starling bank business account: Fintech, Small Business & The American Dream Karen G. Mills, 2024-06-21 Small businesses are the backbone of the U.S. economy. They are the biggest job creators and offer a path to the American Dream. But for many, it is difficult to get the capital they need to operate and succeed. In Fintech, Small Business & the American Dream, former U.S.

Small Business Administrator and Senior Fellow at Harvard Business School, Karen G. Mills, focuses on the needs of small businesses for capital and how technology will transform the small business lending market. This is a market that has been plagued by frictions: it is hard for a lender to figure out which small businesses are creditworthy, and borrowers often don't know how much money or what kind of loan they need. Every small business is different; one day the borrower is a dry cleaner and the next a parts supplier, making it difficult for lenders to understand each business's unique circumstances. Today, however, big data and artificial intelligence have the power to illuminate the opaque nature of a small business's finances and make it easier for them access capital to weather bumpy cash flows or to invest in growth opportunities. Beginning in the dark days following the 2008-9 recession and continuing through the crisis of the Covid-19 Pandemic, Mills charts how fintech has changed and will continue to change small business lending. In the new fintech landscape financial products are embedded in applications that small business owners use on daily basis, and data powered algorithms provide automated insights to determine which businesses are creditworthy. Digital challenger banks, big tech and traditional banks and credit card companies are deciding how they want to engage in the new lending ecosystem. Who will be the winners and losers? How should regulators respond? In this pivotal moment, Mills elucidates how financial innovation and wise regulation can restore a path to the American Dream by improving access to small business credit. An ambitious book grappling with the broad significance of small business to the economy, the historical role of credit markets, the dynamics of innovation cycles, and the policy implications for regulation, this second edition of *Fintech, Small Business & the American Dream* is relevant to bankers, regulators and fintech entrepreneurs and investors; in fact, to anyone who is interested in the future of small business in America.

starling bank business account: *Global Fintech Revolution* Lerong Lu, 2024-09-23 Lerong Lu examines the biggest change in modern financial industry - the Fintech (financial technology) revolution - that denotes the close interaction between the financial services industry and latest information technologies such as big data, cloud computing, blockchain, and artificial intelligence. The three areas of banking institutions, online lending marketplaces, and money and payment systems are explored to assess how financial innovations affect the traditional financial industry, what kinds of regulatory challenges arise, and how global policymakers react to such challenges. With in-depth and international case studies on Fintech, including app-based banking services, mobile payments, P2P lending, and cryptocurrencies, the global Fintech hubs in six continents are assessed. The complex, dynamic, and multidimensional Fintech ecosystem is also investigated including its key players (such as regulatory strategy, regulatory sandbox, and RegTech) and Fintech corporations (including financial holding companies, Fintech unicorns, BigTech firms, and Metaverse platforms). Lu highlights the enormous benefits for financial institutions and their consumers and argues that Fintech contributes to a more equal, democratic, inclusive, and sustainable financial system. However, he also considers the risks and multiple legal, ethical, and regulatory challenges for policy-makers and financial authorities that Fintech has posed.
