alfred pope cause of death: Gracefully Insane Alex Beam, 2009-07-21 Its landscaped ground, chosen by Frederick Law Olmsted and dotted with Tudor mansions, could belong to a New England prep school. There are no fences, no guards, no locked gates. But McLean Hospital is a mental institution-one of the most famous, most elite, and once most luxurious in America. McLean alumni include Olmsted himself, Robert Lowell, Sylvia Plath, James Taylor and Ray Charles, as well as (more secretly) other notables from among the rich and famous. In its golden age, McLean provided as genteel an environment for the treatment of mental illness as one could imagine. But the golden age is over, and a downsized, downscale McLean-despite its affiliation with Harvard University-is struggling to stay afloat. Gracefully Insane, by Boston Globe columnist Alex Beam, is a fascinating and emotional biography of McLean Hospital from its founding in 1817 through today. It is filled with stories about patients and doctors: the Ralph Waldo Emerson prot'g' whose brilliance disappeared along with his madness; Anne Sexton's poetry seminar, and many more. The story of McLean is also the story of the hopes and failures of psychology and psychotherapy; of the evolution

of attitudes about mental illness, of approaches to treatment, and of the economic pressures that are making McLean and other institutions like it relics of a bygone age. This is a compelling and often oddly poignant reading for fans of books like Plath's *The Bell Jar* and Susanna Kaysen's *Girl, Interrupted* (both inspired by their author's stays at McLean) and for anyone interested in the history of medicine or psychotherapy, or the social history of New England.

alfred pope cause of death: *Lusitania* Greg King, Penny Wilson, 2015-02-24 *Lusitania*: She was a ship of dreams, carrying millionaires and aristocrats, actresses and impresarios, writers and suffragettes - a microcosm of the last years of the waning Edwardian Era and the coming influences of the Twentieth Century. When she left New York on her final voyage, she sailed from the New World to the Old; yet an encounter with the machinery of the New World, in the form of a primitive German U-Boat, sent her - and her gilded passengers - to their tragic deaths and opened up a new era of indiscriminate warfare. A hundred years after her sinking, *Lusitania* remains an evocative ship of mystery. Was she carrying munitions that exploded? Did Winston Churchill engineer a conspiracy that doomed the liner? Lost amid these tangled skeins is the romantic, vibrant, and finally heartrending tale of the passengers who sailed aboard her. Lives, relationships, and marriages ended in the icy waters off the Irish Sea; those who survived were left haunted and plagued with guilt. Now, authors Greg King and Penny Wilson resurrect this lost, glittering world to show the golden age of travel and illuminate the most prominent of *Lusitania*'s passengers. Rarely was an era so glamorous; rarely was a ship so magnificent; and rarely was the human element of tragedy so quickly lost to diplomatic maneuvers and militaristic threats--

alfred pope cause of death: *Mary Cassatt between Paris and New York* Ruth E. Iskin, 2025-01-28 The first comprehensive study of Cassatt's life, work, and legacy through the prism of a transatlantic framework. This book re-envisioning Mary Cassatt in the context of her transatlantic network, friendships, exhibitions, politics, and legacy. Rather than defining her as either an American artist or a French impressionist, author Ruth E. Iskin argues that we can best understand Cassatt through the complexity of her multiple identifications as an American patriot, a committed French impressionist, and a suffragist. Contextualizing Cassatt's feminist outlook within the intense pro- and anti-suffrage debates in the United States, Iskin shows how these impacted her artistic representations of motherhood, fatherhood, and older women. *Mary Cassatt between Paris and New York* also argues for the historical importance of her work as an advisor to American collectors, and demonstrates the role of museums in shaping her legacy, highlighting the combined impact of gender, national, and transnational dynamics.

alfred pope cause of death: *Handbook of Neurochemistry* Abel Lajtha, 2012-12-06 Anyone who has any contact with mental patients, old or young, or their families, or just visits a mental hospital or school for the retarded, is aware of the tremendous suffering caused by malfunctioning of the brain. The function of no other organ is so crucial for our everyday life, our proper functioning, indeed our happiness, and no other illness causes as much anguish to patients or their families as mental illness. It is surprising and sad, therefore, how little effort has been devoted to research in this area; more so because such research is the only hope to ameliorate this suffering, or, to speak in the language of politics or economics, to decrease the enormous sums that we spend on trying to help our patients, with what is must generally be agreed are the most primitive and inadequate methods of treatment. Clearly, since functions of the brain are vital not only in illness, but in health, pathology is not the only area of concern to neurochemists, but it is an area that urgently needs neurochemical contributions. Progress in this field has been slower than in other areas of neurochemistry, and it seems that solutions in this field are very elusive. The reason for this is that the experimental approach is especially difficult in conditions specific for humans, or specific for

complex behavior.
