small business idea for men: *The Foundation and Growth of African Women Entrepreneurs* Chi Anyansi-Archibong, 2021-02-18 This book explores how culture and tradition have impacted the tendency for African women to opt for entrepreneurship. The first section presents literature on the concept of entrepreneurship and introduces traditional African women entrepreneurs—the first-generation, culture-driven entrepreneurs, driven by the need to alleviate poverty within the family. The second section covers the modern, second-generation entrepreneurs driven by such forces as education, globalization, and technology. Further, the author assesses the regional perspectives on entrepreneurship and explores the entrepreneurial ecosystems to determine their relevance to the development of entrepreneurial spirit in Africa and among women in particular. This book expands on knowledge about the role that women play in the socio-economic development of the African continent.

small business idea for men: *Growth-oriented Women Entrepreneurs and Their Businesses* C. G. Brush, Candida G. Brush, 2006-01-01 The female entrepreneurship researchers community has to thank these women for their brilliant work in reviewing, revising and selecting the best papers from the second Diana International Conference that were finally edited for this volume. . . the book is a good compendium of female entrepreneurship circumstances in different countries that focuses specifically on the explanation as to why gender plays a role in the number of ventures started by women and why they are in general smaller and less growth-oriented. Manuela Pardo-del-Val, *International Entrepreneurship and Management Journal* . . . this edited text draws upon a range of international contributors to present a comparative overview of challenges facing female entrepreneurs seeking to grow their firms. . . this is an interesting book that makes a welcome contribution to contemporary debate. Susan Marlow, *International Small Business Journal* The data and information presented in this work will be of particular interest to students and scholars of entrepreneurship or labor and women s studies. Recommended. General readers; upper-division undergraduate through professional collections. E.P. Hoffman, *Choice* Enterprising new firms drive economic growth, and women around the world are important contributors to that growth. As entrepreneurs, they seize opportunities, develop and deliver new goods and services and, in the process, create wealth for themselves, their families, communities, and countries. This volume explores the role women entrepreneurs play in this economic progress, highlighting the challenges they encounter in launching and growing their businesses, and providing detailed studies of how their experiences vary from country to country. Statistics show that businesses owned by women tend to remain smaller than those owned by men, whether measured by the number of employees or by the size of revenues. Because women-led firms fail to grow as robustly, the opportunities to innovate and expand are limited, as are the rewards. Based on recent studies that examine the links between entrepreneurial supply and demand issues, this volume provides insights into how women around the world are addressing the challenges of entrepreneurial growth. The first set of chapters consists of country overviews and provides discussions of the state of women growing businesses. The second set of chapters describes research projects under way in different countries and explores

more focused topics under the umbrella of women business owners and business growth. The volume concludes with an agenda and projects for future research. Academics and policymakers will gain a greater understanding of women's entrepreneurial behaviors and outcomes through this path-breaking volume. Those who support women through education and training, policymaking, or providing entrepreneurial resources will also find the volume of great practical interest.

The book discusses the wide-spread over-optimism regarding youth entrepreneurship, self-employment, and its impact on economic innovation and job creation, resulting from a disregard of critical contextual features and the characteristics of young entrepreneurs themselves. The authors give due acknowledgment of the importance of both factors

and so fully understand the impediments to youth entrepreneurship, especially in a transition context. Furthermore, they seek to assess the opportunities and constraints of promotion policies in transition economies. small business idea for men: Entrepreneurship in Africa Ven Sriram, David Lingelbach, Tigineh Merasha, Franklyn Manu, 2020-11-16 It is now widely recognized that in regions like Africa, for economic and other reasons, the public sector has had to disengage and divest from many areas of the economy and allow private enterprise, especially scalable start-ups and new ventures, to enter and flourish if economic development and employment are to grow. There is, however, a training and education gap since entrepreneurship is rarely taught formally at African universities and, when it is, it is often approached from a Western perspective which may not be appropriate given that African environments are significantly different from most Western ones in terms of economic infrastructure and political considerations. This book allows readers to understand the African entrepreneurial context by guiding them through the principal stages in the life of a new venture, and offers approaches, both Western and indigenous, that can inform their entrepreneurial actions. It concludes by examining some specialized topics, including female, youth, and social entrepreneurship, as well as real estate and technology. Exercises throughout the book will enable readers to evaluate their motivations and preparedness for entrepreneurship and learn how to communicate a new venture's key features to potential stakeholders. By focusing on the distinctive features of entrepreneurship in the African context, and taking a conversational tone, this is an informative and practical text that will be useful for students of Global Entrepreneurship and Business as well as actual and prospective entrepreneurs in the private, non-profit, and public sectors.

small business idea for men: *Women, Men and Persons* Britt-Marie Thurén, 2025-06-06 Urban ethnography about gender change Madrid in the 1990s was a lively place. This book presents ethnographic examples and analyses of the way gender meanings were changing. The context is middle class; comparisons are made with an earlier work in a working class area of Valencia. The theoretical focus is on processes of cultural change, using mainly speech in natural situations as the empirical base since talking is one form of doing. The historical and social background is also described. Madrilenian conversations were full of examples from all walks of life and personal situations. The historical moment was one of change from an authoritarian society to a more democratic one. These larger circumstances were often symbolized in terms of gender issues. A common idea in Madrilenian discussions was that women should be or become persons. This use of the concept person has little to do with individualism or psychology. It was rather an everyday way of expressing opposition to essentialized and hierarchical categorizations. The phrase meant that a person is an active human being who refuses to be categorized by others, whereas a woman must look and behave so that her gender is clearly contrasted to that of a man. And this, it was thought, places women at a disadvantage. But there were also those who thought that a woman can only be a person if she is a woman first.
