Background and Historical Context

The 12 million black voices book was published in 1941 during a period of significant social and political upheaval in the United States. This era was marked by the Great Depression, the Harlem Renaissance, and increasing awareness of racial inequality. The title refers to the estimated 12 million African Americans living in the United States at that time, whose stories had often been marginalized or ignored. The book was created as part of the Federal Writers' Project, an initiative under the Works Progress Administration (WPA) aimed at providing employment to writers and artists during the economic downturn.

Social Climate in the 1940s

During the 1940s, African Americans faced systemic racism, segregation under Jim Crow laws, and economic hardship. Despite these challenges, the period also saw the rise of Black cultural expression and intellectual movements that sought to redefine African American identity and demand civil rights.

The 12 million black voices book captures this complex social landscape through its evocative language and imagery.

12 million black voices book: *Walker Evans* Stephanie Schwartz, 2023-10-15 "NO POLITICS whatever." Walker Evans made this emphatic declaration in 1935, the year he began work for FDR's Resettlement Administration. Evans insisted that his photographs of tenant farmers and their homes, breadlines, and the unemployed should be treated as "pure record." The American photographer's statements have often been dismissed. In *Walker Evans: No Politics*, Stephanie Schwartz challenges us to engage with what it might mean, in the 1930s and at the height of the Great Depression, to refuse to work politically. Offering close readings of Evans's numerous commissions, including his contribution to Carleton Beals's anti-imperialist tract, *The Crime of Cuba* (1933), this book is a major departure from the standard accounts of Evans's work and American documentary. Documentary, Schwartz reveals, is not a means of being present—or being "political." It is a practice of record

making designed to distance its maker from the “scene of the crime.” That crime, Schwartz argues, is not just the Depression; it is the processes of Americanization reshaping both photography and politics in the 1930s. Historicizing documentary, this book reimagines Evans and his legacy—the complexities of claiming “no politics.”

12 million black voices book: *The Black Image in the New Deal* Nicholas Natanson, 1992 Between 1935 and 1942, photographers for the New Deal's Resettlement Administration-Farm Security Administration (FSA) captured in powerfully moving images the travail of the Great Depression and the ways of a people confronting radical social change. Those who speak of the special achievement of FSA photography usually have in mind such white icons as Dorothea Lange's Migrant Mother or Walker Evans's Alabama sharecroppers. But some six thousand printed images, a tenth of FSA's total, included black figures or their dwellings. At last, Nicholas Natanson reveals both the innovative treatment of African Americans in FSA photographs and the agency's highly problematic use of these images once they had been created. While mono-dimensional treatments of blacks were common in public and private photography of the period, such FSA photographers as Ben Shahn, Arthur Rothstein, and Jack Delano were well informed concerning racial problems and approached blacks in a manner that avoided stereotypes, right-wing as well as left-wing. In addition, rather than focusing exclusively on FSA-approved agency projects involving blacks - politically the safest course - they boldly addressed wider social and cultural themes. This study employs a variety of methodological tools to explore the political and administrative forces that worked against documentary coverage of particularly sensitive racial issues. Moreover, Natanson shows that those who drew on the FSA photo files for newspapers, magazines, books, and exhibitions often entirely omitted images of black people and their environment or used devices such as cropping and captioning to diminish the true range of the FSA photographers' vision.

12 million black voices book: *Usable Pasts: Social Practice and State Formation in American Art* Larne Abse Gogarty, 2022-03-16 *Usable Pasts* addresses projects dating to two periods in the United States that saw increased financial support from the state for socially engaged culture. By analysing artworks dating to the 1990s by Suzanne Lacy, Rick Lowe and Martha Rosler in relation to experimental theatre, modern dance, and photography produced within the leftist Cultural Front of the 1930s, this book unpicks the mythic and material afterlives of the New Deal in American cultural politics in order to write a new history of social practice art in the United States. From teenage mothers organising exhibitions that challenged welfare reform, to communist dance troupes choreographing their struggles as domestic workers, *Usable Pasts* addresses the aesthetics and politics of these attempts to transform society through art in relation to questions of state formation.

By attacking the taboos and hypocrisy that other writers had failed to address, he revolutionized American literature and created a disturbing and realistic portrait of the African American experience. This encyclopedia is a guide to his vast and influential body of works.

12 million black voices book: *Civil Rights Childhood* Katharine Capshaw, 2014-12-01 Childhood joy, pleasure, and creativity are not often associated with the civil rights movement. Their ties to the movement may have faded from historical memory, but these qualities received considerable photographic attention in that tumultuous era. Katharine Capshaw's *Civil Rights Childhood* reveals how the black child has been—and continues to be—a social agent that demands change. Because children carry a compelling aura of human value and potential, images of African American children in the wake of *Brown v. Board of Education* had a powerful effect on the fight for civil rights. In the iconography of Emmett Till and the girls murdered in the 1963 Birmingham church bombings, Capshaw explores the function of children's photographic books and the image of the black child in social justice campaigns for school integration and the civil rights movement. Drawing on works ranging from documentary photography, coffee-table and art books, and popular historical narratives and photographic picture books for the very young, *Civil Rights Childhood* sheds new light on images of the child and family that portrayed liberatory models of blackness, but it also considers the role photographs played in the desire for consensus and closure with the rise of multiculturalism. Offering rich analysis, Capshaw recovers many obscure texts and photographs while at the same time placing major names like Langston Hughes, June Jordan, and Toni Morrison in dialogue with lesser-known writers. An important addition to thinking about representation and politics, *Civil Rights Childhood* ultimately shows how the photobook—and the aspirations of
