Introduction to SNL Business Meetings

SNL business meetings have become a staple of the show's comedic repertoire, often serving as a microcosm of corporate culture. Through various sketches, the show has been able to dissect the nuances of business interactions, highlighting the absurdities and idiosyncrasies that often accompany them. This analysis not only entertains but also prompts viewers to reflect on their own experiences within the corporate world. The humor found in SNL's portrayal of business meetings stems from its ability to relate to a wide audience, tapping into shared experiences of awkwardness, miscommunication, and the quest for authority in a corporate setting.

The Evolution of Business Meeting Sketches on SNL

Since its inception in 1975, SNL has evolved in its portrayal of business meetings, mirroring changes in the corporate landscape and societal attitudes toward work. Initially, sketches focused on traditional corporate settings, often poking fun at the rigidity and formality of business culture. As societal norms shifted, so did the content of these

sketches, incorporating more contemporary issues such as diversity, technology, and remote work.

The Early Years: Traditional Corporate Culture

In the early years of SNL, sketches often depicted exaggerated versions of corporate executives and their meetings. Characters were frequently portrayed as out of touch and overly serious, reinforcing stereotypes about business leaders. These sketches provided a comedic escape from the often dull realities of office life, allowing audiences to laugh at the absurdity of corporate jargon and hierarchical structures.

The Shift to Modern Business Dynamics

As the 1990s and 2000s approached, SNL began to reflect modern business dynamics, incorporating elements such as the rise of tech startups and the gig economy. Sketches began to address the challenges of remote work and the influence of technology on business interactions. This shift made the sketches more relatable to a younger audience, who were experiencing the changing landscape of work firsthand.
