ualbany calculus: *John U. Monroe* Toni-Lee Capossela, 2012-12-17 In 1967, John U. Monroe, dean of the college at Harvard, left his twenty-year administrative career at that prestigious university for a teaching position at Miles College -- an unaccredited historically black college on the outskirts of Birmingham, Alabama. This unconventional move was a natural continuation of Monroe's life-long commitment to equal opportunity in education. A champion of the underprivileged, Monroe embodied both the virtues of the Greatest Generation and the idealism of the civil rights era. His teaching career spanned more than four decades, and, as biographer Toni-Lee Capossela demonstrates, his influence reached well beyond his lifetime. In addition to being a talented administrator, Monroe was a World War II veteran, a crusading journalist, a civil rights proponent, and a spokesman for the fledgling Peace Corps. His dedication to social justice outlasted the fervor of the 1960s and fueled bold initiatives in higher education. While at Harvard he developed a financial aid formula that became the national template for needs-based scholarships and earned him the title The Father of Modern Financial Aid. During his decade at Miles College he spearheaded a satellite freshman program in the economically depressed Greene County, then went on to help design a literacy program, a senior research requirement, and a writing-across-the-curriculum program at Tougaloo College. When hearing and memory loss drove him from the classroom, he moved his base of operations to Tougaloo's Writing Center, working with students in a collaborative relationship that suited his personality and teaching style. Only in 1996, after struggling with the symptoms of Alzheimer's for several years, did he retire with great reluctance. *John U. Monroe: Uncommon Educator* is a tribute to this passionate teacher and an affirmation of how one person can inspire many to initiate positive and lasting change.

ualbany calculus: The College Buzz Book Carolyn C. Wise, Stephanie Hauser, 2007-03-26 Many guides claim to offer an insider view of top undergraduate programs, but no publisher understands insider information like Vault, and none of these guides provides the rich detail that Vault's new guide does. Vault publishes the entire surveys of current students and alumni at more than 300 top undergraduate institutions. Each 2- to 3-page entry is composed almost entirely of insider comments from students and alumni. Through these narratives Vault provides applicants with detailed, balanced perspectives.

ualbany calculus: Calculus 2 Simplified Oscar E. Fernandez, 2025-04 The companion to Fernandez's successful *Calculus Simplified*, completing a full year of accessible, personalized

support for college calculus Calculus is both beautiful and useful. Its usefulness has made it the subject of core service courses that must deliver, in a limited time, an extraordinary amount and range of material: new fundamental concepts and abstract objects; particular realizations of the new objects, each with specific behavior; and precise techniques of manipulation and calculation. All of this is packed into courses and textbooks in a way that, to students, can entangle the fundamental and the particular. A student who is struggling can't tell whether they aren't grasping the fundamentals or are unfamiliar with specific facts or need more practice with common techniques. In this resource for students, Oscar Fernandez helps them to unpick the tangle. He reduces attention to the core of Calculus 2: techniques and applications of integration; sequences and series; and applications of integration to sequences and series. This clear focus gives him the space to build intuition-what's going on and why we care-as motivation for the increasing load of facts and techniques. As a result, students gain a solid understanding of the material while recovering the beauty and power of the subject. As with his previous book, *Calculus Simplified*, this clarified approach to the material is supplemented with hundreds of worked examples, hundreds of exercises (with answers), dynamic and interactive online content, and video examples and explainers--
