It takes into account both security and corporate risk management tactics. There is a lot of movement around this initiative in the industry: the British Standards Institute is releasing a new standard for BCP this year. Trade shows are popping up covering the topic.* Complete coverage of the 3 categories of disaster: natural hazards, human-caused hazards, and accidental and technical hazards.* Only published source of information on the new BCI standards and government requirements.* Up dated information on recovery from cyber attacks, rioting, protests, product tampering, bombs, explosions, and terrorism.
