It discusses: how arbitrability of intellectual property rights disputes might improve worldwide IPR enforcement; how the "disregard of legal entity" may be used to establish implied consent by a person or entity that is not a signatory to an arbitration agreement; how an effective cross-border insolvency framework under the Indian insolvency and bankruptcy code can borrow from the UNCITRAL Model Law's and other jurisdictions' approaches to the tension between "universality" and "territoriality"; how a promising new mediation act for Pakistan may help resolve a backlog of millions of cases in a jurisdiction with a patchwork of traditional and modern alternative dispute resolution mechanisms; how the European Union seeks to balance the taxation of digital services; how Brazil is addressing the taxation of offshore indirect transfers; how private equity capital structures in the unique market of professional sports create opportunities as well as risks; how Securities Market Regulation theory plays a role in the organization and development of active securities markets, particularly in emerging markets; and how non-signatories can be bound by arbitration agreements in Brazil through "disregard of legal entity" to ascertain implied consent. The authors are practitioners and academics from Brazil, England, France, India, Pakistan, Singapore, the United States and Uzbekistan. They offer a broad and diverse perspective on some of today's pressing business law issues in a shrinking world.

Merging the language of business and self-help, *The Business of Being* will teach you how to enhance profitability—body, mind, and spirit.

uc davis business major: A Revolution of Rules Erica Bornstein, 2025-08-12 What is it about nonprofits that inspires so many to passionately support their agendas and others to adamantly seek their control? In India, laws regulating the nonprofit sector were dramatically reformed between 2010-2020, reconfiguring relationships between corporations, nonprofits, and the government.

Thousands of nonprofits, including powerful NGOs, lost their ability to receive foreign funding, and in 2015 dozens more were put on a state-sponsored watch list. While many assume that nonprofits are defined by the causes they champion, *A Revolution of Rules* demonstrates that the nonprofit form is shaped primarily through its regulation, in a dynamic process of democratic and political negotiation. Erica Bornstein argues that the scrutiny of nonprofits in India must be understood in a wider, global context of political judicialization and regulatory reform. She examines how members of nonprofit organizations are the unsung heroes of democracy as they navigate a shrinking stage for rights-based work and struggle to protect civil society. The protagonists featured in this book include nonprofit workers, lawyers, accountants, philanthropists, and civil servants who conduct their work on the sidelines—at workshops, in modest offices, through report-writing and petitions. To understand nonprofits and their relationship to democracy in the world, Bornstein asserts, one must look to the deceptively unassuming sites of struggle over the nonprofit form and its regulation.
