start a business for dummies pdf: *Microfinance and Financial Inclusion* Eugenia Macchiavello, 2017-07-20 Following the recent global financial crisis there is a growing interest in alternative finance - and microfinance in particular - as new instruments for providing financial services in a socially responsible way or as an alternative to traditional banking. Nonetheless, correspondingly there is also a lack of clarity about how to regulate alternative financial methods particularly in light of the financial crisis' lessons on regulatory failure and shadow banking's risks. This book considers microfinance from a legal and regulatory perspective. Microfinance is the provision of a wide range of financial services, particularly credit but also remittances, savings, to low-income people or financially excluded people. It combines a business structure with social inspiration, often resorts to technological innovations to lower costs (Fintech: e.g. crowdfunding and mobile banking) and merges with traditional local experiences (e.g. financial cooperatives and Islamic finance), this further complicating the regulatory picture. The book describes some of the unique dimensions of microfinance and the difficulties that this can cause for regulators, through a comparative analysis of selected European Union (EU) countries' regimes. The focus is in fact on the EU legal framework, with some references to certain developing world experiences where relevant. The book assesses the impact and validity of current financial regulation principles and rules, in light of the most recent developments and trends in financial regulation in the wake of the financial crisis and compares microfinance with traditional banking. The book puts forward policy recommendations for regulators and policy makers to help address the challenges and opportunities offered by microfinance.

start a business for dummies pdf: Competence-Based Innovation in Hospitality and Tourism Harald Pechlaner, Elisa Innerhofer, 2016-04-14 Dr Pechlaner and Dr Innerhofer, the editors of Competence-Based Innovation in Hospitality and Tourism, argue that the industry operates within highly challenging and competitive environments. Changing environmental and market conditions continually force hotel businesses and service providers to offer their customers new and modified products and services, in order to remain competitive; those which respect value perceptions of markets and sustainable stakeholder reactions. This then raises the question of how innovations within this industry must be developed in order to achieve competitive differentiation. The book demonstrates that the development and analysis of successful innovation strategies should integrate the resource-based view and its advancements, the competence-based view, as well as the dynamic capabilities approach and the relational view. Resource-based strategic management approaches view the firm as a bundle of resources and competences. They point to the importance of firm-specific resources and competences in explaining variations in competitive positions and performance differentiation between companies. The challenge of hospitality and tourism is to

develop resources and competences that drive innovations. This book will serve to advance the status quo of tourism research literature by combining innovation theories with network theories and tourism and destination development, by illustrating the development of cooperative competences and innovations in tourism and by showing, in a tailored way, how the challenge of the development of resources and competences that drive innovations in tourism can be managed.
