african american history for children: Children of Fire Thomas C. Holt, 2011-09-27 "Simply brilliant. . . . The first survey of African American history to rival John Hope Franklin and Evelyn Brooks Higginbotham's *From Slavery to Freedom*." —Henry Louis Gates, Jr. Ordinary people don't experience history as it is taught by historians. The same people who lived through the Civil War and the eradication of slavery also dealt with the hardships of Reconstruction, so why do we almost always treat them separately? In *Children of Fire*, renowned historian Thomas C. Holt challenges this form to tell the story of generations of African Americans through the lived experience of the subjects themselves, with all of the nuances, ironies, contradictions, and complexities one might expect. Holt captures the entire African American experience from the moment the first twenty African slaves were sold at Jamestown in 1619. Each chapter focuses on a generation of individuals who shaped the course of American history, hoping for a better life for their children but often confronting the ebb and flow of their civil rights and status within society. Many familiar faces grace these pages—Frederick Douglass, W.E.B. DuBois, Martin Luther King, and Barack Obama—but also some overlooked ones. Figures like Anthony Johnson, a slave who bought his freedom in late seventeenth century Virginia and built a sizable plantation, only to have it stolen away from his children by an increasingly racist court system. Or Frank Moore, a WWI veteran and sharecropper who sued his landlord for unfair practices, but found himself charged with murder after fighting off an angry white posse. Taken together, their stories tell how African Americans fashioned a culture and identity amid the turmoil of four centuries of American history. "Provocative. . . . readable, passionate." —Publishers Weekly

african american history for children: Beyond the Boundaries of Childhood Crystal Webster, 2021-06-07 For all that is known about the depth and breadth of African American history, we still understand surprisingly little about the lives of African American children, particularly those affected by northern emancipation. But hidden in institutional records, school primers and penmanship books, biographical sketches, and unpublished documents is a rich archive that reveals the social and affective worlds of northern Black children. Drawing evidence from the urban centers of Boston, New York, and Philadelphia, Crystal Webster's innovative research yields a powerful new history of African American childhood before the Civil War. Webster argues that young African Americans were frequently left outside the nineteenth century's emerging constructions of both race and childhood. They were marginalized in the development of schooling, ignored in debates over child labor, and presumed to lack the inherent innocence ascribed to white children. But Webster shows that Black children nevertheless carved out physical and social space for play, for learning, and for their own aspirations. Reading her sources against the grain, Webster reveals a complex reality for antebellum Black children. Lacking societal status, they nevertheless found meaningful agency as historical actors, making the most of the limited freedoms and possibilities they enjoyed.

african american history for children: Children's Biographies of African American Women Sara C. VanderHaagen, 2018-11-15 A study of how rhetoric has shaped the life stories of African American role models in children's literature In *Children's Biographies of African American Women: Rhetoric, Public Memory, and Agency* Sara C. VanderHaagen examines how these biographies encourage young readers to think about themselves as agents in a public world. Specifically VanderHaagen illustrates how these works use traditional means to serve progressive ends and thereby examines the rhetorical power of biography in shaping identity and promoting public action. Drawing on scholarship in rhetoric, memory studies, and children's literature, VanderHaagen presents rhetorical analyses of biographies of three African American women—poet Phillis Wheatley, activist Sojourner Truth, and educator-turned-politician Shirley Chisholm—published in the United States during the twentieth and twenty-first centuries. VanderHaagen begins by analyzing how biographical sketches in books for black children published during the 1920s represent Wheatley and Truth. The study then shifts to books published between 1949 and 2015. VanderHaagen uses a concept adapted from philosopher Paul Ricoeur—the idea of the agential spiral—to chart the ways that biographies have used rhetoric to shape the life stories of Wheatley, Truth, and Chisholm. By bringing a critical, rhetorical perspective to the study of biographies for children, this book advances the understanding of how lives of the past are used persuasively to shape identity and encourage action in the contemporary public world. VanderHaagen contributes to the study of rhetoric and African American children's literature and refocuses the field of memory studies on children's biographies, a significant but often-overlooked genre through which public memories first take shape.

african american history for children: *Historical Perspectives on the Education of Black Children* Harry Morgan, 1995-06-30 The African American heritage is interwoven throughout the history of the United States, but few educators are prepared to teach children about the events that shaped the African American experience. Most of the stories about slavery, the days when it was illegal to teach black children to read, and when blacks were not allowed to vote or own land, are part of the remembered oral history of black families. Morgan retells American history from the point of view of the events that effected blacks—the Great Depression, the WPA, and the federal policies that led to current Head Start programs, school integration in the 1950s and the Civil Rights Movement in the 1960s, the War on Poverty, and the IQ controversy. He shows how Aesop and the teachings of Socrates and Aristotle established the philosophical traditions perpetuated by the great black educators, W.E.B. DuBois and Booker T. Washington, with the purpose of providing black children with a better understanding of their heritage, their importance in American history, and their place in the world.

african american history for children: Encyclopedia of African American History, 1619-1895 Paul Finkelman, 2006-04-06 It is impossible to understand America without understanding the history of African Americans. In nearly seven hundred entries, the Encyclopedia of African American History, 1619-1895 documents the full range of the African American experience during that period - from the arrival of the first slave ship to the death of Frederick Douglass - and shows how all aspects of American culture, history, and national identity have been profoundly influenced by the experience of African Americans. The Encyclopedia covers an extraordinary range of subjects. Major topics such as Abolitionism, Black Nationalism, the Civil War, the Dred Scott case, Reconstruction, Slave Rebellions and Insurrections, the Underground Railroad, and Voting Rights are given the in-depth treatment one would expect. But the encyclopedia also contains hundreds of fascinating entries on less obvious subjects, such as the African Grove Theatre, Black Seafarers, Buffalo Soldiers, the Catholic Church and African Americans, Cemeteries and Burials, Gender, Midwifery, New York African Free Schools, Oratory and Verbal Arts, Religion and Slavery, the Secret Six, and much more. In addition, the Encyclopedia offers brief biographies of important African Americans - as well as white Americans who have played a significant role in African American history - from Crispus Attucks, John Brown, and Henry Ward Beecher to Olaudah Equiano, Frederick Douglass, Sarah Grimke, Sojourner Truth, Nat Turner, Phillis Wheatley, and many others. All of the Encyclopedia's alphabetically arranged entries are accessibly written and free of jargon and technical terms. To facilitate ease of use, many composite entries gather similar topics under one headword. The entry for Slave Narratives, for example, includes three subentries: The Slave Narrative in America from the Colonial Period to the Civil War, Interpreting Slave Narratives, and African and British Slave Narratives. A headnote detailing the various subentries introduces each composite entry. Selective bibliographies and cross-references appear at the end of each article to direct readers to related articles within the Encyclopedia and to primary sources and scholarly works beyond it. A topical outline, chronology of major events, nearly 300 black and white illustrations, and comprehensive index further enhance the work's usefulness.
