spain business schools: American Firms in Europe Hubert Bonin, Ferry de Goey, 2009 The Americanization of Europe and the strategic initiatives of American firms abroad have been well studied. The expansion of American firms in Europe, however, lacked a comprehensive study. This book gathers the works of two dozen economic and business historians from across Europe, preceded by Mira Wilkins' comparative essay. The collection addresses the timetable and pace of American direct investment in Europe, the patterns followed in each country according to the specificities of each industry and service sector, and the strategies followed by the different firms. The studies go beyond the facts, scrutinizing the immaterial aspects of this business history, especially European perceptions of American firms and the essential stakes of corporate images and identities. The Europeanization of American firms is a key issue, including social relations, management, commercial policies, brand image, connections and embeddedness. The authors gauge the reaction of public authorities and lobbies (industrialists and trade unions). Graphs and tables provide data, while overviews of ads published by American affiliates fuel analyses of consumer perception.

spain business schools: The World Guide to CSR Wayne Visser, Nick Tolhurst, 2017-09-08 The World Guide to CSR is the first book to provide comparable national profiles that describe the evolution and practice of Corporate Sustainability and Responsibility (CSR) for 58 countries and 5 global regions. Each regional and national profile includes key information about the relevant CSR history, country-specific issues, trends, research and leading organizations. The purpose of the book is to give CSR professionals (including managers, consultants, academics and NGOs focusing on the social, environmental and ethical responsibilities of business) a quick reference guide to CSR in different regional and national contexts. The need for the book is premised on the fact that CSR professionals and researchers more often than not have a multinational remit and are required to benchmark performance internationally, but find that country-specific CSR information is ad hoc, limited or non-existent. Even where national CSR research exists, it is often hidden in academic journals that practitioners cannot access or do not have the time or inclination to read. The book is an edited volume, with expert contributors from around the world, all of whom have been screened and selected on the basis of their qualifications and experience in CSR. Each regional/country profile includes the following subsections: CSR in context Priority issues Trends Legislation and codes Organizations Case studies Educational institutions References This unique resource will be an essential acquisition for all organisations who need to benchmark their CSR strategies throughout different regions and cultures and want the best possible intelligence on the key issues and concerns relating to corporate social responsibility in all of the markets in which they operate.

spain business schools: Entrepreneurship Ecosystems and Their Opportunities and Challenges Abdelli, Mohammed El Amine, Ul-Durar, Shajara, Wasef Hattab, Hala, 2023-09-18 Entrepreneurs are exceptionally gifted individuals capable of spotting projects, marshaling resources, inventing ideas, taking risks, and forming businesses. Prospective entrepreneurs must be

inspired and motivated to pursue self-employment businesses in today's volatile business environment and highly sophisticated information technologies. However, governments have been attempting to promote entrepreneurship by assisting the growth of small and medium-sized enterprises (SMEs). SMEs' primary challenges are lack of working capital and marketing challenges. Entrepreneurship is a combination of difficult-to-teach skills, attitudes, and knowledge that can be developed. *Entrepreneurship Ecosystems and Their Opportunities and Challenges* explores and examines the importance of these factors in establishing a virtuous cycle of long-term sustainability in countries worldwide. The book promotes global communities to acquire an entrepreneurial mindset. Covering topics such as crowdfunding experiences, financial solutions, and social enterprises, this premier reference source is an excellent resource for entrepreneurs, business leaders, government officials, students and educators of higher education, researchers, and academicians.

spain business schools: The New Multinationals Mauro F. Guillén, Esteban García-Canal, 2010-09-23 A new breed of multinational companies is reshaping competition in global industries. For most of the 19th and 20th centuries, multinational firms came from the most technologically advanced countries in the world. Over the last two decades, however, new multinational firms from upper-middle-income economies (e.g. Spain, Ireland, Portugal, South Korea, and Taiwan), developing countries (e.g. Egypt, Indonesia, and Thailand), and oil-rich countries (e.g. United Arab Emirates, Nigeria, Russia, and Venezuela) have become formidable global competitors. These firms do not necessarily possess technological or marketing skills. In contrast to the classic multinationals, they found strength in their ability to organize, manage, execute, and network. They pursued a variety of strategies including vertical integration, product diversification, learning by doing, exploration of new capabilities, and collaboration with other firms. This book documents this phenomenon, identifies key capabilities of the new multinationals, and provides a new conceptual framework to understand its causes and implications.

spain business schools: *The Aspen Institute Guide to Socially Responsible MBA Programs: 2008-2009* The Aspen Institute, 2008-06-23 The Aspen Institute, a premier non-profit, research organization for corporate social responsibility, offers the first comprehensive guide to the world's leading global MBA programs in CSR—an indispensable guide for prospective students, universities, hiring companies, and libraries. This guide provides an overview of how global MBA programs bring social impact management into their curricular and extracurricular programs. Social impact management, which includes environmental, ethical, and corporate governance issues, is the field of inquiry at the intersection of business needs and wider societal concerns that reflects their complex interdependency. Without an understanding of this interdependency, neither business nor the society in which it operates can thrive. Each year business schools from around the world strive to differentiate themselves and attract the best and the brightest future business leaders, while prospective MBAs are looking for a program that will provide effective management skills to succeed in the changing face of business. The bottom line is no longer exclusively dedicated to financial returns. Rather, business leaders must also consider the environmental and social impacts of their decisions in order to compete in today's marketplace. The MBA schools that participate in the Aspen Institute's survey, and are therefore highlighted in the Aspen Institute Guide for Socially Responsible MBA Programs: 2008-2009, are leaders in integrating these issues into their MBA curricula.

spain business schools: Handbook of Research on Strategic Retailing of Private Label Products in a Recovering Economy Gómez-Suárez, Mónica, Martínez-Ruiz, María Pilar, 2016-06-20 As the global market continues to recuperate from economic downfall, it is essential for private label products to find ways to compete with alternatives offered by wholesale and national retailers. The *Handbook of Research on Strategic Retailing of Private Label Products in a Recovering Economy* emphasizes advertising and promotional approaches being utilized, as well as consumer behavior and satisfaction in response to marketing strategies and the sensitive pricing techniques being implemented to endorse generic and store-brand products available on the market. Highlighting brand competition between wholesalers, retailers, and private brand names following a global economic crisis, this publication is an extensive resource for researchers, graduate-students, economists, and business professionals.
