2021-08-01 Western missionaries contributed largely to Chinese lexicography. Their involvement was basically a practical rather than a theoretical one. In order to preach and convert, it was necessary to speak Chinese. A missionary on post needed to learn at least two languages, the national Guanhua, the language of the officials or Mandarin, and the local vernacular. The first lexicographical work by missionaries was a Portuguese-Chinese dictionary compiled in the late 1500s by Francisco Varo (1627-1687), a Spanish Dominican based in the province of Fujian, was legendary for his superb mastery in Mandarin. His *Vocabulario de la Lengua Mandarina*, a Spanish-Chinese dictionary, is made available to modern readers in the present study, which is based on two manuscripts held in Berlin and London. Volume 1 contains the text of Varo's glossary, with English translations offered for all Spanish glosses and Chinese characters added for all Chinese forms. Volume 2 includes a pinyin index to all Chinese forms in the text and a selective index to the English translations of the Chinese glosses. The *Vocabulario* is mainly devoted to the spoken language, but includes literary forms as well. Varo was also sensitive to other matters of usage, e.g., questions of style, new expressions coined by the missionaries, specific expressions in Chinese and in European culture, Chinese customs and beliefs, and aspects of grammar. The *Vocabulario* is recommended for readers interested in Chinese linguistics, lexicography, Sino-Western cultural relations and the history of Christianity in China.

varo business account: Francisco Varo's Grammar of the Mandarin Language (1703) W. South Coblin, Joseph A. Levi, 2000-09-15 Francisco Varo's *Arte de la Lengua Mandarina*, completed ca. 1680, is the earliest published grammar of any spoken form of Chinese and the fullest known description of the standard language of the seventeenth century. It establishes beyond doubt that this "Language of the Mandarins" was not Pekingese or Peking-based but had instead a Jiang-Huai or Nankingese-like phonology. It also provides important information about the nature and formation of pre-modern standard forms of Chinese and will lead to revisions of currently held views on Chinese koines and their relationship with regional speech forms and the received vernacular literature. Finally, it provides a wealth of information on stylistic speech levels, honorific usage, and social customs of the elite during the early Qing period. The book provides a full translation of the 1703 text of the *Arte*, an extensive introduction to the life and work of Varo, an index of Chinese characters inserted into the translation, and an index of linguistic terms and concepts. It should be of interest to a diverse readership of Chinese historical, comparative, and descriptive linguists, students of Qing history and literature, historiographers of linguistics, and specialists in early Western religious and cultural contact with China.

The contributions to this volume — in the spheres of political rhetoric, gender and sexuality, and corporate and academic communication — provide good evidence of contemporary social structure, social phenomena, and social issues. In this way, following the parameters of different analytical frameworks (critical discourse analysis, cognitive metaphor theory, appraisal theory, multimodality, etc.), the contributors address not only the linguistic aspects of texts but also, and more importantly, the cultural and cognitive dimensions of public communication in a range of real life communicative contexts and kinds of discourse. Although the volume is addressed, first and foremost, to readers with diverse interests in English linguistics, it may also prove valuable to scholars in other non-linguistic research fields like communication studies, social theory, political science, or

psychology.
