraft products and best practice in airline fleet planning techniques. It features a new section that addresses the passenger experience and, for the first time, includes regional jet manufacturers who are now extending their product families into the 100-plus seating category. Overall, the third edition looks at a broader selection of analytical approaches than previously and considers how fleet planning for cost-leader airlines differs from that of network carriers. Buying the Big Jets is an industry-specific example of strategic planning and is therefore a vital text for students engaged in graduate or post-graduate studies either in aeronautics or business administration. The book is essential reading for airline planners with fleet planning responsibility, consultancy groups, analysts studying aircraft performance and economics, airline operational personnel, students of air transport, leasing companies, aircraft value appraisers, and all who manage commercial aircraft acquisition programmes and provide strategic advice to decision-makers. It is also a valuable tool for the banking community where insights into aircraft acquisition decisions are vital.

Their responses provide valuable lessons for the future – for airlines, for related industries, and for all sectors that find unexpected upheaval suddenly in their path. As a truly global business, the airline industry offers countless lessons in navigating uncertainty and the necessity of continual business transformation. The Airline Industry – A Comprehensive Overview: Dynamic Trends and Transformations is an up-to-date ‘state of the nation’ perspective on the airline industry. Its dedicated and detailed focus on airlines makes the book an invaluable tool in deciphering how airlines have been run and managed to date and provides a roadmap for the future evolution of the industry. The author has interviewed countless airline and related industry professionals in their respective fields of expertise, which adds layers of real-world insight to every chapter. Written in a lively and accessible style that will appeal to readers whether they are in academia or the airline industry, The Airline Industry – A Comprehensive Overview: Dynamic Trends and Transformations is essential reading for airline employees and undergraduate and postgraduate students and a vital point of reference for lecturers and researchers, economists, and business analysts looking for a thorough and commercial guide to the airline industry.

singapore a350 business class seats: AVIATION EXPLAINED HIMANSHU BANSAL, 2020-04-14 Civil Aviation is one of the most important industries of the World. It connects people, countries and cultures together. This Book explains the Basics of Civil Aviation. It has been written in order to explain Civil Aviation to a layman. If you are someone who is looking to join & make a career in Civil Aviation, this may be the perfect Hand Book for you. People around the World travel with different Airlines and pass through different Airports. What they don't realize is that a lot of work is required to make an airline successful. Illustrations and examples have been chosen carefully to explain every thing in simple terms. Civil Aviation is a Tough and Complicated Business. The Competition is high and Profit Margins very low. In fact, if an Airline reports a Profit of 5%, it is doing really well. In the past, we have had many Airline Companies opening and shutting down. This is due to the high probability of Airlines failing to survive. The reasons for failure may differ from Airline to Airline. Some may close down due to Financial Crunch, while some may be affected by the

Political or Economic conditions in their country. When we travel, we don't realize what all happens behind the scenes at the Airport. The Airline Ground Staff has a lot of responsibilities on their shoulders. With the help of Airport staff, they perform all their duties efficiently when you are busy shopping at Duty Free Retail. The aim of an Airline Business is to offer super quick services in an efficient and effective manner to attain Customer Delight.

singapore a350 business class seats: *Airline Operations and Management* Gerald N. Cook, Bruce G. Billig, 2023-05-04 Airline Operations and Management: A Management Textbook presents a survey of the airline industry, with a strong managerial perspective. It integrates and applies the fundamentals of several management disciplines, particularly operations, marketing, economics and finance, to develop a comprehensive overview. It also provides readers with a solid historical background, and offers a global perspective of the industry, with examples drawn from airlines around the world. Updates for the second edition include: Fresh data and examples A range of international case studies exploring real-life applications New or increased coverage of key topics such as the COVID-19 pandemic, state aid, and new business models New chapters on fleet management and labor relations and HRM Lecture slides for instructors This textbook is for advanced undergraduate and graduate students of airline management, but it should also be useful to entry and junior-level airline managers and professionals seeking to expand their knowledge of the industry beyond their functional area.

Evidence from Qantas' Perth-London Service* Linus Benjamin Bauer, 2019-07-24 Master's Thesis from the year 2019 in the subject Economics - Other, grade: GPA 4.0, City University London (School of Mathematics and Engineering), course: Air Transport Management, language: English, abstract: In the past 15 years, various ultra long-haul routes were operated by airlines from different regions across the globe. Between 2004 and 2013, the majority of ultra long-haul routes were axed mainly due to the increase in jet fuel prices. Despite negative developments in the past, current airlines still operate or intend to operate ultra long-haul routes while other airlines and various experts highly question the feasibility of cost-intensive services. Can ultra long-haul flights be profitable at all? Due to the lack of clear academic evidence, the author Linus Benjamin Bauer aims to enhance and update the current debate, whether ultra long-haul flights in general are either commercially viable or not. Key findings from Bauer's comprehensive analysis and developed revenue-cost model conclude that due to the improvement of fuel-efficient long-range aircraft such as the Boeing 787 Dreamliner and Airbus A350, ultra long-haul operations nowadays may prove to be resilient. The cost advantages of such cost-intensive operations may be slight compared to one-stop services. However, ultra long-haul routes are likely to make up for it in market positioning by targeting premium customer segments with lower price sensitivity, one of the main drivers of the profitability of the 21st century airline business.

singapore a350 business class seats: *Airlines in a Post-Pandemic World* Nawal K. Taneja, 2021-06-08 The COVID-19 pandemic represents an extraordinary inflection point that caught airlines worldwide unprepared, causing CEOs to recalibrate their business models. This book explains why this unprecedented pandemic is different from the past disruptions experienced by the airline industry during the past 50 years, and what airlines and related businesses now can do to adapt to the dramatically changed marketplace. This book presents two future scenarios: continuous improvements and elastic supply. These are considered in three specific contexts for the rebuilding of the airline business. These contexts, in the order of urgency with respect to change from the status quo, are the following. The first context is for airlines to become better prepared to deal with frequent and deeper disruptions that could be localized or globalized relating to such areas as climate change, geopolitics, and cybersecurity. The second context is to collaborate and integrate within the much broader travel ecosystem, possibly using platforms to innovate on new value systems. The third context, which has always been the case and drives the first two, is for airlines to offer real solutions to people's travel needs, solutions developed with imagination and turbocharged innovation, even as we contemplate new technology airplanes and mobility as a service solutions.

This book is recommended reading for all senior-level practitioners of airlines and related businesses, as well as aviation policy makers worldwide.

singapore a350 business class seats: The Business of Tourism J. Christopher Holloway, Claire Humphreys, 2022-09-07 Tourism as an industry is constantly evolving. Trends and attitudes are susceptible to changes in what people look for in a holiday, which can change within different economic contexts; generational shifts; the political landscape; and most recently, the Covid-19 global pandemic. This popular and comprehensive textbook helps students to not only understand these changes but study them with a critical mindset and historical perspective, desirable for success in assessments. The text also continues to retain its focus on 'business' and the operational aspects of tourism, making it especially useful for students considering a career and/or short term placement in the tourism industry. This 12th edition of The Business of Tourism includes updates to take in changes to the tourism industry and consumption behaviours as a result of: Brexit (the UK's decision to leave the European Union) the pandemic and its impacts on nature; the operation of attractions; event tourism; hotel chains; transport; and governmental support Sustainability and the reduction of the negative impacts caused by tourism Chris Holloway was a former Professor of Tourism Management at the University of the West of England. Claire Humphreys is a former Head of Department and Principal Lecturer at the University of Westminster.

singapore a350 business class seats: Strategy in Airline Loyalty Evert R. de Boer, 2017-10-09 This book offers the first comprehensive exploration of frequent flyer programs. By combining academic research with extensive insights and examples from the actual business world, it explores the key drivers and strategies of airline loyalty marketing today in an unprecedented manner. Strategy in Airline Loyalty also explores how the programs have evolved over time from marketing programs to financial powerhouses, identifying both the catalysts for change, as well as the strategic options and underlying trade-offs available to airlines. Covering diverse angles ranging from behavioral economics, to accounting, and structural design, the book reviews every core aspect of frequent flyer programs and offers extensive frameworks and definitions. The book provides a useful and complete reference for researchers, and helps those interested in frequent flyer programs to develop a better understanding of their past, present and future.

singapore a350 business class seats: B2B Brand Management Philip Kotler, Waldemar Pfoertsch, 2025-09-18 As B2B solutions continue to advance, industrial companies are embracing branding to differentiate themselves and generate preference for their offers. While branding has been crucial to the success of renowned consumer goods like Coca-Cola, McDonald's, and Mercedes-Benz, it's time for more industrial companies to systematically enhance their brand management strategies. Industrial pioneers such as Caterpillar, DuPont, GE, and Siemens have paved the way, demonstrating that effective branding goes beyond assigning names to products or services. It entails a commitment to delivering the level of performance associated with the company's offerings—a brand promise that fuels all organizational activities and collaborations with partners. This book's second edition builds upon the conceptual framework, exploring transformative performance marketing and Artificial Intelligence to elevate B2B brand management. By integrating theoretical aspects of H2H (Human-to-Human) marketing, service-dominant logic, design thinking, and digitalization, it deepens the understanding of branding for industrial products. Featuring dozens of real-world examples, this book illustrates how successful branding can propel industrial companies to new heights. Readers can expect to gain actionable insights and a comprehensive understanding of the evolving landscape of B2B brand management, enabling them to propel their industrial branding to the next level.

singapore a350 business class seats: The Regulation of Air Transport Barry Humphreys, 2023-04-17 The regulation of modern civil aviation can be traced back to the later years of the

Second World War. An intense debate about the future regulatory regime resulted in a compromise which to this day essentially dictates the structure of the global airline industry. Further progress towards 'normalising' the industry appears to be slowing down, and perhaps even going into reverse. Without an understanding of the development of regulation, it is not possible to understand fully the industry's current problems and how they might be resolved. Many books have been written about the development of international air transport, covering deregulation, privatisation, the emergence of new business models among other things, but few if any have taken a broad view of the trends which have determined the industry's current structure. The Regulation of Air Transport charts the development of aviation from the end of the Second World War to the present day, following the key trends and disruptive forces. It provides an overview of what has determined the industry's current structure, the problems still facing the industry and the ways in which it could develop in the future. This wide-ranging study is important reading for both professionals and academics within the aviation field, as well as anyone interested in the broader development of economic regulation.

singapore a350 business class seats: Aviation Systems Andreas Wittmer, Thomas Bieger, Roland Müller, 2021-10-13 This book provides an overview of the aviation sector by focusing on all major aspects embedded in the environment (subsystems) and the market of aviation. The book explains the linkages between subsystems politics, society, technology, economy, environment, and regulation, and how these subsystems influence each other and the market. The book starts by describing the aviation system, then focuses on the supply side and the demand side of the system and in a final part focuses on steering and controlling the system of aviation from a managerial, economic, and regulatory perspective. Examples and case studies of airports, airlines, and the production industry in each chapter support the application-oriented approach. The summary and review questions help the reader to understand the focus and main messages of each chapter. Students and researchers in business administration with a focus on aviation, as well as professionals in the industry looking to refresh or broaden their knowledge in the field will benefit from this book.

singapore a350 business class seats: Applied Marketing Analytics Using Python Gokhan Yildirim, Raoul V. Kübler, 2025-03-21 It is vital for marketers today to be comfortable in their use of data and quantitative approaches and have a thorough grounding in understanding and using marketing analytics in order to gain insights, support strategic decision-making, solve marketing problems, maximise value and achieve success. Taking a very hands-on approach with the use of real-world datasets, case studies and Python, this book supports students and practitioners to explore a range of marketing phenomena using various applied analytics tools, with a balanced mix of technical coverage alongside marketing theory and frameworks. Supporting online resources include datasets and software codes and solutions as well as PowerPoint slides, a teaching guide and a testbank. This book is essential reading for advanced level marketing students and practitioners who want to become cutting-edge marketers. Dr Gokhan Yildirim is an Associate Professor of Marketing at Imperial College Business School, London. Dr Raoul V. Kübler is an Associate Professor of Marketing at ESSEC Business School, Paris.

singapore a350 business class seats: Global Air Transport Management and Reshaping Business Models for the New Era Kankaew, Kannapat, 2022-05-27 The air transport industry is highly vulnerable to environmental changes as was seen when the recent COVID-19 pandemic caused most airline operations to cease. However, for decades airlines have been collapsing around the globe as the business of managing airline operations has become stressed due to price competition. This is detrimental to air carriers since air transport products and services are the same. Moreover, it impacts other industries such as tourism, hotels, and restaurants, which contribute to the derailment of economic and social activities. Thus, it is essential to determine new practices and strategies that can allow air transport management to be enriched and to flourish. Global Air Transport Management and Reshaping Business Models for the New Era provides a comprehensive collection of knowledge on the new era of business management on air transport. It

provides strategies, technologies, and tools used in the reshaping of the air transport business model. Covering topics such as customer experience, robotic process automation, and airline alliances, this major reference work is an essential resource for airline managers, supply chain specialists, air transport managers, students and faculty of higher education, libraries, researchers, economists, government officials, and academicians.
