What is Small Women Owned Business Certification?

Small women owned business certification is a formal recognition that a business is at least 51% owned, operated, and controlled by a woman or women. This certification is often provided by various organizations, both governmental and non-governmental, that seek to promote the growth of women-owned businesses in the marketplace. The most recognized certifying bodies include the Women's Business Enterprise National Council (WBENC) and the National Women Business Owners Corporation (NWBOC). These organizations provide a structured and standardized process for certifying women-owned businesses, ensuring that they meet specific criteria and standards.

The certification process typically involves submitting documentation that verifies ownership, control, and operation of the business by women. This documentation may include business licenses, financial statements, and personal identification of the owners. Once certified, businesses gain access to numerous opportunities, including government contracts, corporate supplier

diversity programs, and networking events aimed at women entrepreneurs.

The Certification Process

The certification process for small women owned businesses is structured, requiring careful preparation and documentation. Below is an overview of the typical steps involved in obtaining certification:

small women owned business certification: Classified Henry Vinson, 2023-05-08 Don't be the best in the world at what you do; be the only one in the world who does what you do. --Jerry Garcia Government Contracting Classified is a book of issues and problems concerning government contracting. Henry was raised in a small town (population about eighty) in Northern Middle Tennessee three miles from the Kentucky border. That area is now known as Land Between the Lakes National Recreation Area. That town was Model, Tennessee. He retired after thirty-two years from the federal government as a federal contracting officer and division chief with an unlimited warrant. Then he ran the Center for Government Contracting at the Dallas County Community College Small Business Development Center (SBDC), where he taught seminars and counseled contractors about government contracting. After that for nine years, he owned his own business, where he wrote technical proposals for contractors. His last position was on the staff of the University of Texas at Arlington Cross Timbers Procurement Technical Assistance Center, and he retired after more than fourteen years. He conducted government contracting webinars/seminars and did one-on-one counseling with potential and current government contractors (small, medium-sized, and large contractors). He worked with federal, state, and local governments. Henry has conducted over seven hundred webinars/seminars, mostly in Texas, over the past twenty-five years. He counseled thousands of contractors and had thousands in his seminars. During his time as a Contracting Officer with an unlimited warrant and working for colleges and universities, he noticed several issues and problems kept coming up over and over. He has identified many of those issues and problems. He points them out in this book with commentary. Although this book is not all-inclusive, it does identify many issues and problems that should be of interest to newcomers and the seasoned government contractor as well. Henry not only points out important issues and problems but provides his personal comments (with seriousness and humor). I assure you before God that what I am writing you is no lie. --Galatians 1:20
