Womens business suit donations play a crucial role in addressing the challenges many women face when entering or re-entering the workforce. Proper attire is often a key factor in making a good first impression during job interviews, and for many women, the cost of professional clothing can be a significant barrier. By donating business suits, individuals can help bridge this gap and provide women with the confidence they need to pursue career opportunities.

Additionally, the act of donating suits goes beyond just providing clothing. It is about fostering a sense of community and support. Many organizations that accept these donations also offer career training, resume workshops, and mentorship programs, creating a comprehensive support system for women. This holistic approach not only equips women with the necessary clothing but also provides them with the skills and confidence to succeed in their careers.

womens business suit donations: **I Used to Have a Handle on Life But It Broke** Mary LoVerde, 2011-01-11 Working 24/7 and STILL Can't Get It All Done? Then don't! Most women think that the only way to manage the mounting chaos in their lives is to take control and organize, organize, organize. No wonder we have overwhelming to-do lists that leave us feeling exhausted and powerless! But in *I Used to Have a Handle on Life but It Broke*, Mary LoVerde has a better idea. Showing us that the opposite of control is not chaos but contentment, LoVerde demonstrates how to counter the natural urge to assume responsibility for everything. In place of frustrating and futile controlling strategies, she gives readers straightforward techniques for maintaining their energy and keeping their balance no matter what life throws their way. Recognizing that we often confuse control with power, LoVerde delineates six solutions that will help women change from striving for control to thriving with true power: 1. Pose good questions 2. Pay attention 3. Predict your Achilles' heel 4. Partner with women 5. Pause before judging 6. Position yourself With her trademark sense of humor and the compassionate voice that has earned her such a strong national following, Mary

LoVerde shows us that the result of letting go is not a black hole of dirty laundry and unpaid bills, but a life that is light, free, and joyful.

womens business suit donations: Social Class Supports Georgianna Martin, Sonja Ardoin, 2023-07-03 Historically, higher education was designed for a narrow pool of privileged students. Despite national, state and institutional policies developed over time to improve access, higher education has only lately begun to address how its unexamined assumptions, practices and climate create barriers for poor and working class populations and lead to significant disparities in degree completion across social classes. The data shows that higher education substantially fails to provide poor and working class students with the necessary support to achieve the social mobility and success comparable to the attainments of their middle and upper class peers. This book presents a comprehensive range of strategies that provide the fundamental supports that poor and working-class students need to succeed while at the same time dismantling the inequitable barriers that make college difficult to navigate. Drawing on the concept of the student-ready college, and on emerging research and practices that colleges and universities can use to explore campus-specific social class issues and identify barriers, this book provides examples of support programs and services across the field of higher education – at both two- and four-year, public and private institutions – that cover:

- Access supports. Examples and recommendations for how institutions can assist students as they make decisions about applications and admission.
- Basic needs supports. Covering housing and food security, necessary clothing, sense of belonging through co-curricular engagement, and mental health resources.
- Academic and learning supports. Describes courses and academic programs to promote full engagement among poor and working class students.
- Advising supports. Illustrates advising that acknowledges poor and working class students' identities, and recommends continued training for both staff and faculty advisors.
- Supports for specific populations at the intersection of social class with other identities, such as Students of Color, foster youth, LGBTQ, and doctoral students.
- Gaining support through external partnerships with social services, business entities, and fundraising.

This book is addressed to administrators, educators and student affairs personnel, urging them to make the institutional commitment to enhance the college experience for poor and working class students who not only represent a substantial proportion of college students today, but constitute a significant future demographic.

womens business suit donations: Women's Health and Corporate Marketing Mary Hunter, 2024-08-26 This compelling collection of essays examines how historically significant marketing schemes have profoundly impacted women's health and healthcare across the world. Written by scholars and activists from a range of disciplines, including law, sociology, and the health sciences, the book spotlights a range of products that have had a damaging impact on women's health, laying bare the values and assumptions engrained within the marketing campaigns that promoted them. Examples include the advertisement of household and personal care products that expose users to toxic chemicals, empowerment messaging to persuade women to use tobacco products in low- and middle-income countries, and the deceptive marketing of benzodiazepines and opioids that disproportionately impacts women and their families. A powerful critique of the unethical and paternalistic approach of some corporations, this book will find readers among students taking courses in Public Health, Allied Health, Gender Studies, Sociology, and beyond, as well as interested professionals and lay readers.

womens business suit donations: Women and the Work of Benevolence Lori D. Ginzberg, 1990-01-01 Nineteenth-century middle-class Protestant women were fervent in their efforts to do good. Rhetoric--especially in the antebellum years--proclaimed that virtue was more pronounced in women than in men and praised women for their benevolent influence, moral excellence, and religious faith. In this book, Lori D. Ginzberg examines a broad spectrum of benevolent work performed by middle- and upper-middle-class women from the 1820s to 185 and offers a new interpretation of the shifting political contexts and meanings of this long tradition of women's reform activism. During the antebellum period, says Ginzberg, the idea of female moral superiority and the

benevolent work it supported contained both radical and conservative possibilities, encouraging an analysis of femininity that could undermine male dominance as well as guard against impropriety. At the same time, benevolent work and rhetoric were vehicles for the emergence of a new middle-class identity, one which asserts virtue--not wealth--determined status. Ginzberg shows how a new generation that came of age during the 1850s and the Civil War developed new analyses of benevolence and reform. By post-bellum decades, the heirs of antebellum benevolence referred less to a mission of moral regeneration and far more to a responsibility to control the poor and vagrant, signaling the refashioning of the ideology of benevolence from one of gender to one of class. According to Ginzberg, these changing interpretations of benevolent work throughout the century not only signal an important transformation in women's activists' culture and politics but also illuminate the historical development of American class identity and of women's role in constructing social and political authority.
