

air assault student handbook

air assault student handbook serves as an essential resource for soldiers preparing to undertake the demanding Air Assault School. This comprehensive guide covers the critical components of training, including physical fitness requirements, technical knowledge, and tactical skills necessary to succeed in air assault operations. The handbook provides detailed instructions on helicopter operations, sling load procedures, rappelling techniques, and combat assault fundamentals. Understanding the content of the air assault student handbook is vital for candidates to ensure safety, efficiency, and mission readiness. This article explores the primary sections of the handbook, offering a thorough overview of its contents to assist soldiers in their preparation and training journey.

- Overview of Air Assault School
- Physical and Mental Preparation
- Key Training Components
- Equipment and Safety Procedures
- Assessment and Graduation Requirements

Overview of Air Assault School

The air assault student handbook outlines the purpose and scope of Air Assault School, a rigorous training program designed to equip soldiers with the skills to conduct air assault operations. The school emphasizes rapid deployment, helicopter insertion and extraction, and combat readiness in diverse environments. It focuses on developing proficiency in air mobility tactics and enhancing soldiers' ability to perform under pressure.

Purpose and Mission

The primary mission of Air Assault School is to train soldiers in air assault techniques that enable swift and effective movement of troops and equipment in support of combat operations. The handbook details how these skills contribute to operational success and the overall mission of the military unit.

Course Structure

The course is typically divided into phases, each focusing on specific skill sets such as physical conditioning, technical knowledge, and practical application. The handbook provides a breakdown of these phases, including timelines and key objectives for each segment.

Physical and Mental Preparation

Success in the air assault student handbook depends heavily on the physical and mental readiness of the candidate. The program requires exceptional endurance, strength, and mental resilience to meet the demands of the training and operational requirements.

Physical Fitness Standards

The handbook specifies physical fitness prerequisites, including timed runs, push-ups, sit-ups, and other exercises critical for passing the course. Maintaining peak physical condition is necessary to endure rigorous obstacle courses, marches, and helicopter operations.

Mental Toughness and Stress Management

In addition to physical conditioning, the handbook emphasizes coping strategies for stress and fatigue. Candidates must develop mental toughness to adapt to challenging scenarios and maintain focus during high-pressure situations.

Key Training Components

The air assault student handbook breaks down several core training elements that are integral to mastering air assault operations. These components build technical skills and operational knowledge essential for mission success.

Rappelling Techniques

Rappelling from helicopters is a fundamental skill taught in the course. The handbook provides step-by-step procedures for safe and effective rappelling, including equipment handling, body positioning, and emergency protocols.

Sling Load Operations

Sling load training covers the preparation, rigging, and inspection of external loads carried by helicopters. The handbook details the types of sling loads, proper rigging techniques, and safety checks to prevent accidents during transport.

Aircraft Orientation and Safety

Understanding helicopter operations and safety measures is critical. The handbook explains aircraft types, loading procedures, and communication protocols to ensure smooth coordination between ground personnel and aircrews.

Obstacle Course and Land Navigation

The obstacle course tests agility, strength, and endurance, while land navigation training enhances map reading and orienteering skills. Both are covered extensively in the handbook to prepare candidates for operational challenges.

Equipment and Safety Procedures

Proper use of equipment and adherence to safety standards are vital aspects covered in the air assault student handbook. The guide details gear specifications, maintenance, and safety checks to minimize risks during training and missions.

Personal Protective Equipment (PPE)

The handbook outlines the required PPE, including helmets, gloves, harnesses, and eye protection. It stresses the importance of fitting and maintaining equipment to ensure maximum protection.

Load Inspection and Rigging

Safety protocols for inspecting and rigging loads are thoroughly described. The handbook emphasizes the responsibilities of soldiers to verify load security and compliance with standards before helicopter lifts.

Emergency Procedures

In case of accidents or emergencies, the handbook provides detailed response actions, including evacuation procedures, first aid, and communication protocols to ensure rapid and effective response.

Assessment and Graduation Requirements

Completion of Air Assault School involves multiple evaluations to confirm that candidates meet all training standards. The air assault student handbook outlines these assessments and the criteria for successful graduation.

Written Examinations

Candidates must pass written tests that assess their knowledge of air assault principles, equipment, safety procedures, and tactical operations. The handbook provides guidance on the topics covered and study recommendations.

Physical and Practical Evaluations

Practical assessments include obstacle courses, sling load rigging, rappelling, and helicopter operations. The handbook details performance standards that candidates must meet to advance through the course.

Graduation Criteria

Graduation requires the successful completion of all phases, adherence to safety protocols, and demonstration of proficiency in all air assault skills. The handbook specifies these criteria to ensure that only qualified soldiers earn the Air Assault Badge.

- Understand the mission and structure of Air Assault School
- Meet demanding physical fitness and mental readiness standards
- Master key technical skills such as rappelling and sling load operations
- Follow strict equipment use and safety procedures
- Complete rigorous assessments to qualify for graduation

air assault student handbook: *Manuals Combined: WARRIOR TRAINING CENTER Air Assault School Handbook, 101st Airborne Division (Air Assault) The Sabalauski Air Assault School Handbook & 101st Airborne Division (Air Assault) Gold Book* , Air Assault is a combat insertion unit using helicopters to transport and insert soldiers into battle, provide medical evacuation, provide close air support, provide resupply operations. It is usually a company or bat-talion sized element. The term Air Assault derives from two types of operations known as Air Mobility and Vertical Envelopment. Air Mobility Operations were de-veloped by the German Army during WWII in the 1930's. The US Army soon adopted this method of offensive operations in 1941 using wooden gliders. The glider was assisted into the air by being towed by a larger aircraft and then released. The pilot had to navigate the large glider loaded with a team of infantry soldiers to the landing zone behind enemy lines, at night and attempt to land safely. Once the pilot landed the glider, he would join the mission as another infantry soldier with the team that he flew in. Although the gliders and techniques used were advanced for that time period they did pose some disadvantages. Once the aircraft was landed safely that team of soldiers were cut off from allied troops. Pilots had to be cross trained with infantry tactics so he could operate as both roles. The air mobility glider was abandoned after WWII after the invention of the helicopter. PREFACE 1 November 2011 1. The Sabalauski Air Assault School (TSAAS) is a FORSCOM TDA unit that trains leaders and Soldiers assigned to the 101st Airborne Division (Air Assault), as well as other Army units and armed services in several courses. By conducting the Air Assault and Pathfinder Courses The Sabalauski Air Assault School develops technically proficient and confident Soldiers capable of safely executing immediate and sustained air assault operations. The school also trains and qualifies military Rappel Masters, Fast Rope Masters and SPIES Masters in the application of infiltration and extraction techniques. The school provides quality basic airborne refresher and jumpmaster refresher training to airborne capable units. Finally, the school provides command and control of the 101st Airborne Division (Air Assault), Screaming Eagle Parachute Team. 2. This handbook is designed to facilitate the mission of the school, serving as a baseline of information for the Air Assault Course. It is not a substitute for applicable Army regulations, field manuals, training circulars, or technical manuals, but it is designed to complement the guidance in these publications in the area of air assault operations. The 101st Airborne Division (Air Assault) disclaims any responsibility for incidents occurring while applying these procedures. 3. The proponent for this handbook is the Commander of The Sabalauski Air Assault School. This 2011 update provides users with the latest doctrinal information regarding Air Assault Operations. Users of this publication are encouraged to recommend improvements or changes in writing to ACofS, G3/5/7/DPTM; ATTN: AFZB-K-GT-AA, Fort Campbell, KY 42223-5000. The 101st Airborne Division (Air Assault) has a long and rich heritage. As the world's only functional Air Assault Division, the 101st Airborne has pioneered the development of Air Assault tactics, techniques and procedures (TTPs). These tactics were quantifiably demonstrated in 1991 during Operation Desert Storm and most recently during Operation Enduring Freedom and Operation Iraqi Freedom. We are currently at war with dangerous and adaptive terrorist forces in complex environments. In response, the Division continually refines its TTPs, exploiting our unique capabilities to defeat our nation's enemies. This reference publication, The Gold Book June 2014, re-establishes the baseline for the planning and execution of Air Assault operations.
