trenitalia business class: High-Speed Rail and Sustainability Blas Luis Pérez Henríquez, Elizabeth Deakin, 2017-01-06 High speed rail (HSR) is being touted as a strategic investment for connecting people across regions, while also fostering prosperity and smart urban growth. However, as its popularity increases, its implementation has become contentious with various parties contesting the validity of socioeconomic and environmental objectives put forward as justification for investment. High Speed Rail and Sustainability explores the environmental, economic and social effects of developing a HSR system, presenting new evaluations of the proposed system in California in the US as well as lessons from international experience. Drawing upon the accumulated experience from past HSR system development around the world, leading experts present a diverse set of perspectives as well as diverse contexts of implementation. Assessments of the California case as well as cases from Japan, France, Germany, Italy, Spain, Taiwan, China, and the UK show how governments and stakeholders have bridged the gap between the vision and the realities of connecting metropolitan regions through HSR. This is a valuable resource for academics, researchers and policy-makers in the areas of urban planning, civil engineering, transportation and environmental design.

trenitalia business class: L'iconografia del silenzio Giulia Fars, 2025-03-21T00:00:00+01:00 Come raffigurare il silenzio? Quale forma visiva si può mai dare a ciò che non è tangibile, né dicibile? Eppure, il silenzio dimora da sempre nel nostro immaginario collettivo, nel nostro linguaggio, perfino nella nostra gestualità. Da segno di segreto, meditazione e ascesi nell'arte figurativa antica e religiosa, oggi il silenzio si evolve e muta, rinnovando il suo modo di mostrarsi alla società contemporanea. L'iconografia moderna del silenzio "regredisce", l'eloquente gesto di avvicinare il dito alle labbra si trasforma in una simbologia meno complessa che va di pari passo con il linguaggio tecnologico, trovando applicazione in luoghi e contesti figurativi-digitali che prima gli erano estranei, dove a farsi immagine sono gli stessi "oggetti del rumore".
