**washing car business plan: *Is There Life After Football?*** James A Holstein, Richard S Jones, George E Koonce, 2014-12-26 An award-winning book that takes us “inside the lives of NFL players to show why so many wind up in dire straits after their time on the field” (New York Post). 2016 Best Book Award, North American Society for the Sociology of Sport In this book, two social scientists team up with former linebacker and University of Wisconsin athletic director George Koonce to put a human face on the realities of life after professional football, exploring the challenges players face as well as the factors that can enable them to establish a successful post-NFL career. Drawing upon the experiences of hundreds of former players who describe their lives while playing the sport and after their football days are over, it shows how the “bubble”-like conditions of privilege that NFL players experience often leave them unprepared for the real world once they retire and must manage their own lives. The book also reveals the difficulties affecting former NFL players in retirement: social isolation, financial concerns, inadequate career planning, psychological challenges, and physical injuries. From players who make reckless and unsustainable financial investments during their very few high-earning years, to players who struggle to form personal and professional relationships outside of football, the stories in the book are both poignant and enlightening. Koonce weaves in his own story throughout, explaining the challenges he encountered and decisions that helped him succeed after leaving the sport. Ultimately, *Is There Life After Football?* concludes that, despite the challenges players face, it is possible for them to find success after leaving the NFL if they have the right support, education, and awareness of what might await them. “A timely exploration that will be of interest to football fans looking to better understand the complex culture of the NFL.” —Booklist

**washing car business plan: *Dream Klean Car Wash Business Plan*** Dustin Harakh, 2018 I chose to open a car wash because I believe they are a good first business to own and operate. The desire to keep cars clean is evident and with the geographic location, almost everyone owns a vehicle. We also happen to live in an area where we see a lot more sunshine than rain which makes it a good business to have in California. Like many others, I find cars to be fascinating. Cars are more than just a mode of transportation to me; they are an art. Whenever I see a unique or different type of car I always try to stop and look. Cars have become a hobby for me which makes opening a car wash such an exciting business venture. It gives me an opportunity to see all types of makes and models without having to own any of them. While fully-automated car washes are present in most areas, Dream Klean is one that seeks to build a relationship with its customers and to provide the highest quality service. This, along with my passion for cars, will ensure the business is successful. The goal is for every wash to live up to my standards. If I wouldn't drive off the lot, it's not good enough. The name, Dream Klean, came to me for two different reasons. The first is because I want every car we wash to look, feel, and smell like it is your dream car. Even those who don't necessarily

care for their car will have a different outlook once it has been washed at Dream Klean. The second is because of my kids. My son's name is Dominik and my daughter's name is Kamila. The name Dream Klean is a play on the first initial of their names. My hope is that they will take over the business once they are of age, so they can have the best life possible in the future. Oakdale, California is the location of choice for the business because it is a growing community that needs this type of service both for existing and new residents. The town has seen aggressive growth over the past few decades and will continue to grow. This provides an ample number of customers for Dream Klean and promotes growth.
