snhu business degree: Strategic Transformation of Higher Education Stewart E. Sutin, W. James Jacob, 2016-09-23 Strategic Transformation of Higher Education examines the broken revenue-driven business model characteristic of higher education in an environment that demands greater access, more affordable tuition, accountable leaders, and faculty who deliver a consistently high quality of relevant education. The authors demonstrate that enduring business models must support institutional academic missions and that they are integral to systemic and strategic transformation by diagnosing the case for change and offering a practitioners' guide for reform. This book surveys deficient government education policies, practices and funding formulas of select countries and offers remedies. It identifies impediments to change, along with ways to develop and deliver evidence-based solutions to improve institutional effectiveness and operating efficiencies, and it cites exemplars of change in these areas. Special attention is given to leadership attributes requisite of driving institutional redesign and to a paradigm shift that calls for transition from knowledge creation to plan implementation. Strategic Transformation of Higher Education emphasizes a collective need for reflection, a will to consistently question prevailing assumptions, and the courage to afford practical application to innovation.

snhu business degree: Pursuing Quality, Access, and Affordability Stephen C. Ehrmann, 2023-07-03 Whether they recognize it or not, virtually all colleges and universities face three GrandChallenges:·Improve the learning outcomes of a higher education: A large majority of college graduates are weak in capabilities that faculty and employers both see as crucial.·Extend more equitable access to degrees: Too often, students from underserved groups and poor households either don't enter college or else drop out without a degree. The latter group may be worse off economically than if they'd never attempted college.·Make academic programs more affordable (in money and time) for students and other important stakeholder groups: Many potential students believe they lack the money or time needed for academic success. Many faculty believe they don't have time to make their courses and degree programs more effective. Many institutions believe they can't afford to improve outcomes.These challenges are global. But, in a higher education system such as that in the United States, the primary response must be institutional. This book analyzes how, over the years, six pioneering colleges and universities have begun to make visible, cumulative progress on all three fronts.

snhu business degree: Habitual Rhetoric Alex Mueller, 2023-09-19 Writing has always been digital. Just as digits scribble with the quill or tap the typewriter, digits compose binary code and produce text on a screen. Over time, however, digital writing has come to be defined by numbers and chips, not fingers and parchment. We therefore assume that digital writing began with the invention of the computer and created new writing habits, such as copying, pasting, and sharing.

Habitual Rhetoric: Digital Writing before Digital Technology makes the counterargument that these digital writing practices were established by the handwritten cultures of early medieval universities, which codified rhetorical habits—from translation to compilation to disputation to amplification to appropriation to salutation—through repetitive classroom practices and within annotatable manuscript environments. These embodied habits have persisted across time and space to develop durable dispositions, or *habitus*, which have the potential to challenge computational cultures of disinformation and surveillance that pervade the social media of today.

snhu business degree: Higher Education and Employability Peter J. Stokes, 2017-11-14 2016

Phillip E. Frandson Award for Literature in the Field of Professional, Continuing, and/or Online Education, University Professional and Continuing Education Association (UPCEA) Higher Education and Employability makes a crucial contribution to the current reassessment of higher education in the United States by focusing on how colleges and universities can collaborate with businesses in order to serve the educational and professional interests of their students. Drawing on his extensive experience with universities and the business world, Peter J. Stokes argues that the need for closer alignment between the two sectors has never been more critical—and that the opportunities for partnership have never been greater. This book includes a series of trenchant case studies of particular universities that have developed ambitious collaborative programs—New York University, Northeastern University, and the Georgia Institute of Technology. Incisive and practical, this book surveys the full range of current partnerships between businesses and higher education and points to opportunities that will best serve students now and in the future.

snhu business degree: Refugees and Higher Education Lisa Unangst, Hakan Ergin, Araz

Khajarian, Tessa DeLaquil, Hans de Wit, 2020-07-13 Refugees and Higher Education provides a cross-disciplinary lens on one American university's approach to studying the policies, practices, and experiences associated with the higher education of refugee background students. The focus is not only on refugee education as an issue of access and equity, but also on this phenomenon as seen through the lens of internationalization. What competencies are called for among university faculty and staff welcoming refugee-background students to their institutional contexts? How might "distance learning" be considered anew? These challenges and opportunities for institutional growth will be closely considered by this group of authors from educational leadership, social work, curriculum development, and higher education itself. They address key world regions, and sub-topics ranging from online education in refugee camps to the Brazilian and Colombian responses to the emerging crisis in Venezuela. Scholars researching refugee education cross-nationally often find that refugee education literature is parsed by disciplinary field. This book, in contrast, offers a comprehensive, multi-disciplinary overview of refugee education issues around the world. These perspectives also provide key insights for faculty and staff at higher education institutions that currently enroll asylees or refugees, as well as those that may do so in the future.

This book explores those questions and many more. *Remote Learning and Distance Education* provides the historical background and context for understanding the origins and evolution of distance education - an evolution which was accelerated dramatically, and in unpredictable ways, when the COVID-19 pandemic transformed millions of actual classrooms into virtual ones. Readers will better understand the problems, controversies and solutions surrounding distance education, from access and equity issues to maintaining academic integrity. Profiles of key figures and organizations, such as Khan Academy, give readers an introduction to important players in this potentially revolutionary approach to teaching and learning.
