america through the lens syllabus: New Formulas for America's Workforce, 2003

america through the lens syllabus: What's Killing America Jason Rantz, 2023-09-26 A

stunning book about how America's biggest cities are being destroyed by progressive policies and woke Democrats. Many Americans have no idea how badly our largest, Democrat-run cities have deteriorated. We've been complacent for far too long, assuming that the craziest elements of the radical Left would stay confined to the East and West coasts. But crime, drug addiction, homelessness, left-wing school indoctrination, so-called inclusive housing policies, and outrageous taxes don't stay within the big city limits of places like Los Angeles, Chicago, Portland, New York, Seattle, and San Francisco. The effects of ideologically driven left-wing policies always spread, which should alarm Americans regardless of their political leanings. Jason Rantz is a prominent radio host, a trusted journalist, and a frequent Fox News guest unafraid to go directly into the action. He's grown a national following by breaking news the mainstream media won't, covering the consequences of destructive leftist policies wherever they occur. He was right there for the chaos in his hometown of Seattle when liberal anarchists declared an autonomous, police-free "CHOP Zone." He infiltrates the Antifa marches and knows firsthand how those radicals operate. This is the shocking story of what he's learned. Employing on-the-ground reporting and fact-based analysis, Rantz zooms out to conduct a fascinating detailed, data-driven study of how these liberal policies result in chaos, misery, and (too often) bloodshed. He skillfully recounts the tragic events with a narrative reporter's eye for detail to tell the true story of what's happening in America's cities.

america through the lens syllabus: Teaching Gender and Sex in Contemporary America

Kristin Haltinner, RYANNE PILGERAM, 2016-04-28 This book provides innovative pedagogy, theory, and strategies for college and university professors who seek effective methods and materials for teaching about gender and sex to today's students. Building off its predecessor: *Teaching Race and Anti-Racism in Contemporary America*, this book offers complementary classroom exercises for teachers, that foster

active and collaborative learning. Through reflecting on the gendered dimensions of the current political, economic, and cultural climate, as well as presenting novel lesson plans and classroom activities, *Teaching Gender and Sex in Contemporary America* is a valuable resource for educators.

america through the lens syllabus: Make America Hate Again Victoria McCollum, 2019-06-21 Horror films have traditionally sunk their teeth into straitened times, reflecting, expressing and validating the spirit of the epoch, and capitalising on the political and cultural climate in which they are made. This book shows how the horror genre has adapted itself to the transformation of contemporary American politics and the mutating role of traditional and new media in the era of Donald Trump's Presidency of the United States. Exploring horror's renewed potential for political engagement in a socio-political climate characterised by the angst of civil conflict, the deception of 'alternative facts' and the threat of nuclear or biological conflict and global warming, *Make America Hate Again* examines the intersection of film, politics, and American culture and society through a bold critical analysis of popular horror (films, television shows, podcasts and online parodies), such as *10 Cloverfield Lane*, *American Horror Story*, *Don't Breathe*, *Get Out*, *Hotel Transylvania 2*, *Hush*, *It*, *It Comes at Night*, *South Park*, *The Babadook*, *The Walking Dead*, *The Woman*, *The Witch* and *Twin Peaks: The Return*. The first major exploration of the horror genre through the lens of the Trump era, it investigates the correlations between recent, culturally meaningful horror texts, and the broader culture within which they have become gravely significant. Offering a rejuvenating, optimistic, and positive perspective on popular culture as a site of cultural politics, *Make America Hate Again* will appeal to scholars and students of American studies, film and media studies, and cultural studies.

This book will not only help instructors empower students to recognize economic injustice and its interaction with capitalist organization, but also develops and acts on transformative solutions. Through analysis of the classed dimensions of the current political, economics, and cultural climate, as well as presenting novel lesson plans and classroom activities, this book is of great value for college and university professors.

america through the lens syllabus: Latin American History through its Art and Literature Jack Child, 2022-09-14 *Latin American History through its Art and Literature* uses 2,000 years of Latin American history as the organizing theme, and then explores that history through the words of the writer, the brush of the painter, the pen of the cartoonist, and the lens of the photographer. america through the lens syllabus: Coming Into Contact Annie Merrill Ingram, 2010-01-25 A snapshot of ecocriticism in action, *Coming into Contact* collects sixteen previously unpublished essays that explore some of the most promising new directions in the study of literature and the environment. They look to previously unexamined or underexamined aspects of literature's relationship to the environment, including swamps, internment camps, Asian American environments, the urbanized Northeast, and lynching sites. The authors relate environmental discourse to practice, including the teaching of green design in composition classes, the restoration of damaged landscapes, the persuasive strategies of environmental activists, the practice of urban architecture, and the impact of human technologies on nature. The essays also put ecocriticism into greater contact with the natural sciences, including elements of evolutionary biology, biological taxonomy, and geology. Engaging both ecocritical theory and practice, these authors more closely align ecocriticism with the physical environment, with the wide range of texts and cultural practices that concern it, and with the growing scholarly conversation that surrounds this concern.

america through the lens syllabus: Striking Distance Charles Russo, 2019-11-01 In the spring of 1959, eighteen-year-old Bruce Lee returned to San Francisco, the city of his birth. Although the martial arts were widely unknown in America, Bruce encountered a robust fight culture in the Bay Area, populated with talented and trailblazing practitioners such as Lau Bun, Chinatown's aging kung fu patriarch; Wally Jay, the innovative Hawaiian jujitsu master; and James Lee, the Oakland street fighter. Regarded by some as a brash loudmouth and by others as a dynamic visionary, Bruce spent his first few years back in America advocating for a modern approach to the martial arts, and showing little regard for the damaged egos left in his wake. The year of 1964 would be an eventful one for Bruce, in which he would broadcast his dissenting worldview before the first great international martial arts gathering, and then defend it by facing down Wong Jack Man—Chinatown's young kung fu ace—in a legendary behind-closed-doors showdown. These events were a catalyst to the dawn of martial arts in America and a prelude to an icon. Based on over one hundred original interviews, *Striking Distance* chronicles Bruce Lee's formative days amid the heated martial arts proving ground that thrived on San Francisco Bay in the early 1960s.

america through the lens syllabus: Liberal Learning and the Art of Self-Governance Emily Chamlee-Wright, 2015-11-19 Concerns over affordability and accountability have tended to direct focus away from the central aims of liberal learning, such as preparing minds for free inquiry and inculcating the habits of mind, practical skills, and values necessary for effective participation in civil society. The contributors to this volume seek to understand better what it is that can be done on a day-to-day basis within institutions of liberal learning that shape the habits and practices of civil society. The central argument of this volume is that institutions of liberal learning are critical to a developing and flourishing civil society. It is within these civil society incubators that the habits of open discourse are practiced and honed; that a collaborative (often contentious) commitment to truth seeking serves as the rules that govern our work together; that the rules of personal and widespread social cooperation are established, practiced, and refined. Many have made this argument as it relates to community based learning, and we explore that theme here as well. But acquiring and practicing the habits of civil society recur within and throughout the college context—in the classrooms, in college governance structures, in professional associations, in collaborative research, in the residence halls, and on the playing field. To put it another way, when they are at their best, institutions of liberal learning are contexts in which students learn how to live in a free society and learn the art of self-governance.

america through the lens syllabus: From American Empire to América Cósmica through Philosophy Terrance MacMullan, 2023-08-08 From American Empire to América Cósmica through Philosophy: Prospero's Reflection envisions a greater ideal American philosophy that integrates philosophies from across the Americas and is set to work resolving the problems that vex the peoples of the Americas. This work contributes to the rapidly growing dialogue on Inter-American philosophy with research that adds to the list of philosophical affinities across the Americas. However, Terrance MacMullan also delves deeply into the points of philosophical contention and misrecognition between Anglo-American and Ibero-American philosophies by reversing the colonial gaze of the last centuries. Following in the tradition of cultural theorists like Enrique Rodó and Roberto Fernández Retamar, who draw on Shakespeare's *The Tempest* as a source of literary metaphors to understand colonialism and imperialism in the Americas, MacMullan argues that the United States will never achieve democratic community unless it first contends with the harsh critiques of its culture and philosophies reflected within the works of Latin American philosophers who prophesied and survived the imperialism of the North American Prospero but whose works are still largely unknown and unseen within U.S. universities.

america through the lens syllabus: More Than Words Sarah Soyei, Kate Hollinshead, 2022-09-21 Young people develop their value systems during their school years, offering the perfect window of opportunity for educators to challenge prejudice and promote race equality during these formative years. Yet, as teacher training is increasingly school-centred and school budgets are stretched more thinly than ever, most teachers do not feel they have the time to develop the language or skills to do so. *More Than Words* is an easily implementable tool for all educators - teachers, senior leaders, governors and support staff - to help them look beyond fire-fighting racist incidents to create long-term systemic changes. Supporting teachers in a non-judgemental fashion, this book dismantles any myths they may be harbouring so they can engage with issues with an open mind, allowing them to create positive change. This comprehensive guide helps school staff to create a safe, inclusive and supportive environment for all young people.
