At its core, zangi business leverages various technological platforms, including mobile applications, social media, and other digital communication tools, to facilitate real-time engagement with stakeholders. zangi business: Doing Business 2012 World Bank, 2011-10-18 Ninth in a series of annual reports comparing business regulations in 183 economies, Doing Business 2012 measures regulations affecting 11 areas of everyday business activity: starting a business dealing with construction permits employing workers registering property getting credit protecting investors paying taxes trading across borders enforcing contracts closing a business getting electricity The report updates all indicators as of June 1, 2011, ranks countries on their overall ease of doing

business, and analyzes reforms to business regulation identifying which countries are strengthening their business environment the most. Doing Business 2012 includes a new set of indicators on the time, steps, and cost for a private business to get an electricity connection. The data on connection services can inform utilities, regulators and governments seeking to strengthen the performance of the electricity sector. Drawing on a now longer time series, this year's report introduces a measure to illustrate how the regulatory environment for business has changed in each economy since Doing Business 2006 was published in 2005. A new distance to frontier measure complements the aggregate ranking on the ease of doing business, which benchmarks each economy's current performance on the indicators against that of all other economies in the sample for a given year. A fundamental premise of Doing Business is that economic activity requires good rules that are transparent and accessible to all. Such regulations should be efficient, striking a balance between safeguarding some important aspects of the business environment and avoiding distortions that impose unreasonable costs on businesses. Where business regulation is burdensome and competition limited, success depends more on whom you know than on what you can do. But where regulations are relatively easy to comply with and accessible to all who need to use them, anyone with talent and a good idea should be able to start and grow a business in the formal sector. The Doing Business report, which was started in 2003, has become one of the key ways in which the bank and other observers gauge business climate within developing countries... -- The Financial Times [Doing Business started] as a way to encourage countries to reduce obstacles to entrepreneurship. Developing countries compete to land a spot on the top 10 list of most-improving countries because it is seen as a way to get attention and investment. -- The Wall Street Journal [Doing Business] has succeeded in putting the issue of business red tape on the international political agenda. -- The Economist

zangi business: Ordered to Kill Sam Ekong, 2015-12-27 When his commanding officer crossed the line in Iraq by giving the one order he thought he should not have given, that did it for Maj. Eddy

Matthews Graves. He was so pissed off that he sent something incriminating about the war to an editor at the New York Times. Shortly thereafter, he took it on the lam and went AWOL. Days after receiving the sealed envelope, the New York Times wrote a scathing half-page editorial that openly admonished the army and demanded that the commanding officer, Gen. Milton Xavier Fletcher, resign. The editorial did not say what the general had done. Two days after, tired and beaten, the general abruptly resigned, and he also didn't say why. He kept his lips sealed and left everyone wondering what could've happened in Iraq. Right away, the congress, led by the opposing party, smelled a rat and began calling for all sorts of hearings and demanded that the rogue major be found and brought home for questioning. The White House panicked, and rightfully so, they should've. It was an election year. The polls were beginning to favor the opposition. If whatever caused the general to resign was damaging, they felt it would definitely tilt the upcoming election in favor of the opposing party if the major was brought home. They couldn't let that happen—the presidency was at stake. A decision had to be made fast. So they secretly ordered the major killed. However, they never counted on the resourcefulness and perseverance of those who wanted to see the major brought home—they wanted him alive. They were willing to go to any length to assure his safety even if it meant sacrificing other lives. The question is, will the major survive?

zangi business: People of the First Crusade Michael Foss, 2011-11-01 Near the end of the eleventh century, Western Europe was in turmoil, beset by invasions from both north and south, by the breakdown of law and order, and by the laxity and ignorance of the clergy. Searching for a way out of the increasing anarchy, Pope Urban II launched an army of knights and peasants in 1095 to fight the Turks, who had seized the Holy Land. Michael Foss tells the stories of these men and women of the First Crusade, often in their own words, bringing the time and events brilliantly to life. Through these eyewitness accounts the clichés of history vanish; the distinctions between hero and villain blur; the Saracen is as base or noble, as brave or cruel, as the crusader. In that sense, the fateful clash between Christianity and Islam teaches us a lesson for our own time. Foss reveals that the attitudes and prejudices expressed by both Christians and Muslims in the First Crusade became the basic currency for all later exchanges—down to our present day conflicts and misunderstandings—between the two great monotheistic faiths of Mohammed and Jesus Christ.
